Descriptors—Ability, Academic Standards, Achievement, *Aspiration, Educational Research, *Expectation, *Institutional Characteristics, *Performance, *School Attitudes, Schools, Science Education, Secondary Education

This publication is a report which deals with the effects of school characteristics on the educational process and its outcomes. Specifically, the report focuses on the educational expectations of students at age 14 and in their final year of secondary school, and attempts to replicate in 15 countries a model which considers the effects of school socio-economic status and school ability level. When introduced, the model was used to demonstrate that the average ability level of the school had a negative effect on educational expectations. However, the findings of this report suggest that the evidence for the negative effect of school ability is not strong and indicate that further research into a possible country effect would be worthwhile. Descriptors—*Building Conversion, *Building Improvement, *Building Systems, Climate Control, Cost Effectiveness, Daylight, Design Needs, Energy Conservation, Estimated Costs, *Heating, Home Management, *Solar Radiation, Worksheets

Identifiers—*Energy Education

This publication provides information about present uses of solar energy for space, water, and swimming pool heating that are practical for the San Francisco Bay area. It attempts to provide interested persons with the information needed to make decisions regarding installations of solar heating systems. The point of view taken is that any structure can be retrofitted with a solar heating system. Chapter titles include: (1) Solar Basics; (2) Energy Estimating and Conservation; (3) Solar Prospecting; (4) Retrofit Systems; (5) Estimating Performance; (6) Solar Economics; (7) Getting Started; and (8) Further Information. Many different adaptations of both passive and active solar heating systems are diagrammed and explained. Installation tips and precautions are also included. Worksheets are provided, along with completed examples, to aid in estimating the cost of installing solar heating systems. Additional sources of information are suggested to the interested reader. Even though this publication refers to the San Francisco area, the solar retrofitting information given applies almost anywhere. (MR)

This is the teacher's guide for a BSCS energy education module designed for high school, college, or adult students. The module activities provide opportunities for students to acquire accurate information about energy, to identify and analyze their own attitudes and those of others, and to consider questions and concerns about energy related issues. Contents include: (1) Project History; (2) Rationale and Objectives; (3) Curriculum Components; (4) Administrative Arrangements; (5) Evaluation and Grading; (6) Facilitating Small and Large Group Discussions; (7) Instructional Strategies; and (8) Some Potential Problems and Solutions. Structured lesson plans are given for each day in the Instructional Strategies section. These lesson plans, which correspond to materials in the student handbook, include: (1) expected outcomes for each step in the lesson plan; (2) enabling objective; (3) activity type; (4) purpose/rationale; and of course (5) the steps or segments of the days' instructional strategy. Instructor's commentary is also provided in bold type where needed. Worksheets and an attitude survey are included for photocopying. (MR)

Identifiers—*Energy Education

This publication is the student handbook for a BSCS energy education module designed for high school, college, and adult students. It is designed to provide students with information about energy that will help them make decisions as citizens. Basically, this document is a text to supplement the activities and lesson plans in the teacher's guide. Chapter titles are: (1) Getting Started; (2) Identifying and Researching Energy Questions; (3) Techniques for Gathering Information; (4) Analyzing and Interpreting Data; (5) Energy Resources; (6) Energy Uses; (7) Physical Laws; (8) Politics and the Law; (9) Environmental Impact; (10) Economics: Public and Private; (11) Attitudes and Feelings; (12) Health and Safety; (13) Design and Technology; (14) Valuing and Decision Making; and (15) Possible Energy Futures. Most of the pictures and illustrations are black and white. Some sections provide remedial or review information such as a section on simple calculations with large numbers in scientific form. (MR)

Status of the Energy Management Program in the Orange County Public Schools.

Orange County Public Schools, Orlando, Fla.

Pub Date—78

Note—56p.; Contains light and broken type

Pub Type— Reports - Descriptive (141) — Guides - Non-Classroom (055)

EDRS Price - MF01/PC03 Plus Postage.

Descriptors—Administrative Agencies, *Administrative Policy, Administrator Guides, Committees, Conservation (Environment), *Energy Conservation, *Management, *School Administration, School Buildings, *School Districts

The purpose of this report is to present the status of Orange County School District's Energy Management program to selected management personnel. Included in this report are various background papers which comprise the body of the publication. The first and largest paper is entitled "Energy Management in the Orange County Public Schools." This paper presents an overview of the programs undertaken by the District in the past six years and proposes future efforts in total energy management. The second paper presents the functions and responsibilities of the Energy Management Conservation Program. The third paper presents guidelines for establishing an Energy Conservation Committee within each school building. It suggests the major responsibilities to be assigned to key personnel and it provides a list of energy conservation tips for consideration by the committee. (MR)

Identifiers—Energy Education

This collection of excerpts and bibliographies address the three debate propositions selected as subjects of the 1978-1979 debate question for high schools selected by the National University Extension Service, "What should be the energy policy of the United States?" The collection is divided into three parts each addressing one of the debate propositions: (1) Resolved, that the Federal Government should exclusively control the development and distribution of energy resources in the United States; (2) Resolved, that the Federal Government should establish a comprehensive program to significantly reduce energy consumption in the United States; and (3) Resolved, that the Federal Government should establish a comprehensive program to significantly increase the energy independence of the United States. An introductory section summarizes the U.S. policy response to the energy dilemma. The materials are intended not as an exhaustive coverage of the subject, but to furnish debators with a basis for further research on the topic. (RE)

Education
This publication is a guide to films on energy conservation issues. The first section is a film source index which lists the organizations, their addresses and telephone numbers. The main body of the publication lists and describes films. This film listing is organized by topics to which the films relate. Topics include: (1) What is energy?; (2) Sources of energy; (3) Energy issues and options; (4) The energy crisis; (5) Energy conservation; and (6) Energy and the environment. For each film listed a description of its contents and length is given along with the film source. Some of the items listed are film strips and audiovisual materials packages. (MR)

Topics of general interest in park and recreation management and programming are discussed. This issue deals with energy/environmental education in parks. Various professionals in the fields of park and recreation, education, conservation, energy, historic preservation, and government have contributed articles. Some describe ongoing programs and projects, while others suggest future directions for energy and environmental education. Both the natural and the built environments, with an emphasis on man's impact and interrelationship to each, are discussed. A bibliography of books and reports is included along with a list of federal agencies and private organizations to contact for publications and assistance. (TM)

This speech first describes three activities conducted by the National Science Foundation's Women in Science Program. These are: (1) the Science Career Workshops; (2) the Science Career Facilitation Projects; and (3) The Visiting Women Scientists Project. Next, important issues to be considered for the future of these projects are presented. The issues cited are what kinds of science careers should women be considering, why is science considered a masculine field, how will the field change when more women become scientists, what can be done to increase scientific literacy for females, and what is the connection between ethnic minorities and women in science. Presented are social, educational, and job-related characteristics of a select group of scientists, engineers and other highly-trained persons in the United States. Eight major fields (computer specialists, engineers, mathematical specialists, life scientists, physical scientists, environmental scientists, psychologists, and social scientists) are used to categorize 17 detailed fields of science or engineering. The report provides highlights of findings, a summary of results, a discussion of the sample and statistical considerations, the questionnaire used, and a section on definitions and explanations. Data for the document were obtained from the 1976 National Survey of Natural and Social Scientists and Engineers sponsored by the National Science Foundation and conducted by the Bureau of the Census. This conference presented a discussion of problems related to federal budgeting for research and development (R&D). It was organized around three working sessions. The first session considered the 1977 budget for R&D and the future outlook for R&D. The second session was devoted to the Congressional role in R&D budgeting. The third session addressed some of the fundamental problems of the budgeting process as it affects R&D. (BB)

Presented are articles originally published in

"Science" during 1975-77. This issue is divided into five parts. The first part presents four articles designed to provide an overview of the past, present, and future of electronics. The second part presents twelve articles showing the pervasiveness of electronics in banking and marketing, medicine, communications, research, education, national defense, and industry. The third part discusses some policy problems resulting from the electronic revolution. These include problems of international trade, telecommunication and government regulation, and employment. The fourth part deals with computers, computer networks, microprocessors, and what computers mean to man and society. The last part, Research Frontiers, covers such areas as new memory technologies, fiber optics for telecommunications, and the limits of solid-state electronics. (BB)

Descriptors—*Energy, *Energy Conservation, *Environment, *Industry, *Natural Resources, Research, Science Education, Technology

Presented are 26 articles originally published in "Science" during 1975-78. The document is divided into three parts. The first part contains articles on changes in energy use. Included are articles on industrial energy use, energy options and strategies for Western Europe, energy use in Brazil, and solar energy for village development, as well as an article on water use requirements of various energy options, and one on prediction of future atmospheric carbon dioxide levels. The second part is on conservation and public policy. It covers the U.S. energy demand, energy conservation in Sweden, transportation energy conservation policies, and the effects of federal residential energy conservation programs. The last part summarizes the future of fossil fuels, fission energy, solar energy, and fusion energy. (BB)

Upper elementary students are the focus of this paper, intended to present a few studies that have been done in the past five years that are related to two aspects of problem solving: strategies used by the problem solver and tasks used in studying problem solving. The review is not intended to be exhaustive, but is designed to present examples of strategies and tasks that have been studied or used in recent research. (MP)

Identifiers—*Mathematical Problem Solving Project

The philosophy and activities of the Mathematical Problem Solving Project (MPSP) are described. The main focus is on the research and development efforts, especially the attempt to develop a conceptual framework for problem solving through the creation of an appropriate model. An extensive discussion of models of problem solving is included. Four main topics are discussed: (1) critical issues and questions related to mathematical problem solving; (2) nature of MPSP; (3) thrust of the work of MPSP; and (4) plan for future research. An article by this author on a similar topic appeared in the November 1977 issue of "Arithmetic Teacher." (MP)

Four procedures are stated which are inherent in problem solving: (1) understanding the problem; (2) planning to solve the problem; (3) solving the problem; and (4) reviewing the problem and the solution. Each of the four procedures is illustrated using problems appropriate for elementary school children. These illustrations are accompanied by some guidelines and instructional moves which can be used to help children in their problem solving. Two different problems are used: (1) a typical textbook problem; and (2) a process problem. (MP)

Identifiers—*Mathematical Problem Solving Project

The activities described in this report are focused on a preliminary investigation of the effects of presenting problems to children without any prior formal problem-solving instruction, on the children's ability to solve the problems, and on their subsequent problem-solving performances. The work was an outgrowth of activities related to the observation of children's problem-solving efforts and the resulting conjectures. A description is given of the preparation of materials and the ensuing pilot study. Implications are discussed and some conjectures related. (MP)

This teaching guide presents six lessons on using tables to solve problems. For each lesson, the guide gives the purpose, the rationales, materials, and detailed teaching procedures. The six lessons involve making a table, completing a table, using tables to solve problems (lessons 3 and 4), reading tables, and solving problems. Each lesson opens with a cartoon drawing that places the student in a school environment. This is followed by three or four problem situations and a page extending the experiences within the lesson. Optional activities are suggested. (MP)

Examined are the health effects of law concentrations of the radioactive isotope Radium-226 in drinking water. Contents include discussions of the physical properties of radium, biological and metabolic effects, health effects of exposure to Radium-226, and populations at risk. Appendices provide more technical information including equations, charts, graphs, and a glossary of terms. Sixty-three references are given. (MA)

Identifiers—Illinois, Mining
This document discusses reclamation alternatives for land that has been surface-mined. Special attention is given to the use of tree planting as a desirable reclamation method. Contents include Illinoian reclamation history, knowledge of forestry techniques and successes on surface-mined lands, recreational and educational use of the reclaimed land, social and economic effects of reclamation, and reclamation legislation and goals. A reclamation directory containing names and addresses of coal companies, state and federal agencies, and universities and colleges is provided. (MA)

Self-Paced Basic Mathematics for Water and Wastewater Operators.
Kirkwood Community Coll., Cedar Rapids, Iowa.
Spons Agency—Environmental Protection Agency, Washington, D.C. Office of Federal Activities.
Pub Date—77
Grant—IAD-0-74-109-005
Note—273p.
Pub Type— Guides - Classroom - Learner (051)
EDRS Price - MF01/PC11 Plus Postage.
Descriptors—Algebra, *Arithmetic, *Environmental Technicians, Geometry, *Independent Study, *Mathematics Education, Metric System, Postsecondary Education, Utilities, *Waste Disposal
This basic mathematics course is composed of eight lessons. Each lesson contains a pre-test and post-test, problems and examples oriented toward water and wastewater operations, suggested supplemental readings, and estimated time for completion. The topics of the lessons are: (1) numeration; (2) whole numbers; (3) fractions; (4) decimals; (5) percentages; (6) ratio and proportion; (7) squares and square roots; (8) exponents; (9) scientific notation; (10) basic algebra; (11) formulas; (12) roman numerals; (13) the metric system; (14) calculator use; (15) geometry; (16) graphs and charts; and (17) basic statistics. The entire course can be completed in about 40 hours. The prerequisites vary and are specified for each lesson. (BB)

Pub Type— Guides - Classroom - Learner (051)
EDRS Price - MF01/PC03 Plus Postage.
Descriptors—Electricity, *Environmental Technicians, Mathematics, *Physics, Postsecondary Education, *Pressure, *Temperature, Utilities, *Waste Disposal
This physics course covers the following main subject areas: (1) liquids; (2) pressure; (3) liquid flow; (4) temperature and heat; and (5) electric currents. The prerequisites for understanding this material are basic algebra and geometry. The lessons are composed mostly of sample problems and calculations that water and wastewater operators have to make. The examples are followed by practice problems. Each lesson concludes with an additional reading list. (BB)

Identifiers—Research Reports
The transcripts of interviews with 115 physics students from ten different British universities are analyzed. Each student was encouraged to tell about one good learning experience and one bad learning experience. The characteristics of the good and bad stories are discussed and some general comments are made. The interview model explained in this book is an effective tool for analyzing a teaching program. Descriptors—*Educational Policy, Handicapped, *Needs Assessment, *Physically Handicapped, Policy, Rehabilitation Counseling, *Research Needs, *Technology
This report of the Committee on National Needs for the Rehabilitation of the Physically Handicapped focuses on the current problems in the field, the areas in which additional knowledge is needed, and directions in which the society and government should move both with respect to the acquisition of knowledge and a more effective organization of effort. Listed among recommendations is that for major areas of disability. A comprehensive national overview should be developed outlining in full its demography, national cost, and related social and organizational structure. Rehabilitation is discussed in terms of the medical and social framework,

demography, organizations and programs, the policy picture, and economics. A section on the state of the art in science and technology and their application covers research and development, blindness and low vision, hearing and speech, manipulation and locomotion, and basic neuroscience and rehabilitation. The question of whether the United States' measurement system should be changed is still unresolved. This General Accounting Office (GAO) report provides information on metrication and the issues involved. The results of GAO's work is summarized in an Executive Summary. The report contains recommendations to the United States Metric Board and the Office of Management and Budget to help implement current national policy in accordance with the 1975 Act and its legislative history. The report also contains a number of recommendations regarding other specific measurement activities. (MP)

EDRS Price - MF01/PC07 Plus Postage.
Descriptors—*College Mathematics, Higher Education, *Instruction, *Peer Teaching, *Training, *Tutorial Programs, *Tutors
This mathematics peer-tutoring program offers students an opportunity to seek help with specific mathematical difficulties from peer-tutors. The program is designed to free faculty to offer outside-of-class help to students who are experiencing extreme difficulty in understanding concepts. In addition, the tutors are available to offer help during the evening when faculty are not usually available. The training program is designed to train tutors to use procedures which take advantage of the unique tutor-tutee relationship. The program emphasizes the establishment of an atmosphere to promote learning and a teaching strategy that concentrates on student involvement. (MP)

Byers, William S.
A Comparative Study of Proficiencies Utilized by Electrical Engineering Graduates of the University of Alabama and the Core Curricula in Electrical Engineering and Electrical Engineering Technology.
Pub Date—76
Note—137p.; Major Applied Research Project submitted in partial fulfillment of the requirements for the degree of Doctor of Education, Nova University
Pub Type— Reports - Research (143)
EDRS Price - MF01/PC06 Plus Postage.
Descriptors—*Curriculum Evaluation, *Educational Philosophy, Educational Research, *Engineering Education, *Engineering Technology, Engineers, *Mathematics, Science Education
Identifiers—Research Reports
A survey of 531 electrical engineering graduates of the University of Alabama who had received bachelor's degrees in the years 1950 through 1974 showed that the educational needs of a majority of the respondents could have been adequately served by the mathematics levels present in the engineering technology program. In addition, certain subjects not required in the engineering curriculum but included in the engineering technology program were considered extremely important by the practitioners. Thus, it appears that the philosophy of engineering technology education, with its reduced emphasis upon mathematics and its orientation to practice, might indeed be more appropriate for a major portion of positions now classified as engineering rather than engineering technology. (BB)

Classroom Aids for Mathematics, Volume 1: Polynomials.
Eastern Washington State Coll., Cheney.
Pub Date—[78]
Note—23p.
Pub Type— Guides - Classroom - Learner (051)
EDRS Price - MF01/PC01 Plus Postage.
Descriptors—*College Mathematics, *Graphs, Higher Education, *Instruction, *Instructional Materials, Mathematics, *Problem Sets, *Transparencies
Identifiers—*Polynomials
The goal of this pamphlet is to provide instructors of various scientific disciplines with mathematically accurate graphs of elementary polynomial functions. The figures in this pamphlet are intended to provide suitable material for the preparation of classroom handouts and overhead transparencies. In addition, sample sets of exercises are provided for each figure. Grid lines are provided on all graphs for convenience in working with problems related to translation of axes. Each graph has the same scaling on the X and Y axes to make it easier to interpret the slope of any curve. (MP)

This review presents a broad picture of science education research during 1977 and discusses how this research relates to the past and how it can be of use to teachers. The review is organized in four sections. The Overview is a presentation and discussion of research dealing with the philosophy of science education, its goals, objectives and priorities, and research related to the status of the science education research enterprise. The second part, Ex Post Facto and Survey Research, includes studies which attempt to explain a phenomenon that had already occurred and surveys about the characteristics of students, teachers, or others. The third part, Experimental Research, focuses on those studies reported in 1977 which evaluated the effect of some variable, such as a specific curriculum or method of teaching, on students or teachers. And the fourth part links the major findings in 1977 with trends and issues of the past five years of research in science education. (Author/BB)

Descriptors—*Activity Units, *Conservation Education, Elementary Education, *Elementary School Science, Energy, *Energy Conservation, Environmental Education, *Instructional Materials, Science Activities, Science Education

This curriculum guide is composed of three units. Each unit has three chapters, and each chapter has six lessons. The objectives of the course are to develop an awareness of and information about energy conservation, as well as to improve inquiry skills and participation habits. Each set of lessons covers the full range of objectives in the course. The first unit is for grades K-1. The second unit is primarily for second and third graders, and includes lessons about physical and human resources involved in the energy problem. The third unit, for grades 4-6, explores ways in which people are facing the energy problem and actions they are taking. This unit requires the students to undertake a major project of their own about the conservation and use of energy. (BB)

Descriptors—*Budgets, Cost Indexes, Energy, Environment, *Expenditures, *Federal Aid, Federal Programs, Government Role, National Defense, *Research, *Scientific Enterprise, Social Problems, Space Sciences

Federal funds continue to underwrite about 50 of the national research and development (R&D) enterprise, and the nature of this support continues to be of special interest to policymakers. This report provides data on trends within functional areas and noteworthy shifts among areas. It is based on an annual National Science Foundation survey. Federal R&D priorities, identified in order of financial expenditures are: (1) national defense; (2) space; (3) health; (4) energy; (5) environment; (6) science and technology base; (7) transportation and communication; (8) natural resources; (9) agriculture; (10) social services; (11) education; (12) housing; (13) economics; (14) international cooperation; and (15) crime prevention. The 1979 federal budget presented in January 1978 reflected greater austerity in regard to R&D programs than did the three previous ones in which overall R&D growth exceeded inflation each year. R&D programs emphasized were those that met direct federal needs, general social and economic needs, or the need to accelerate private R&D efforts because of overriding national

interest. (BB)

Probability of Success in College Chemistry.
Pub Date—78
Note—10p.; Paper presented at the Meeting of the Tennessee Academy of Science (Lambeth College, Jackson, Tennessee, November 17, 1978)
Pub Type— Reports - Research (143) — Speeches/-Meeting Papers (150)
EDRS Price - MF01/PC01 Plus Postage.
Descriptors—Achievement Tests, *Chemistry, *College Science, Educational Research, *Grade Prediction, Grades (Scholastic), Higher Education, *Predictive Ability (Testing), Science Education, *Testing

The following 8 variables were tested as predictors of success of students enrolled in freshman chemistry at Tennessee Technological University: (1) ACT subtest in natural science; (2) ACT subtest in mathematics; (3) ACT composite scores; (4) final course grade in high school chemistry; (5) final course grade in high school physics; (6) high school grade point average; (7) final course grades in high school algebra II; and (8) final course grades in high school senior mathematics. Data were obtained on 138 students enrolled in Chemistry 111 (mostly engineering, chemistry and pre-professional majors). The single best predictor of success was the ACT composite score. Students with an ACT composite score below 22 had a high probability of failure. In addition, students who made less than a B in high school chemistry had a poor rate of success. (BB)

Fletcher, Richard K., Jr.
Declining Enrollment in Physics: What Can We Do?
Pub Date—78
Note—10p.; Paper presented at the Annual Meeting of the Science Association of Tennessee (Cookeville, Tennessee, November 11, 1978)
Pub Type— Speeches/Meeting Papers (150) — Reports - Research (143)
EDRS Price - MF01/PC01 Plus Postage.
Descriptors—*Curriculum Evaluation, Curriculum Problems, *Declining Enrollment, Educational Research, *Mathematics, *Physics, Science Education, Secondary Education, *Secondary School Science

Reports regarding enrollment in high school physics show that the number of students enrolled in physics increased until the late 1960's but the percentage enrollment in high school physics has dropped almost continuously. Some reasons for this are that physics courses are generally thought of as college preparatory curriculum and are sometimes directed at the few students who are interested in a college program in one of the sciences. Students enrolled in high school physics come from the upper portion of their classes. In addition, many of our practices and ideas suggest that physics is only for the elite. A physics curriculum, Project Physics, has been developed which does not rely as heavily on mathematics as do traditional courses and is suitable for sophomores. It is suggested that introduction of a course such as Project Physics for students who do not have the mathematical aptitude or are not interested in a career in science would be useful as an alternative to the traditional approach. Identifiers—Information Analysis Products

Presented here are 27 case studies of public involvement in environmental policy. These are examples of environmental education or communications programs developed by local, state, regional or national environmental action groups. The reports tell how the groups have successfully, or unsuccessfully, mobilized public opinion in favor of beneficent land use of recycling of wastes, or against a potential plant site in favor of pollution control legislation, or towards incorporating environmental studies more effectively in school curricula. Reported are the results of a survey on preservice elementary mathematics teacher education programs in Canada conducted by the Commission on the Education of Teachers of Mathematics of the National Council of Teachers of Mathematics. The Commission surveyed 22 teacher education institutions to ascertain the status of preservice programs. The document contains the survey instrument and reports the frequency of each response on each item. The survey instrument has seven major categories: (1) admission; (2) elementary mathematics major; (3) mathematics content preparation; (4) mathematics teaching methods preparation; (5) other professional education courses; (6) practicum/field experiences; and (7) general information. City Univ. of New York, N.Y. Inst. for Research and Development in Occupational Education.
Spons Agency—National Science Foundation, Washington, D.C. Directorate for Science Education.
Report No.—CASE-33-78
Pub Date—Dec 78
Grant—NSF-SMI-77-04700
Note—107p.; Contains occasional light type
Pub Type— Reports - Descriptive (141)
EDRS Price - MF01/PC05 Plus Postage.
Descriptors—Career Choice, *Career Education, *Females, *Occupational Guidance, Occupational Information, *Science Careers, Science Education, *Womens Education, Working Women
The science career workshop was targeted at freshman and sophomore women enrolled in public and private two- and four-year colleges and universities in the New York City area. The central theme of the workshop was that career choice represents a significant personal decision and needs to be based on sound information about the self, the external world, and their interrelationships. Relying on women scientists as panelists and session leaders, the workshop exposed students to career and lifestyle options and information about the interests, skills, abilities, and background preparation generally required for scientific careers. This report describes the activities that led up to the workshop, the workshop components and participant assessment of them, and the results and recommendations for the future. (Author/BB)

Contained in this publication is the final report of a panel of experts, convened by the Assistant Director for Science Education of the National Science Foundation, interested in science education for early adolescence. The document also contains three appendices. Appendix A lists members of the panel and their professional affiliation. Appendix B consists of the position papers by the panelists: (1) The Young Adolescent: Informal Learning and the Science Curriculum by Robert D. Barr; (2) Perspectives (Research) and Recommendations for the Science Education Directorate by Diana Baumrind; (3) Early Adolescence and the Science Curriculum by Paul DeHart Hurd; (4) Social Science Education of the Early Adolescent by O. L. Davis; (5) Perceptions (School) Relating to the Education of Adolescents by Fred D. Johnson; (6) Perspectives (Societal) and Recommendations for the Science Education Directorate by Joan S. Lipsitz; (7) Career Education by Barbara Preli; and (8) Strengthening Mathematics Programs for Early Adolescents by Eugene P. Smith. Appendix C presents a literature review of early adolescence and implications for programming. This review consists of three parts: I, The Early Adolescent Learner; II, The Learning Context; and Summary. A 19-page listing of references concludes the review. (PEB)

Available from—National Assessment of Educational Progress, Suite 700, 1860 Lincoln St., Denver, Colorado 80295 ($10.60)
Pub Type— Reports - Research (143)

EDRS Price - MF01/PC04 Plus Postage.
Descriptors—*Achievement, Adults, *Age Groups, *Educational Assessment, Educational Research, Elementary Secondary Education, *National Surveys, *Science Education, Scientific Enterprise
Identifiers—National Assessment of Educational Progress
This technical summary describes the changes in science performance on exercises included in both the first and second science assessments and on exercises included in both the second and third science assessments conducted by the National Assessment of Educational Progress (NAEP). Using the same exercises for adjacent assessments, with some exercises common to all three, National Assessment was able to measure improvements and declines in achievement between 1969-70 and 1976-77. Each assessment utilized a deeply stratified, multistage probability sample design and a professional data collection staff. To the extent possible, administration conditions were kept constant across assessments. The document contains a brief introduction and four chapters: chapter 1 contains background information about the project, chapter 2 presents national results by age levels (9 years, 13 years, 17 years), chapter 3 reports group results for 9-, 13- and 17-year olds, and chapter 4 contains a discussion of the adult science assessments. Four appendices are included: (1) A-Technical Procedures: Sampling and Estimation of Standard Errors; (2) B-Estimated Population Proportions of Reporting Groups Based on National Assessment Samples, 1969-70, 1972-73, and 1975-76; (3) C-Changes in Procedures Between Assessments; and (4) D-Nonresponse in Assessment Samples. Identifiers—*Microcomputers, Research Reports
A Microcomputer-Implemented Design Aid and Simulator (MIDAS) has been developed and used as an interactive learning system by electrical engineering students at the freshman and sophomore level. Evaluation of the system indicates that a great potential exists in the area of dedicated, inexpensive, interactive learning systems. User acceptance has been very positive. The digital simulator provided insight into the capabilities which can be provided by a small microcomputer-based system, particularly by the incorporation of digital feedback. The sophisticated level of digital system complexity that can be simulated in MIDAS using less than 5k bytes of memory suggests that the activity could be extended to moderately complex problems in other fields. The Effects of the New Jersey Hunter Education Program and Selected Demographic Variables of Students on Knowledge and Attitude Scores About the Sport of Hunting. Final Research Report.
Spons Agency—Fish and Wildlife Service (Dept. of Interior), Washington, D.C.; New Jersey State Dept. of Environmental Protection, Trenton.
Pub Date—Jun 78
Note—69p.; Contains occasional light type
Pub Type— Reports - Research (143)
EDRS Price - MF01/PC03 Plus Postage.
Descriptors—*Accident Prevention, Attitudes, Educational Research, *Environmental Education, *Outdoor Education, *Recreation, *Safety, Wildlife Management
Identifiers—*Hunter Education
In order to assess the effect of a hunter education program on knowledge and attitudes toward hunting, students enrolled in the eight-hour New Jersey Hunter Education Course were administered the New Jersey Hunter Education Examination Number 4 and the Attitude Inventory for Hunters as a pretest and posttest. The hunter education course is required of all persons being issued a first hunting license. Eleven hunter education classes from eleven New Jersey countries participated in the study. The results were structured around the categories of demography, knowledge about hunting, attitudes about hunting, and correlations between knowledge and attitude scores. The findings were related to such variables as classes, age, sex, previous hunting licenses, hunters in the home, and magazines received. There was a significant correlation between both pretest and posttest knowledge and attitude scores. (BB)

Descriptors—Agriculture, Conservation (Environment), *Forestry, Management, Manufacturing, *Natural Resources, *Social Sciences, *Trees
Identifiers—*Forest Management, *Timber Management
Compiled is a selected bibliography of social sciences in forestry, including economic, historic, sociological, and business aspects. Five major inclusive categories are the following: social science applied to forestry at large, applied to forestry's productive agents, applied to forest production, applied to manufacturing, and applied to marketing, trade, and demand for forest output. Arranged alphabetically by author, each entry contains the source of information, place and date of publication, volume number, and number of pages. A brief description of each resource is given. Compilation sources include many periodical professional journals, "Forestry Abstract," "Dissertation Abstracts," the "USDA Bibliography of Agriculture," "FAO Documentation," and publication lists from the United States Forest Service experiment stations. Descriptors—Attitudes, Behavior, Behavioral Science Research, Comparative Analysis, Cultural Awareness, Females, Individual Development, Interaction, *Interaction Process Analysis, Males, *Role Perception, *Sex (Characteristics), *Sex Differences, *Sex Role, Sex Stereotypes, Sexuality, Socialization, Social Relations, Social Values
The paper explores sex-role determinants of interpersonal interaction and reviews various theories of equity in human interaction. Equity is interpreted as occurring in human interaction when all participants in a relationship receive equal outcomes relative to their inputs. The document is presented in four major sections. Section I reviews literature

dealing with reward behaviors. Findings from research studies indicate that males most often prefer allocating rewards on the basis of performance and that females prefer distributing rewards equally regardless of performance. Section II examines how sex-role socialization influences different responses by males and females to rewards. Section III discusses an experiment which tested competing hypotheses concerning reward allocation under conditions of inequity. Specifically, the experiment measured reward allocation patterns of 40 female college students and compared these patterns to the students' preferences for a feminine, masculine, or androgenous sex-role. Section IV presents findings including that women are increasingly adopting behaviors which have been traditionally considered as competitive and masculine. The conclusion is that although differential sex-role socialization of men and women accounts for different patterns of human interaction, sex differences reported in many previous studies may no longer hold true as traditional sex roles for men and women continue to change. Legends can be incorporated into elementary social studies curricula to help students understand how people transmitted history and culture from one generation to another before they learned to read and write. Taga the Great is a legend which helps explain the 16-feet high latte stones on the Mariana Islands, Tinian and Rota. According to legend, Taga was born on the island of Guam. Already in childhood, he exhibited supernatural powers such as the ability to uproot large trees and leap from one Pacific island to another. When Taga grew up and became chief of Rota, he engaged in and won numerous contests of wit and strength with other chiefs. Taga's fame spread throughout the Mariana islands and caused him to be the envy of all people, including his own children. To build a house great enough to please him, Taga quarried and carved very big stones and formed large pillars which he covered with wood and thatch. The house was very fine and admired by all who saw it. Taga's downfall began, however, as soon as his house was completed. His pride in his own superior strength prompted him to murder his little son, and his other children died soon afterwards out of remorse. As each child died, a pillar of Taga's home fell down. Soon only one pillar remained as a witness to Taga's glory. From the legend of Taga, students can gain insight into human strengths and weaknesses as well as into how the big latte stones of Rota and Tinian came into existence. (DB)

Descriptors—Behavioral Objectives, Citizen Participation, Citizen Role, *Citizenship, Citizenship Responsibility, *Curriculum, *Definitions, Democratic Values, *Educational Objectives, *Educational Principles, *Educational Responsibility, Elementary Secondary Education, Experiential Learning, Institutional Role, Skill Development, Social Studies, Student Attitudes
A definition of Citizenship (CE) should include: (1) a general statement which focuses on the CE domain, (2) a statement of underlying principles, (3) a list of included content areas, (4) specification of learner outcomes, (5) a list of instructional modes, and (6) a description of the kinds of institutions included in the CE movement. Citizenship Education is "an educational effort which seeks to teach all citizens the knowledge, skills, and behaviors which will dispose and enable them to participate effectively in a democratic society in a manner which contributes to the common welfare and is personally satisfying." CE related programs or disciplines include community, economic, energy, environmental, law-related, values, and multicultural education; interpersonal skills; the social sciences; and political-participation training. Learner outcomes are formulated according to knowledge, skills, and attitudes gained. Knowledge of institutions and of major issues past and present is necessary. Inquiry, interpersonal, and action skills as well as attitudes of commitment and respect should be developed. Modes of instruction extend beyond the traditional to parental and community involvement and use of the media. CE programs will be more successful if they consider the institutional climate and interpersonal relationships, and if they involve institutions such as government, business, labor, religious organizations, and youth service groups. Descriptors—*American Government (Course), Citizenship, Civics, *Curriculum Development, *Curriculum Problems, Educational Needs, Educational Problems, Policy Formation, Political Issues, Political Power, Political Science, *Politics, *Public Policy, Secondary Education, Social Studies, *State Government
These seven papers address problems of teaching about state government and politics at the secondary level and provide a framework and suggestions for improving the curriculum. The first paper analyzes the current civics curriculum and notes that textbooks underemphasize state government and overemphasize the structure and the formal procedures of government. This overemphasis excludes discussions of process and interaction within state government. The second paper, written by a state legislator, also notes that the experience of politics is missing from the high school curriculum and outlines the way in which the political "game" is played. Papers three through six present a four-stage model of public policy development which describes initiation of policy demands, enactment of public policy by the legislative and executive branches, implementation of public policy, and assessment of policy outcomes. The final paper presents suggestions for developing curriculum materials based on the above analytical framework. (Author/KC)

Design Considerations for Classroom Research.
Pub Date—23 Nov 78
Note—15p.; Paper prepared for Annual Meeting of the National Council for the Social Studies (Houston, Texas, November 23, 1978)
Pub Type— Speeches/Meeting Papers (150) — Reports - Evaluative (142) — Guides - Classroom - Teacher (052)
EDRS Price - MF01/PC01 Plus Postage.
Descriptors—Classroom Research, Data Analysis, Decision Making, Educational Improvement, Educational Objectives, *Educational Research, Elementary Secondary Education, Information Needs, Predictor Variables, *Research Design, Research Methodology, Research Needs, *Research Utilization, Statistical Analysis, *Teacher Role
Classroom teachers need to make sound judgments and decisions concerning curricular and instructional issues. The teachers who wish to become more effective in the classroom should learn to develop their own research designs since educational research reported in journals is often inconclusive, conflicting, or not relevant to the classroom teachers. Experimental studies can be particularly helpful to teachers if they investigate the effects of variables such as textbooks, tests, and homework assignments on one or more other variables such as student knowledge, student attitudes, and length of time required to complete a test or homework assignment. Factors to be considered when designing an experimental study include experimental validity (comparing and contrasting results with results from a control group or situation), internal validity (extent to which the observed effect appears to be due to one's experimentation), and external validity (determination of persons and circumstances to which the results apply). The conclusion is that teachers can do valid classroom research if they combine simple descriptive statistics with common sense and exercise care in maintaining experimental validity when they gather information. This four part guide provides secondary students with information about Maryland laws, courts, and legal system. The first section examines the nature and causes of increasing involvement of youth in crime, and identifies those crimes most commonly committed by juveniles. A special section on shoplifting is included. Section II examines the nature of the police force, procedures followed by the police and the constitutional limits of police power. Students are directed to analyze television crime drama, answer a self-rated quiz, "Would You Make a Good Police Officer?" and conduct fingerprint tests. In section III students are asked to compare juvenile court with adult court and consider the effectiveness of the juvenile system. In one activity students role play police officers and decide appropriate action for hypothetical juvenile cases. In section IV the types, purposes and impact of correctional facilities upon youth and the family are analyzed. All sections stress the gathering and interpretation of information and statistical data. Suggestions for field trips, resource speakers, simulations, films and books are included. Student resource sheets and pre- and posttests are provided. (KC)

United States History

The history of American education is incomplete. This problem is the result of (1) historical scholars being influenced more by concerns of their own time than by issues of the past, (2) the belief that what is written and said about education is an acceptable representation of what education is, (3) the assumption that educational leaders are spokesmen for the entire educational enterprise, and (4) the presumption that the history of education is solely the history of how education has been imparted. These misconceptions have led educational historiographers to largely ignore accounts of students, parents, and teachers throughout the history of American education. Experiences of the silent majority, or common individuals, should be researched to provide a more complete perspective. Sources of such information include diaries, personal letters, personal papers, and slave narratives. However, this approach presents problems because personal literature is vast, difficult to locate and work with, and may contain bias. Nevertheless, historical research on education should consult these sources in order to identify patterns to be explored through statistical analysis and to help interpret relationships that appear in the statistical data of current research. Identifiers—*National Catholic Education Association

This pamphlet traces the history of the National Catholic Education Association (NCEA) from its founding in 1904 through 1978. Section I, "Origin and Early Years, 1904-1920," explains that NCEA developed from the uniting of three separate Catholic educational organizations. Thomas J. Conaty, NCEA's first chief executive officer, established three small organizations to promote uniform standards of education at existing Catholic institutions of higher and secondary education. Section II, "Dimensions of Ministry, 1920-1944," explains how NCEA moved from an emphasis on preserving traditional scholastic liberal arts education to a cautious embracing of the more scientific progressive approach. This change was most apparent at the elementary level. Section III, "The Hochwalt Years, 1944-1966," reviews growth in NCEA under the direction of Frederick G. Hochwalt. During this time NCEA became a strong, active organization with membership from almost every Catholic educational institution in the United States. NCEA staff, membership, and income increased, and programs of research, membership services, and legislative involvement were initiated. Section IV, "The Post Vatican Era, 1966-1978," notes changes in NCEA membership, activities, and internal management. There is now an emphasis on cooperation with other private educational associations, compilation of national data needed for educational planning, and encouragement of parental involvement in educational decision-making. Identifiers—Ecuador Project

Letter and syllable dice devised for a project in rural Ecuador provide inexpensive, easily reproducible learning materials for practice in basic literary skills. Eleven wooden cubes with six letters on each cube are cast onto a surface and the player constructs words from the letters on the top side of the dice. After a word is formed and recorded, it may be taken apart to use the letters in forming another word. The player receives practice in assembling words from letters, and the observer gets exposure to words he doesn't know and reinforcement of words he vaguely knows. Both player and observers increase their spelling and vocabulary skills. Letter dice have been successfully used in community meetings, reform schools, and by Peace Corps members in English classes. Because syllable dice seem to be most effective in the early stages of literacy, they are used in the primary schools and in private tutoring sessions. In one approach the teacher draws a simple scene on the board and the students describe it by building words from the syllable dice. Attempts are presently in progress to adapt the dice to the native Quechua language. The author notes that although the materials have created interest, a satisfactory means of stematic evaluation has been difficult. The method of creating the dice and an illustration of the letter distribution are provided. (KC)

Identifiers—Ecuador Project

Designed for use in rural Ecuador, addition and multiplication bingo games which promote number recognition and fluency in arithmetic operations are described. These skills are necessary for successful transaction at the market place where rural Ecuadorians must be able to buy goods and make change. The leader calls out a mathematical problem and learners place a bean on the correct square of their board. The winner's results are checked by the rest of the class. It is possible to involve advance and lower-level learners in the same game by allowing advanced learners to shout out the answers which the slower learners look for on their boards. The author warns, however, that if slower learners dominate, the game quickly becomes boring for the advanced players. The games have proven popular and adaptations include community bingo games with prizes. Evaluation of this method of short term learning seems to indicate that when betting is allowed, measurable improvement in mathematics skills increases. The design of both the addition and multiplication games is included. (KC)

Identifiers—Ecuador Project

The effects of using cassette-tape recordings for programming in a rural radio school program in Ecuador were examined. Radio schools broadcasted five afternoons a week and offered a primary school equivalency certificate at the completion of the course. Students were under the direction of an "Auxiliar" who followed the directions of the broadcaster. The project provided cassette recorders to the auxiliaries. The goals of allowing the free use of tape recorders by radio school participants were to achieve heightened feelings of self-worth, increased community development-related knowledge, and improved numeracy and literacy skills. Auxiliaries were provided minimal training in technical and interviewing skills. Cassette recorders were distributed and tapes returned to the radio station for broadcasting. Programs included a planning meeting for a community work project, music, a discussion of "Indian Power," and new readers practicing their skills. As a means of evaluation, questionnaires which covered literacy skills and questions of self-worth and community development were administered before the recorders were used and again six months after they had been in use. Results from the questionnaire plus tangible evidence of progress indicated that the recorders are effective instruments in raising self-esteem and increasing knowledge. (KC)

Identifiers—Ecuador Project

This paper describes the concept, training, and experiences of community facilitators as change agents in a nonformal education project in rural Ecuador. Presently, the social, economic, and political context of the rural Ecuadorian consists of poverty, racial prejudice, economic exploitation, and psychological dependency. The project attempted to address these imbalances by initiating a change process through the development of self-determination and education. Activities such as literacy, cooperative theory, and agricultural techniques were conceived as steps leading to social participation. Twenty-six communities were selected. Characteristics of facilitators included a moderate level of literacy, willingness, residence in the community, and acceptance by the majority of the community. Following training by the project staff, facilitators then trained second and third "generation" facilitators. Group sessions consisted of trust building, negotiation of community goals and objectives, team building, and problem identification and solving. Project games and literacy and numeracy teaching methodologies were also introduced. Problems encountered were based on community suspicion

that the project was either communist or evangelist. The author stresses that the facilitator concept is one that cannot be discussed in terms of specific and pre-determined characteristics; it is not a pre-packaged training component, but depends on the qualities of a given community. (KC)

To help high school students learn first-hand about county and local government, educators in New York state developed a community internship program. The program stressed frequent discussions between students and officials to review meetings they had attended and to assess student progress on journals of local government activities, community study projects, and seminars with other interns. Teachers and/or representatives from agencies sponsoring internship programs began by contacting potential advisory committee members and local public officials. Advisory committee members then coordinated organizational matters such as scheduling internship activities, arranging release time, determining program costs, working with schools, obtaining formal approval, selecting students, arranging credit, and planning orientation sessions. Orientation sessions concentrated on background information about the county or municipality and program requirements and responsibilities. Projects on which interns worked included conducting research on current issues, polling constituents, responding to public questions and requests, and writing a constituent newsletter. Feedback from interns who participated in the program indicated that students became better informed about the workings of local government, enjoyed working directly with public officials, and gained exposure to career possibilities in local government. Descriptors—Age Groups, *Citizenship, Data Analysis, *Educational Assessment, *Educational Change, Educational Research, Elementary Secondary Education, Knowledge Level, Measurement Techniques, National Surveys, Skill Development, *Social Studies, Statistical Analysis, Student Attitudes, Student Characteristics, Tables (Data)

This report summarizes changes in student performance in the areas of citizenship and social studies, as measured by the National Assessment of Educational Progress. An initial assessment of citizenship was conducted in 1969-70, and an initial assessment of social studies was conducted in 1971-72. Both areas were reassessed in 1975-76. Because citizenship and social studies cover many similar topics, changes in performance in the two areas are reported here in terms of clusters of exercises covering areas such as political knowledge/attitudes and social studies knowledge/skills. Chapter I reviews development of the citizenship and social studies exercises, and describes procedures used to sample, administer, score, and analyze the exercises. Chapter II summarizes changes in mean percentages of acceptable responses for each age group for each of the major reporting categories and subcategories (i.e., social studies knowledge in economics, history, or political science). Chapter III describes changes in performance for student subpopulations based on factors such as geographic region, socioeconomic status, and sex. It also contains tables summarizing average performance of each group on different clusters of exercises. Appendices present additional data on technical and administrative procedures and nonresponse in assessment samples. (Author/AV)

Descriptors—Black Power, *Blacks, *Civil Rights, Civil Rights Legislation, Court Cases, Court Role, Curriculum Development, Elementary Secondary Education, Equal Education, Equal Facilities, Equal Opportunities (Jobs), Futures (of Society), *Instructional Materials, Minority Groups, Racial Integration, *United States History, Voting Rights

The unit provides an historical overview of black Americans' struggle for civil rights and explores current legislation and court decisions about civil rights. Among its objectives are to view the black American struggle for equality in the context of American history, highlight the major civil rights organizations in the black American struggle, and note possible future directions of the civil rights movement. One major section, written in narrative style, traces the struggle for civil rights from Colonial times through the Civil War, abolition of slavery, World Wars I and II, court decisions in the 1950s, the Black Muslim movement, and Civil Rights Acts of 1957, 1964, and 1968. Another major section discusses court decisions concerning busing and racial integration in schools, availability of social services, discrimination in admission to institutions of higher education, and union membership. Analysis of the opinions of several contemporary writers shows that the courts have promoted greater equality of opportunity but that much more remains to be accomplished. Concluding sections present 38 activities and questions based on the previous sections, a list of 23 films, and a selected bibliography of over 50 books and articles. (AV)

Descriptors—*Career Development, *Clinical Experience, *Field Experience Programs, Higher Education, Job Training, Practicums, Practicum Supervision, Program Content, *Program Evaluation, *Psychology, Relevance (Education), School Community Cooperation, Student Experience, Undergraduate Students, Undergraduate Study

This paper describes an undergraduate training program for psychology students in the clinical, technical aspects of psychology. The program is designed to prepare students for work under the supervision of doctoral-level psychologists without having to obtain graduate degrees in clinical psychology. The program was developed in 1971 by Georgia College staff when it was noticed that many of their psychology graduates were working as psychology technicians at a nearby state mental institution. It was felt that the program would heighten the relevance of the graduates' academic background. All psychology majors at Georgia College are required to take statistics in addition to general and experimental psychology. In addition to these, students in the technician training program must take courses in applied and abnormal psychology, testing, personality theory, learning, learning theory, and one quarter of supervised field experience. Evaluation of the program after five years indicates success in the increased employability of graduates and improved relations between the college and area agencies and institutions. Graduates of the program have been employed by the local mental institution and also as employment counselors, parole agents, and corrections and rehabilitation counselors. Problems of the program include uneven quality of supervision in the students' field experiences and dissatisfaction of graduates who discover that their jobs dead end after a few years without additional academic degrees. Although the American political system is characterized by commitment to democracy and self-determination, the American government has traditionally taken an interest in the political development of other countries. The recent intervention of the U.S. in the political development of Southwest Africa/Namibia is an example. In the body of this paper the author reviews in detail the history of political domination by certain groups over other groups, as demonstrated by (1) the development of France as a nation from a territorial stage, (2) Ian Smith's transitional government in Rhodesia, (3) struggles among tribal groups for political control or identity in Zambia, Tanzania, Kenya, and Uganda, and (4) tension between ethnic groups in Guyana, Trinidad-Tobago, Malaysia, and Sri Lanka. The author concludes that the political needs of multi-ethnic countries cannot be fulfilled by unitary territorial democracy or by territorial federalism. Each group must be able to organize politically and to administer its own affairs with an equitable share of public resources. Where nationalities are intermingled, the principle of personal autonomy should be invoked, enabling the organs of each nationality to provide education, cultural facilities, and other services. In this way, political socialization can build on traditional social groups instead of destroying them. (Author/AV)

Alexander, Robert J.

State Consumer Education Policy Manual.

Education Commission of the States, Denver, Colo.

Spons Agency—Bureau of Occupational and Adult Education (DHEW/OE), Washington, D.C. Office of Consumers' Education.

Pub Date—Jan 79

Grant—G007703050

Note—129p.; Policy statements may not reproduce clearly due to small and broken type of original document

Pub Type— Reports - Research (143)

EDRS Price - MF01/PC06 Plus Postage.

Descriptors—Board of Education Policy, *Comparative Analysis, Consumer Economics, *Consumer Education, Curriculum, Data Analysis, Educational Assessment, *Educational Policy, Elementary Secondary Education, Instructional Design, National Surveys, Performance Criteria, Policy, Program Content, School Policy, *State Programs, State Surveys, Tables (Data)

This manual is a compilation of state policies in

consumer education. It is based on a national survey, conducted in 1978 by the Education Commission of the States (ECS), of the 50 states and Washington, D.C. Intended for use by policymakers, administrators, curriculum specialists, and consumer educators, the manual defines consumer education as including consumer decision-making, economics, personal finance, and consumers' rights and responsibilities. Section I provides a comparative overview of each state's policy. Presented in chart format, the data include whether the state has a policy; year of adoption; who developed the policy (i.e., legislature, state board of education); type of policy; specific requirements at state, local, and student levels; instructional format required; and program content required. Section II presents each state's policy. Information is given on source and adoption of each policy, exact wording of the policy as furnished by each state to ECS, and comments about related activities that go beyond the specifications of the existing policy. In section III state-level policies and programs have been combined to provide an analysis of each state education agency's activities. For each state, tabular data indicate program content areas, types of students who receive instruction, program structure, availability of performance studies, and relationship of the consumer education program to existing basic competencies programs. Section IV lists resource materials and personnel for consumer education in each state. (AV)

This book, the sixth in a series of longitudinal studies initiated by the Youth in Transition Project, examines change and stability and educational and occupational attainments of young men. During the eight year study, nationally representative samples of over 2,000 young men were surveyed and their experiences from 10th grade through five years beyond high school graduation were traced. Objectives were to: (1) explore effects of dropping out of high school by comparing occupational attainments of dropouts with those of graduates, (2) determine the degree to which 10th grade measures can predict educational and occupational attainments, (3) assess the role of educational attainment as compared with the role of family background and intellectual ability, and (4) determine the impacts of post-high school experiences and environments on values, attitudes, and behaviors. The first portion of the book emphasizes factors which precede and/or contribute to educational and occupational attainment. Tenth grade measures of background, ability, educational experiences, occupational outcomes, and job satisfaction are examined. The second portion examines change and stability through a variety of dimensions measured repeatedly from 1966 to 1974. Changes in self-esteem, motives, affective states, values, and views on social issues are analyzed. Results indicate that differences are present before exposure to different environments and experiences; individuals who are initially different tend to seek out different situations. A detailed summary of results and technical information about the research are included. (KC)

The Pinehurst Conference on Global Perspectives provided an opportunity to clarify many of the issues, objectives, and problems in global education programs in schools. The 34 conference participants included educators, federal government educational personnel, state departments of education representatives, and delegates from global and international education organizations. Among the issues discussed were objectives of education, role of global education in meeting educational objectives, relationship of global perspectives to domestic and international society, teaching and curriculum resources, community global study groups, contributions of foreign language and area studies to global perspectives, international educational exchange programs, global interdependence, and world problems. Conference speakers generally stressed that global interdependence should be included in the curriculum and that educators will be more effective in developing and implementing global education programs if they are committed to a global perspective. Descriptors—Art Activities, Auditory Perception, Career Education, *Cognitive Processes, Concept Formation, Creative Thinking, Critical Thinking, Dance, Drama, Elementary Education, *Fine Arts, Health Education, *Interdisciplinary Approach, Language Arts, Logical Thinking, Mathematics, Music, *Perceptual Development, *Personal Growth, Physical Education, Reading, Sciences, Self Actualization, Social Development, Social Studies, *Teaching Methods, Visualization

These 28 interdisciplinary learning activities for elementary children are designed to provide perceptual, cognitive, and personal-social growth experiences. Subject areas included are art, dance, language arts, math, music, science, career education, health, physical education, reading, and social studies. The teaching strategies, which provide teachers with several means of measuring student growth, are designed to demonstrate the interrelatedness of all learning. Each sheet is coded according to its relevance to several areas of the curriculum and to the skills emphasized. The purpose, procedure, and required materials are listed. For example, an activity which encompasses the fields of music and science consists of identifying musical instruments by their sounds or of duplicating sound patterns. The purpose of the activity is to develop auditory discrimination, memory, imagery, and sequencing skills. Other activities include listening to and recreating the motion of popping corn, body language exercises, creative writing from photographs, story improvisation, and the recognition of feelings and moods through movement. The document presents guidelines to help art educators in elementary and secondary schools develop and implement art education programs. The guidelines were developed by Nebraska educators along lines suggested by the National Art Education Association. Major objectives are to help students develop personal expression, qualitative aesthetic judgments, cultural understandings, and visual discrimination. The document is presented in five chapters. Chapter I, designed for school administrators, presents information on the role of the board of education, principal, art supervisor, and art teacher in various types of art programs. Chapter II focuses on elementary school art programs. Information is presented on objectives, creativity, art projects for various grade levels, teacher role, evaluating student progress, and using instructional television. Chapter III discusses junior high school art programs. Topics discussed include objectives, materials, equipment, scheduling, art shows, and course credit. Chapter IV discusses secondary art programs and provides information on articulation of K-12 art programs. Students are involved in a variety of art activities at each grade level including drawing from different perspectives, describing and using basic art tools, learning about visual art heritage, and producing original art objects. The final chapter deals with budget considerations, uses of community and state resources, equipment purchasing, and additional resources relating to careers in arts and crafts. (DB)

Descriptors—*Codes of Ethics, Confidentiality, Educational Problems, Laboratory Experiments, Personal Values, Privacy, *Psychology, *Research Projects, Secondary Education, Social Sciences, Social Values, *Student Responsibility, *Teacher Responsibility

Approved by the American Psychological Association (APA), these guidelines are designed to help high school psychology teachers make decisions relating to ethical problems in their classrooms. The guidelines cover three areas: the use of animals in school science behavior projects, the use of human participants in research or demonstrations conducted by high school students, and ethical guidelines for teachers. Respect for animal life, knowledge of humane laws, and proper care and feeding of animals are stressed. Further, the use of invertebrates rather than vertebrates, and observation rather than experimental manipulation should be encouraged. Students are reminded that in order to use human participants, they must be supervised by a qualified school authority, that agreement must be obtained from all participants, that participants should not be exposed to mental or physical risks beyond the ordinary risks of daily life, and that anonymity of information should be preserved. Similar guidelines for teachers consider complex ethical issues resulting from the introduction of sensitive topics in class discussion and the questioning of personal and social values. The teacher's responsibility in the areas of personal and professional behavior and their obligations to students are emphasized. (KC)

Descriptors—Community Involvement, *Community Resources, Community Role, Community Study, Educational Needs, Educational Resources, Effective Teaching, Experiential Learning, *Field Experience Programs, *Inservice Programs, Local History, Local Issues, *Relevance (Education), *School Community Programs, Secondary Education, Social Studies, Student Needs

Interesting and stimulating instruction in high school social studies may be achieved by using the community and its institutions as a laboratory for learning and by creating an on-going community resource inservice program. Effective ways to incorporate community resources in the curriculum include creating special sections on developing writing skills in high school students by using community topics as subject matter, developing field-based experience packages for teachers and students, and developing curriculum materials and visual aids for classroom use. Possible activities include collecting oral histories, community mapping, charting urban growth, measuring community social mobility, using community archives, and researching local history. Such activities would enable students to meet the objectives formulated by the National Assessment of Educational Progress (NAEP) for social studies as they (1) evidence interest in their communities; (2) obtain information from other people, libraries, maps, and pictures; and (3) understand some of the services and institutions in their communities. Economic education can help elementary and secondary school students understand the dynamics of the American free enterprise system and the relationships among consumer, producer, and government. The economic education curriculum will help students most if it is structured as an upward spiral in which basic economic concepts are built upon and expanded at each grade level. Elements of modern learning theories which are particularly applicable to the economic education curriculum include reinforcement, meaningful internal structure of content, an interdisciplinary approach, and a high degree of student participation. The content of economic education should include basic economic concepts such as needs, resources, consumption, distribution, demand, supply, money, and banking; the relationship of economics and society; consumer education; and personal economic management. A resource unit is a particularly effective method of teaching economic education because it can integrate basic economic concepts with learning activities and objectives that are appropriate for each grade level. Teacher education and in-service workshops will be more helpful to teachers if they include practical as well as theoretical economic content. The conclusion is that educators should accept the responsibility of helping students become informed on economic issues. (DB)

This document, the result of the Youth in Transition longitudinal study, describes procedures, rationale, and major results of an evaluation of American high schools. The purpose of the study was to examine factors that make some schools superior to others. A "good" school is defined as one which has a greater than average desirable impact on its students and a lower than average undesirable one. Over 1300 young men from 87 high schools provided data for the study by answering questionnaires. The approach was to consider all school characteristics that might make a difference for students. The data, consolidated and reduced from some 1600 to 32 variables, were categorized under headings of knowledge and achievement, behaviors, plans, attitudes and values, affective states, motives, aptitudes, abilities, and school reputation. Separate chapters of this document describe the present state of knowledge in the field, the research design, concept and instrument development, major data collections, and descriptive information on American high schools. Findings indicate that high schools have virtually no differential impact on student development. The author suggests a major social experiment in which diverse forms of education are created. Suggestions to change the organizational structures of formalized schooling are also presented. Appendices include ten questionnaires and student interviews. (KC)

A Materialist Theory of Women's Status.
Pub Date—[78]
Note—30p.
Pub Type— Opinion Papers (120)
EDRS Price - MF01/PC02 Plus Postage.
Descriptors—*Capitalism, Change Agents, *Change Strategies, Changing Attitudes, Child Care, Child Rearing, *Cultural Factors, Family Structure, *Females, Feminism, Futures (of Society), Males, *Negative Attitudes, Parent Child Relationship, Power Structure, Productivity, Psychological Patterns, Reproduction (Biology), Sex Role, Sex Stereotypes, *Social Factors, Socialization, Social Values

The paper examines three factors–reproduction, production, and psychodynamics–which contribute to maintaining an inferior image of women in a capitalistic society. It also offers suggestions for changing these social structures so that they will not relegate women to inferior social status. In a capitalistic society production is based on commodities, which are defined as objects which have exchange value in the market place. Although the position of women as nurturers is highly valued socially, women do not gain the esteem and power which comes from the world of commodities. Also, the social organization of capitalism reinforces the division between nurturance (female) and authority (male). In addition, the tasks of reproduction and socialization of children also divide women and men into tasks of nurturance and authority. This duality is then reflected in the work which women do outside the home. When women display behavior inappropriate to their roles as nurturing females, they threaten the central elements of social organization. Finally, psychodynamics, the interaction of one's biological and mental life, is also gender differentiated; we do not learn that we are a person with a variety of attributes, one of which is gender, but that we are either male or female. Thus, feminist demands must go beyond equal pay for equal work, equal opportunity, and affirmative action which do not address the psychological resistance to changes in women's status. Rather, a future must be structured in which feminist values are fully integrated into social relations and institutions. (Author/KC)

The Mid-America Program for Global Perspectives in Education (MAP) was developed to prepare global curriculum materials, hold conferences for teachers, cooperate with other educational agencies, and help educational programs adjust to realities of a fast-changing world. Initiated in 1974 with a grant from the Lilly Foundation to the Social Studies Development Center (SSDC) at Indiana University, MAP focused on promoting global education in Illinois, Indiana, Kentucky, Michigan, and Ohio. Initial activities included a survey of social studies teachers' needs, preparation of a directory of resource personnel, and planning meetings with key individuals in each of the five states. Special efforts were made to work with the people in charge of social studies programs at the state level. MAP's activities from January 1975 through December 1978 include data collection and dissemination, distribution of a statement of MAP's purpose, improved communications through newsletters, development of teaching units, publication of papers aimed at clarifying goals of global education, attendance at state, regional, and national conferences, and publication of a resource bibliography. An evaluation performed by the Indiana Center for Evaluation in January 1978 found that MAP's activities and leadership were generally well regarded, but there was some concern about MAP's ability to understand local communities' needs. This report traces the origins of the Mid-America Program for Global Perspectives in Education (MAP), describes its accomplishments, and assesses its impact. A summary of the report is provided in a related document (SO 011 596). This report comprises five chapters. Chapter I reviews conditions that made MAP necessary: growing global interdependence, significant growth in population and technology, and developments in educational programs in the early 1970s which emphasized study of other cultures, world affairs, and international edu-

cation. Chapter II describes origins of the MAP program, its goals and organizational setting, initial activities, contacts and linkages, joint ventures at state and national levels, reciprocal affiliations between MAP and other organizations, MAP's teacher associates program, work with graduate students, communication network. Chapter III provides a chronological view of MAP activities in each of five states (Indiana, Illinois, Michigan, Kentucky, and Ohio) during the years 1975-78. Chapter IV reviews and summarizes a self-evaluation of MAP performed in 1978. Chapter V is a summary of an outside evaluation of MAP conducted in January 1978 by the Indiana Center for Evaluation. Appendices list major MAP publications and identify requests for MAP materials by individual states and foreign countries. (AV)

Descriptors—Art Education, *Art Teachers, Educational Problems, Educational Research, Elementary Secondary Education, *Individual Characteristics, Public School Teachers, Questionnaires, *Teacher Attitudes, *Teacher Background, *Teacher Characteristics

One hundred and thirty-four certified public school art teachers in Louisiana responded to a questionnaire to gather data for a teacher profile which would describe the personal and educational characteristics and professional opinions of these teachers. Data indicate that the average public school art teacher in Louisiana is a married Caucasian American female between 25 and 40 whose salary ranges between $8,501 and $10,000. She holds a bachelor of arts degree with a minor in English or social studies, and either has or is working on a master's degree. She does not teach art privately nor has she had a formal art show of her own in the past year. She feels that her college courses adequately prepared her for teaching, but that the history of education and introductory education courses have been least beneficial. The five major subjects that she teaches are crafts, drawing, painting, printing, and sculpture. She does not teach art history because of lack of student response and inadequate facilities. Her major problems in teaching art are lack of resources, large classes, and the use of art class as a dumping ground. A copy of the questionnaire is provided. (Author/KC)

Descriptors—Beliefs, Curriculum Development, *Educational Objectives, Educational Philosophy, *Educational Research, Educational Theories, Elementary Secondary Education, Political Influences, Problem Solving, *Relationship, Research Needs, Research Problems, Social Change, Social Sciences, Social Studies, *Social Values, *Sociocultural Patterns, Socioeconomic Influences, Teaching Methods, Theories, *Values

To shed light on the social research perspectives which enable people to give coherence to daily events, educational researchers must continually scrutinize the social values and beliefs which underly their research. As social and cultural affairs are explained by the social sciences, so also are theories and methods influenced by social conflict. For example, social studies curriculum developers have recently responded to conflicts in society by developing values clarification, public issues, and citizenship education programs. Also, educators and scholars have concentrated on phenomena which they believed influenced the learning of minorities, including school practices, curriculum materials, community life, and poverty. Because the theories of social and educational research help define the political, social, and educational problems which will be emphasized, researchers must adopt a self-reflective and critical stance when choosing research topics. Further, they need to consider the social and political implications of educational analysis, examine ethical and moral premises upon which schools are founded, and allow for student values and beliefs when developing curriculum. This monograph focuses on the working class in Boston during 1775, the period just before the American Revolution. Seven sections describe Boston's geographical and political background; working conditions, employment, and controls; income by industry and occupation; standards of living; social life; mobility and the situation of minorities; and the role of the Boston worker in the Revolution. Boston of 1775 is described as a city of 16,000 with strong political tensions, little money, and many poor. England had retaliated for the Boston Tea Party by closing the Port of Boston and issuing the "Intolerable Acts." The faltering economy, brought about by a trade deficit with England, caused the apprenticeship system to deteriorate. By the eve of the Revolution, the unemployed and propertyless had increased enormously; the richest 25% held 78% of the assessed wealth. In general, laborers were badly paid; artisans and farmers earned somewhat more and became small property owners; professional men and shopkeepers had good incomes and merchants and lawyers were well-to-do. Debt was a recurrent problem and many debtors were sent to jail. The legal system provided a kind of equality for women who were seen as more versatile, active, and successful than their European counterparts. Finally, the Boston workers comprised the "ragtag army" which hounded the British in the early days of undeclared war, and benefited from the change that revolution produced. (Author/KC)

Descriptors—*Changing Attitudes, Course Objectives, *Economic Education, Economics, Elementary Secondary Education, *Feedback, *Inservice Teacher Education, Learning Characteristics, *Participant Satisfaction, Questionnaires, Seminars, Social Science Research, Test Results

This paper examines the effects of a ten-day seminar in economic education for elementary and secondary teachers in Texas. The course consisted of lecture-readings and of reviews and demonstrations of teaching materials in economics. In addition to teacher preparation, specific objectives of the seminar were to increase participants' economic understanding, interest in economics, and sophistication of economic opinions. Pre- and posttests in these areas were administered to the 41 educators who participated in the seminar. Results indicate that greater economic understanding was increased in the areas of the operation of competitive markets, the theory of the firm together with the operation of non-competitive markets, and governmental activity in the economy. Also, participants exhibited a tendency to move away from unsophisticated agreement with popular opinion concerning the economy to sophisticated disagreement. Finally, participants expressed increased interest in the field by ascertaining that the knowledge gained in the seminar was worth the cost. Items and participant responses to two questionnaires, the course outline, and a list of participants are included. (KC)

This paper describes a study to determine whether students can, with appropriate instructional materials, develop and apply a knowledge of art concepts. An opening section reviews research on concept acquisition. This study utilized a concept acquisition model developed in 1970 by R. Gagne. Gagne's model proposed that concepts are learned through a hierarchy of processes including verbal information and problem solving. For the study, curriculum materials were developed based on art concepts of drawing, form, space, composition, line, and proportion. Subjects were 70 seventh and eighth graders from two schools in Mississippi. The students were divided into four classes: the two control classes received normal art instruction and the two experimental classes received instruction supplemented with occasional classwork and discussion based on the specially-developed curriculum materials. A posttest for all four classes required students to write critiques of a drawing and a painting. The critiques were analyzed for correct use of concept terms, number of value terms ('good," "bad"), and length. Results indicated that students in both experimental groups used concept terms more frequently and more correctly, and they wrote longer critiques. (AV)

Results of a survey to determine student demand for religious studies content in introductory psychology and sociology of religion courses are discussed. The survey was administered to 382 members of the American Psychological Association and the Society for the Scientific Study of Religion. Respondents reported that approximately one-fourth of their courses were devoted to religious topics and three-fourths of the courses were devoted to the main discipline, either psychology or sociology. Approximately one-half of the students in these courses were primarily interested in religion rather than the main discipline; thus the demand for religious content such as comparative religions or

theology was moderately heavy. Although many instructors reported trying to accommodate the student demand, the consistent reply to the student responses was negative; generally, instructors do not perceive that the goals of their courses include providing religious studies content. Therefore, respondents indicated that considerable tensions existed between students and instructors because their respective course goals differed substantially. Techniques used by instructors to accomodate the student demands include concrete assignments: student religious autobiographies, participation in religious services, resource speakers, and student-initiated taped interviews. Identifiers—West Germany

To understand developments in West Germany since World War II, one must consider numerous social, political, economic, military, and educational variables. Important among these are the decline in output orientation, increase in interpersonal political involvement, decline in value placed on politics, stress on democratic decision making, reduction of support for European political integration, and democratization of education. Characteristics of Germany's political structure include a political party system based on proportional representation, a constitution which combines central institutions with federalism, and a high aggregation of interest among leaders from government, banking, business, labor, and industry. In the arena of social policy, post World War II developments include increases in government supported pension plans, a national health system, and increases in numbers of students receiving higher education. United States/West German political relations since World War II have been based on mutual acceptance of the need for European security, in spite of differences over particular military and financial policies. Analysis of these factors indicates that West Germany is a stable nation whose governmental and constitutional structure provides ample opportunities for dealing with political issues. (DB)

Descriptors—*Academic Education, Basic Skills, Critical Thinking, Current Events, Curriculum Planning, *Educational Assessment, Educational Problems, Federal Government, Futures (of Society), High School Organization, Instructional Improvement, Interpersonal Competence, *Political Issues, Relevance (Education), Secondary Education, Social Studies, Social Values, State Government, State Surveys, Student Attitudes, Student Interests, Student Needs, *Student Opinion, Student School Relationship, Television Viewing, *World Affairs

Four surveys are described which gauged student opinion concerning state, national, and international events as well as responses relevant to curriculum structure and subject matter knowledge. The surveys, conducted from 1975 through 1978, elicited responses from approximately 400 to approximately 850 New Hampshire public high school students. In response to school related questions, students supported mandatory mastery of basic skills and opposed social promotion. They also opposed ending compulsory attendance at age 14 and felt that neither the number of courses nor the number of classes should be reduced. However, they felt that job skills should be learned in apprentice situations rather than in the schools. Regarding subject areas, many students felt that too little instruction is given about the actual workings of government, about the basic values and ideals of our society, and about current issues. Also, they felt that too little attention is devoted to the development of interpersonal skills. They expressed a desire for more assistance in consumer economics and in career choice. Student emphases on material acquisition as the "good life" and on television viewing suggest that schools may be remiss in teaching values and critical thinking skills. In answering factual questions, students indicated more knowledge about national and international facts than about their own state. Finally, suggestions are given for dealing with American politics. Survey questions and the distribution of responses are included. (KC)

Identifiers—Great Britain

The document contains four issues of a British journal intended as a medium of communication for teachers of social studies and social science at the elementary and secondary levels. The first issue presents a lead article stressing the need for a global approach in teaching social studies. Other articles focus on the need for educational assessment in schools and on various examination techniques. The second issue is devoted to an overview of economic education in Great Britain. Topics discussed include the need for a study of political economy, development of an economics syllabus, understanding British industry, and classroom simulations of economic situations. The third issue purports the usefulness of anthropology as an area of study within the social studies, suggests learning activities for the anthropology curriculum and discusses several anthropological concepts such as the social construction of reality and ethnic identity in a pluralist society. The fourth issue concentrates on urban studies and explains how activities such as field trips to factories and creating models of cities and towns can help students understand urban environments. Book review and correspondence sections are included in each issue. (DB)

Identifiers—Pennsylvania

To provide information to educators and curriculum developers on strengths, weaknesses, and needs of ethnic studies programs in Pennsylvania, the report offers an overview of the nature and extent of ethnic studies programs operated by Pennsylvania's postsecondary institutions, public school systems, and nonpublic schools. Information is based on data gathered in a survey of treatment by Pennsylvania's schools of racial, religious, and ethnic groups in courses, curricula, or programs. Data were analyzed from the perspective of democratic pluralism and were based upon the 294 Pennsylvania schools which reported having ethnic studies. The book is presented in five chapters. Chapter I introduces the study. Chapters II, III, and IV offer data for postsecondary schools, public schools (K-12) and nonpublic schools (K-12). The final chapter offers conclusions including that ethnic studies is a relatively new enterprise within the educational system and is increasing in importance in Pennsylvania schools. Recommendations made on the basis of this growth trend include that ethnic studies should be interdisciplinary, offered at all grade levels, a focus of teacher education programs, and an impetus to school/community communication. A survey questionnaire is presented in the appendix. (DB)

Presented are general session and discussion group reports from a citizenship conference held in Philadelphia in May, 1946. Directed by the National Citizenship Committee of the National Education Association, the conference provided an opportunity for political, business, educational, and religious leaders to discuss benefits and responsibilities of citizenship during the period following World War II. Specific objectives of the conference were to clarify leadership responsibilities in the area of citizenship and to define the role of education in helping citizens become responsible political participants. The 50 conference speakers included college deans, superintendents of schools, the mayor of Philadelphia, government officials, members of the clergy, state governors, corporation presidents, labor leaders, senators, foundation spokesmen, and citizens council representatives. Topics discussed included characteristics of good citizenship, world community, social change, duties of citizenship, American heritage, world freedom, reasons for participating in civic affairs, human rights, the need for citizenship recognition programs, and the citizenship value of participating in the war effort. Presented are speeches, group reports, and panel discussions from a citizenship conference held in Boston in May, 1947. Sponsored by the Citizenship Committee of the National Education Association, the conference provided an opportunity for political, business, educational and religious leaders to discuss the benefits and responsibilities of citizenship during the period following World War II. Specific objectives of the conference were to devise ways of making citizenship more effective and to indicate how various organizations could contribute to a more active, enlightened, and progressive citizenry. Approximately 100 conference participants heard addresses by and discussed citizenship matters with college presidents, educators, military leaders, labor leaders, members of the clergy, representatives from foundations and non-profit organizations, and government officials including the attorney general of the United States. Topics discussed included special citizenship duties of various professional and vocational groups, qualities of a good citizen, community consciousness, democracy in peace time, the United Nations, participation in social and civic action, and the need to democratize education. Presented are background information, discussion group reports, and addresses from a citizenship conference held in Washington, D.C. in May 1948. Sponsored by the Citizenship Committee of the National Education Association and the United States Department of Justice, the conference centered on the theme, "Citizenship: Rights and Responsibilities." Speeches and discussion are presented on three major topics: the world-minded American citizen, basic human rights and attendant responsibilities, and citizenship in action in the local community. Speakers included educators, college presidents, government officials, politicians, members of the clergy, foundation and non-profit organization representatives, congressmen, and media representatives. Summaries of discussion on the major topics revealed group concensus on issues including that Americans should become world-minded citizens, find ways of achieving jointly held values democratically, support agencies working toward mass communication, set standards and patterns of action to assure human rights, support equality of opportunity, realize that all communities are interdependent, and fulfill citizenship duties on local, state, and national levels. The proceedings contain the papers given and digests of group topics discussed at the 1949 National Conference on Citizenship held in New York. An introduction by the chairman of the conference committee identified the conference theme as "Responsible American Citizens" and noted that discussion would center on citizens in politics, in the world, and in their communities. Opening speeches focused on issues such as responsible roles in national, state, and local politics, good government, and common problems that beset political organizations on all levels. Speeches with a global approach have the following titles: "Today's Challenging Opportunity," "Our Job in the World Today," "Enriching America," and "What Should We Do about the Communist Threat in Asia?" Concluding speeches explored the role of the public schools in developing American citizens and described municipal political experiences in Cincinnati, (Ohio), Richmond, (Virginia), and Brunswick, (Maine). Speakers included the mayor of New York, educators, senators from Vermont and Minnesota, government officials, media representatives and spokespersons from citizens groups such as the League of Women Voters and chambers of commerce, Thumbnail reports summarize information presented in each of the major topic areas. Presented are general session and discussion group reports from a citizenship conference held in Washington, D.C. in May, 1950. Sponsored by the National Citizenship Committee of the National Education Association and the United States Department of Justice, the conference provided a forum for examination of the functions and duties of American citizenship after World War II. Conference participants included representatives from civic, religious, educational, professional, industrial, labor, and communications groups. The conference theme was "Loyal Citizens in Action–You Are Your Government." The proceedings are presented in three major sections, which correspond to the major conference topics. The first section focuses on voting. Opening speeches dealt with how voters decide among candidates and ways to encourage high voter turnout. The second section presents speeches and discussion relating to the need for citizens to base participation upon accurate information. Topics discussed include providing field-trip experiences in government agencies to students and encouraging newspaper editors to present broad outlines of political facts and information. The final section offers discussion about how organizations can improve citizenship. Recommendations include that schools should help students understand the privileges and obligations of citizenship, the federal government should organize a National Commission on Citizenship, and community citizenship organizations should coordinate their activities. The document presents proceedings from the sixth in a series of annual national citizenship conferences. Held in Washington, D.C. in 1951, the conference served as a forum where educational, political, business, religious, labor, civic, and communications leaders could explore functions and duties of American citizenship. The theme of the conference was "Freedom in One World: Today and Tomorrow." Specific concerns of conference speakers included reviewing the responsibilities of the United States as leader of the free world and defining the role of the United States in stemming the tide of communism. Speakers stressed the need for American citizens to pursue active political cooperation, study of political matters, conscientious leadership, and respect for other people. Topics discussed include education of the foreign-born for citizenship, naturalization proceedings and problems, world freedom, citizenship in time of crisis, attitudes of youth toward citizenship, the role of the media in a changing world, and citizens' responsibility for freedom at home and abroad. Speakers included President Harry Truman, the attorney general of the United States (J. Howard McGrath), representatives of the National Education Association, United States senators from Oregon (Wayne Morse) and Tennessee (Estes Kefauver), members of the clergy, educators, media representatives, and young people representing the Boy Scouts of America, 4-H clubs, the National YMCA, the American Legion, and the United World Federalists. The document presents proceedings from the seventh in a series of annual national citizenship conferences. Held in Washington, D.C. in September, 1952, the conference served as a forum for more than 1,000 educational, political, business, religious, labor, civic, and communications leaders to explore functions and duties of American citizenship. The theme of the conference was "Rights of the Citizen

Under the Constitution." Speakers focused upon helping citizens exercise their constitutional rights, encouraging voter turnout, conserving the American way of life, fostering appreciation of the privileges and duties of American citizenship, improving the democratic process, and preserving freedoms guaranteed by the Constitution. Eighteen discussion groups focused on Constitutional rights and identified problems related to the exercise of these rights. Rights identified as fundamental included fair and speedy trial, equal justice under law, freedom of speech, and the right to dissent. Civic responsibilities identified as attendant to these rights included voting, obeying duly enacted laws, paying taxes, supporting the armed forces, opposing subversive persons and organizations, and putting public interest ahead of private advancement. Suggestions for increasing constructive citizenship action included increasing civic participation, improving citizenship education in schools, reducing discrimination, increasing neighborliness, and reducing civic apathy. The document offers an overview of citizenship-related topics which were discussed at the third annual National Citizenship Conference sponsored by the National Education Association held in Washington, D.C. in May, 1948. Excerpts are provided from conference speeches by government, civic, educational, and organizational leaders including President Harry Truman, California Congressman Richard Nixon, and Attorney General Tom C. Clark. Speakers and discussion groups at the 1946, 1947, and 1948 annual citizenship conferences identified citizenship qualities. These included that a good citizen recognizes social problems, has the will and ability to work toward solution of these problems, practices democratic human relationships in the family, school, and community, endeavors to understand different racial viewpoints, bases political actions on democratic values, participates in community affairs, and stresses the interrelationship of the United States with other nations. Evaluative comments of the third National Citizenship Conference by church, legal, educational, and youth groups indicate that the mandates to improve citizenship were positively received. (DB)

To aid junior high and high school educators and curriculum planners as they develop population education programs, the book provides an overview of the population education knowledge base. In addition, it suggests learning activities, discussion questions, and background information which can be integrated into courses dealing with population, physical survival, and/or world problems. The book is presented in eight chapters. Chapter I discusses some of the ways in which population has been taught including as a problem-solving situation and as a topic to be studied through methods of inquiry such as defining issues, placing population within a values context, identifying universal laws and principles, and predicting logical consequences of suggested solutions. Chapter II explains world population growth rates and offers activities such as studying and constructing population pyramids. Chapters III and IV explore family planning and population regulation by physical and social systems. Chapter V investigates the relationship of population density to social stress. Chapter VI discusses how various urban, rural, and migratory populations relate to their environments. Chapter VII examines how populations are dependent upon natural resources. The final chapter explores the role of values in population education and delineates major issues which should be treated in a population education course. (DB)

Detailed accounts of activities of 19 committees of the Social Science Research Council form the major portion of this annual report. In addition, the Council president's report summarizes the activities, trends, and goals of the Council in areas such as research planning, the improvement of research methodology, and the training of competent research personnel. The report indicates that during 1977-78, growth in international scholarly contacts and some collaborative research occurred. However, only a small number of scholars have undertaken specific cross-national comparative studies. Committees added during 1977 dealt with evaluation research, ethnicity, life-course perspectives in middle and old age, and mathematics in the social sciences. Other reports cover biological bases of social behavior, biosocial science, cognitive research, economic stability, gifted children, law and social science, mass communications and political behavior. Topics discussed include methodology of longitudinal research, childhood development, social indicators, sociolinguistics, television and social behavior, and work and personality in the middle years. Finally, reports of committees on training and development of research personnel are presented. (KC)

Identifiers—Europe (West)
Presented are formal addresses and discussion group reports from a teacher in-service workshop held in Donaueschingen, Western Germany, in September, 1978 to acquaint European secondary school teachers with the Council of Europe's educational program. Specific objectives of the workshop were to discuss approaches to teaching about Europe in language arts and social studies programs

in secondary schools and to investigate how to teach about political and economic cooperation in Europe since 1945. Participants included 26 teachers and teacher educators from Austria, Denmark, Ireland, Western Germany, Luxembourg, Norway, and the United Kingdom as well as two teachers from Canadian schools in Western Germany. Introductory statements stressed the desirability of a continuous program of in-service courses. Other speeches focused on treatments of European integration in various school systems, reasons to inculcate students with an awareness of European problems, and suggestions for teaching about European culture. Working group sessions discussed curriculum development, resources, approaches, and methods for various secondary grade levels. Recommendations for future workshops were that the sessions be informal, offer more opportunities for discussion by participants, and emphasize developing interdisciplinary approaches to teaching about Europe. Appreciation of Humor: Implications for Educators.

Pub Date—Aug 78

Note—13p.

Pub Type— Reports - Research (143)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Adults, *Behavior Patterns, *Childhood Interests, Curriculum Development, Data Analysis, *Educational Needs, Educational Practice, Elementary Education, Grade 5, *Humor, Individual Development, Individual Differences, *Individual Psychology, Instructional Improvement, *Perception, Statistical Analysis, Student Attitudes, Tables (Data)

A study was undertaken to determine which types of verbal humor are preferred by children and to discover how well adults can predict what children will perceive as humorous. Fifteen adults (education students, parents, and teachers) were asked to rate 25 jokes on a four point scale ranging from not funny at all and not very funny to kind of funny and very funny. The 30 fifth grade students who participated in the study were volunteers from two elementary schools in Racine County, Wisconsin. The jokes, which were selected from five popular children's joke books, represented four types of humor–incongruity, novelty, tendentious, and pun or word play. A fifth category, non-humorous, was also included. The fifth graders were directed to rate each joke on its own merits. At the same time, the adult control group was asked to rate the jokes the way they thought a fifth grader would rate them. Findings indicated that fifth graders and adults are more alike than different in their appreciation of humor, that appreciation of verbal humor is highly individual, and that adults tend to feel that fifth graders will find things funnier than they actually do. The implication for curriculum developers who wish to use humor in instruction is that they should pretest materials with a target audience. (DB)

The Agents of Change and One Southern Town.

Pub Date—Jul 77

Note—69p.

Pub Type— Information Analysis (070) — Historical Materials (060)

EDRS Price - MF01/PC03 Plus Postage.

Descriptors—*Change Agents, Changing Attitudes, *Community Characteristics, Cultural Awareness, Cultural Background, *Economic Development, Geographic Concepts, Geographic Regions, Industrialization, Military Organizations, Racial Integration, Rural Urban Differences, Secondary Education, Social Attitudes, *Social Change, Social Integration, *Southern Community, Southern States, Technological Advancement, *United States History, Urban Environment

Identifiers—Tennessee (Tullahoma)

A local community (Tullahoma, Tennessee, in this case) can serve as a good example to students of how a given locale fits into a geographic region and exhibits characteristics which are both typical and atypical of the region in general. Tullahoma typifies the rapid social and economic change which has characterized the South since the 1930s. In 1930, Tullahoma was a sleepy southern town, and by 1960 it was the 17th largest city in Tennessee. Particular agents of change in Tullahoma include the Tennessee Valley Authority, development of recreation areas, establishment of military bases in the area, growth in social service and cultural sectors such as schools, hospitals, and cultural activities, and increased industrial growth in metals and power industries. These and other similar agents affected Tullahoma and other southern communities by encouraging contact between southerners and people from other areas of the United States, paving the way for racial integration, and speeding the trend toward urbanization. By integrating a case study of a community such as Tullahoma into the curriculum and by using sources in other communities similar to those used to investigate Tullahoma, teachers can help students gain cultural and historical awareness of various eras and regions. An Educational Criticism of Three Art History Classes: A Discussion of the Methodology.

Pub Date—[10 Apr 79]

Note—24p.; Paper presented at National Conference for American Educational Research Association (San Francisco, California, April 10, 1979)

Pub Type— Opinion Papers (120) — Speeches/-Meeting Papers (150)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—*Analytical Criticism, *Classroom Observation Techniques, *Course Evaluation, Educational Assessment, Effective Teaching, Elementary Secondary Education, Evaluation Criteria, *Evaluation Methods, Higher Education, Student Teacher Relationship, *Teacher Evaluation

The author describes the structure and methodology of "educational criticism" and provides excerpts from a study done in a high school art history class. Educational criticism is based on lengthy classroom observations and describes, interprets, and evaluates classroom life. The educational critic must be knowledgeable about classrooms and the subject matter and must be able to compare what she observes with other educational possibilities. The first stage, field observation, combines formal and informal methods which include direct classroom participation and observation, interviewing, document analysis, and systematic counting. The second stage consists of writing the criticism, which includes description, interpretation, and evaluation, judgment, or assessment. Description, the major part of the documentation, includes setting and events of typical days and reflects changes which occurred in the classroom. Interpretation, which focuses on the whole and on parts of the observation, is based on educational and social science theories. The evaluation stage answers the questions "Was it done well?" and "Was it worth doing?" Prescription, or "How could it be done better?" may also be included. (Author/KC)

Descriptors—Debate, *Decision Making Skills, Educational Programs, Experiential Learning, Group Dynamics, Higher Education, International Organizations, *International Relations, Learning Activities, *Models, Parliamentary Procedures, Peace, Research Skills, Role Playing, Secondary Education, *Simulation, Social Studies, Student Motivation, *Teaching Methods, *World Affairs, World Problems

This document provides a description of the Model United Nations (MUN) program, its educational benefits, an overview of its practice within the United States, and outlines methods for using the MUN as a teaching tool. A total of 72 MUNs involving high school and college students was reported in 1977-78. As a simulation, the MUN provides replication of real life social processes and involves activities of decision making, allocation of resources, planning, and negotiation. Students role play delegates from member states of the United Nations. Benefits to students include heightened interest and motivation, an opportunity to apply and test knowledge gained from reading, a greater understanding of problems faced by decision makers, and an understanding of real world phenomena through a more simple microcosm. Three stages comprise MUN activities: preparation, deliberation, and decision. The first stage consists of research and involves developing country profiles, analyzing problems, writing position papers, formulating resolutions, planning, and strategy. The second stage, deliberation, involves agenda setting, formulating alternatives to proposals, and legitimation, or winning support for resolutions. The third stage, decision, calls for either tabling the resolution or voting on it. Tables which rate student delegate responses to prerequisites for peace are included. (KC)

Pre-Service Teacher Perceptions of Social Education.

Pub Date—Apr 79

Note—19p.; Paper presented at Conference for the American Educational Research Association (San Francisco, California, April 1979)

Pub Type— Reports - Research (143) — Speeches/-Meeting Papers (150)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—*Curriculum, *Definitions, *Educational Attitudes, Educational Needs, Educational Problems, Higher Education, Preservice Education, Research Methodology, Social Sciences, *Social Studies, *Student Teachers

Results of a study to determine preservice teachers' perception and understanding of social studies are examined. Fourteen undergraduate students who had completed student teaching were interviewed. Results indicated that students were confused about the nature of the field. The data showed the continuing domination of the field by history–most students majored in history, taught it during student teaching, and perceived it as the subject most likely to be taught and of primary importance in social studies. Respondents did not seem sure of their answers concerning social studies definition, purpose, and content. Some held the primary purpose to be indoctrination, the content to be history, and the definition to include social sciences, issues, and human interaction. Others considered the purpose to inspire critical thinking, the content to be history, and the definition to be humans and the environment. No respondents indicated social action, social criticism, or personal development as purpose, content, or definition. In addition, respondents did not indicate familiarity with the literature in the field. The study raises a number of questions concerning teacher education, curriculum, teaching decisions, and the long term effect of this confusion on teaching. (Author/KC)

Caswell, Hollis L.

The Revisionist Historians and Educational Practice.

Pub Date—79

Note—7p.; Paper presented at joint session of American Educational Research Association and the Society for the Study of Curriculum History (San Francisco, California, April 9, 1979)

Pub Type— Speeches/Meeting Papers (150) — Opinion Papers (120)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—*Bias, Educational Assessment, *Educational History, Educational Objectives, Educational Philosophy, *Educational Practice, Educational Problems, Elementary Secondary Education, *Information Needs, Intellectual History, *Modern History, Primary Sources, Progressive Education, Research Needs, Research Problems

Limitations of interpretations of revisionist historians concerning educational development in the 1930s and 1940s are examined. Revisionists have made uninformed assumptions about educational practice and have ignored significant aspects of educational development. Often their conclusions are too limited in scope. For example, they tend to view the progressive education movement as the major expression of liberal educational thought. However, these historians have neglected state and local curriculum programs. Two other conclusions seem to be lacking in evidence drawn from educational practice. One is the contention that educators have largely ignored the roles of community agencies other than the schools in the educational process. The second is that schools are oppressive institutions which regiment, indoctrinate, and sort children. This conclusion excludes an examination of classroom aims, content, and methods, and consid-

eration of directional changes. Actually, since educational practice is so diverse, generalizations about instruction are invalid. Revisionists have also neglected source materials concerning curriculum development during this era. It is suggested that these historians will present a more valid picture of progressive education if they give more attention to what really happened in the schools during the 1930s and 1940s and to the kind of change that leaders in the field were seeking. Past and Likely Future Trends in the Labor Market for Teachers.
Pub Date—Mar 77
Note—21p.
Pub Type— Reports - Research (143)
EDRS Price - MF01/PC01 Plus Postage.
Descriptors—Birth Rate, *Employment Opportunities, Enrollment Trends, *Job Market, Population Trends, *Teacher Employment, *Teacher Supply and Demand, *Trend Analysis

The impact of population trends upon teacher employment is examined. The growing and shrinking of school enrollment is discussed as it relates to trends in the nation's birth rate. The direct relationship of this phenomenon upon teacher shortage and over-supply and the employment prospects for teachers is considered. With currently declining birth rates, fewer persons will decide to enter the teaching profession, and this, it is suggested, will lead to future teacher shortages. Projections are made of the possibilities of a severe decline in qualified teachers in the decades ahead. (JD)

"My Teacher Education Program? Well—." First Year Teachers Reflect and React.
Pub Date—Feb 78
Note—11p.
Pub Type— Reports - Research (143)
EDRS Price - MF01/PC01 Plus Postage.
Descriptors—*Beginning Teachers, Inservice Teaching, Opinions, *Preservice Education, *Program Evaluation, *Schools of Education, *Teacher Attitudes, Teaching Experience

This article reports on the results of a survey of beginning teachers who were asked to evaluate their training for the profession in the light of their first year of actual experience. Eighteen teachers were observed and interviewed throughout their first year of teaching. Two themes emerged from their responses: a realization of the limits of teaching programs, and a valuing of firsthand experiences. The majority of these teachers expressed the opinion that field-based experience while in school was of great value. (JD)

Descriptors—*Diagnostic Teaching, *Elementary Education, Feedback, *Inservice Teacher Education, *Precision Teaching, Skill Development, *Student Evaluation, Teaching Methods

A program adapting precision teaching in an urban elementary school is described. This program, initiated by the Teacher Corps, was used as an inservice project operating in the classroom. Four major procedural steps are described: (1) the teacher must describe an educational objective in exact terms; (2) pupil performance must be recorded daily in terms of rate per minute for tasks; (3) if pupil data indicates the pupil is not learning, some aspect of the teaching process must be changed; and (4) if the teaching change does not improve performance, another change must be made. One aspect of this teaching method is maintaining a performance chart for each pupil that indicates individual growth and allows any needed teaching process changes to be made within a few days. An evaluation of the program is included in this report, as well as a description of the development of the program, the personnel, and budget. (JD)

An advanced study program leading to a Ph.D. degree in educational research and evaluation is described. The program is structured to provide experiences in research and evaluation as the area of specialization, professional education as the area of application, and liberal arts cognates. The curricular objectives of the program are given as terminal behaviors expected of the students in four areas: (1) professional education; (2) administrative skills; (3) liberal arts and cognate studies; and (4) research, measurement, and statistics. These objectives are viewed in the program as interacting and integrated rather than isolated specifics. Degree requirements include the completion of courses and field experience selected by the students, a full-time work internship of 120 days, and a completed and orally defended Ph.D. thesis. (JD)

Descriptors—*Behavior Change, *Change Strategies, *Curriculum Design, *Health Education, Higher Education, Life Style, Personal Values, *Physical Fitness, Secondary Education, Self Determination, Social Reinforcement

A health education curriculum for secondary school and undergraduate college students is described. The prime emphasis in this curriculum is upon behavior modification and personal motivation on the part of the student. Strategies for modifying health behavior are outlined stressing the importance of students understanding and clarifying their personal values and goals. Working with the teacher, students develop a health program of their own after participation in basic medical laboratory experience that provides an understanding of their physical condition and needs. Both biomedical evaluation and behavioral inventory analysis are used in this instructional phase. A sample of a student-developed program is appended. (JD)

Descriptors—*Attendance, *Data Analysis, Elementary Education, *Facility Utilization Research, Health Programs, Program Planning, *Rural Schools, *School Health Services, *School Nurses, Statistical Studies

With the objective of describing the use of the nurse's office or sick room in a rural elementary school, data was gathered from administrative records relating to sick room utilization and absenteeism. Monthly variations in use of the sick room, utilization by grade level, consistency of usage, complaints presented, and absenteeism were the main foci of data analysis. Results indicated that elementary students use the school sick room in a manner comparable to the way adults use the physician's office and clinic. Females make more visits than males. There is good evidence that many visits are unnecessary. Implications point to a need in health education to address the problem of improper use of health care systems. (DS)

Identifiers—*New Mexico

This survey was conducted to provide informational inputs for planning and establishing a community health education system in southwest New Mexico. Information was gathered concerning the opinions of typical area residents regarding needed health-medical care facilities, personnel training needs, services, personnel requisite to their well-being, and needed preferred health education. A modified random sample of households was selected according to rural and urban strata, and 400 personal interviews were conducted. Survey results included a reported need for more health/education training among 59 percent of the respondents. Gen-

eral household health care and emergency first aid were selected most frequently as preferred topics. Television and radio and adult education courses received the highest number of responses as preferred means of learning. Subjects also expressed concern about needs in the areas of increased manpower, physician-client relationship, improved physician service, cost of health care and services, facilities improvement, and diagnostic/preventive service manpower and education. A program leading to a master of arts degree in education that is offered jointly by two cooperating universities is described. While originally developed for elementary and secondary teachers it has been expanded to include health care educators. The major thrust of the program is to encourage the teacher to assume major responsibility for the development of his or her own program. To achieve this goal, an initial course is offered called the "Teacher as Learner." The objective of this course is to help the individual assess personal strengths and weaknesses and to expand professional horizons. The second segment of the program involves practicum experience. A flexible program structure provides for individual choice of work. Appended to this report is a syllabus for the "Teacher as Learner" course and guidelines for the practicum experience. (JD)

Descriptors—*Attitude Tests, *Conventional Instruction, *Educational Attitudes, *Educational Philosophy, Educational Theories, Factor Analysis, *Progressive Education, Statistical Studies, Teacher Attitudes, *Teachers

The study was conducted to gain insight into the nature and structure of educators' education-related attitudes and beliefs. Subjects included both education students and teachers. The subjects completed two instruments (Kerlinger's Educational Scale VII and the Educational Philosophy Index). Results suggest that more than two dimensions are required to subsume educators' beliefs, although some researchers have argued that two dimensions should be sufficient. Thus, it appears that educators' beliefs are more complex than some educators generally assume. (Author/DS)

This report describes the second phase of a teacher learning cooperative project designed to coordinate the economic, physical, and human resources of a number of small elementary school districts in California and the Marin County Superintendent of Schools Office. Whereas the first phase dealt with the formation and implementation of the cooperative, the second phase was designed to remedy the organizational weaknesses of the original framework and further refine the established structure. The report emphasizes those processes and strategies that are central to the development and implementation of professional growth at the elementary school level and stresses evaluation and solution of problems. This first volume provides a description of the practicum, procedures for assessment and development, and some conclusions and suggestions for further applications. A bibliography is also included. The Learning Implications of Educational Value Conflicts Between Students and Instructors.
Pub Date—78
Note—16p.
Pub Type— Reports - Research (143)
EDRS Price - MF01/PC01 Plus Postage.
Descriptors—Cognitive Style, Individual Differences, *Interaction, *Intermode Differences, *Learning Processes, Personal Values, Student Attitudes, *Student Teacher Relationship, Teacher Attitudes, Teaching Methods, *Teaching Styles
It is hypothesized in this study that given an understanding of the educational value levels of students, instructors could modify their teaching methods to accommodate various levels reflected in their classes. Six value systems for both teachers and students are identified: (1) tradition oriented; (2) individualistic; (3) structured; (4) scientific; (5) group oriented; and (6) meaning oriented. Instructors participating in this research project were given questionnaires for themselves and their students designed to clarify individual learning and teaching styles and preferences. Upon completion of the questionnaires, norms for the student population and the faculty were generated. Results of these findings are presented in tabular form, and several case studies are presented to exemplify difficulties caused by poor matching between teaching styles and learning styles. It is suggested that the use of value level plus cognitive style would produce an instrument that would identify appropriate teaching methodology and study skills for each value level. (JD)

The teacher program described here was designed to create a deeper understanding of a wide span of instructional problems unique to the inner-city school setting, putting participants in a position of forming teaching strategies of their own as solutions. Such school problems as overcrowded classes, frequent daily interruptions, playground bullies, attention-getters, and the like are included in the package. This descriptive report provides information on the purposes and content of the program as well as activities and resources involved. A critique, history of development, and ordering information are also included. (DS)

Needs Assessment: Determining Project Goals and Establishing the Change Relationship.
New Hampshire Univ., Durham.; Portsmouth Public Schools, N.H.
Spons Agency—Office of Education (DHEW), Washington, D.C. Teacher Corps.
Pub Date—78
Note—14p.
Pub Type— Reports - Evaluative (142)
EDRS Price - MF01/PC01 Plus Postage.
Descriptors—*Change Agents, *Change Strategies, *Conflict Resolution, Decision Making, Evaluation Methods, Helping Relationship, *Needs Assessment, Problem Solving, *Teacher Administrator Relationship
The basic problems faced by those implementing a project of assessing school needs and initiating change are discussed. An example of a teacher corps project funded for such an endeavor is summarized. How the initial problems of assessing needs to determine project goals and establishing a credible change relationship with school personnel were handled is described. Emphasis was placed on giving teachers the power and training to determine the focus methods for the two larger parts of the assessment program: needs of teachers and students. To this end, members of the staff received training in needs assessment and design. The importance of resolving conflict between staff and administration, of establishing trusting relationships between the agents of change, and of sharing the decision making process is emphasized throughout this report. A program designed to adapt educational research findings to practical classroom use is described. A variety of options for adapting research through inservice education are described. They include formal university courses after school, released time programs, one to one and small group consultations, independent study, graduate research theses, visitations, professional conferences, team planning meetings, and support for teacher action research and pilot program proposals. Proposals for action research and pilot programs are supported by the project for materials, consultative services, and publication and dissemination. The program is designed to accommodate different styles and paces of teachers. (JD)

Donny, William F.
Teacher Demand and Supply for Elementary and Secondary Schools in Pennsylvania.
Pennsylvania State Dept. of Education, Harrisburg. Bureau of Information Systems.
Pub Date—Nov 78
Note—37p.
Pub Type— Reports - Research (143) — Numerical/Quantitative Data (110) ()
EDRS Price - MF01/PC02 Plus Postage.
Descriptors—College Graduates, Elementary Secondary Education, Employment Projections, Employment Trends, Enrollment, *Statistical Data, *Teacher Employment, *Teacher Supply and Demand
Identifiers—*Pennsylvania

In the 1960s teacher demand and supply increased rapidly to match the increasing school enrollments of those years in Pennsylvania. But due to declining enrollments and lower than normal teacher replacement needs in the 1970s the demand for teachers began to fall faster than the supply. Rather conservative projections indicate that teacher supply may well average 50 percent higher than demand in the mid-1980s. However, this oversupply is mitigated by bachelor's graduates in education consistently ranking among the top 10 of the 23 major disciplines for those with some kind of full-time employment five months after graduation. The analysis is based on extensive data relative to: population change, public school enrollment, public and nonpublic schools, and grade and age level characteristics as they relate to teacher demand; sources of teacher supply, teacher graduates, out of state teacher supply, and supply reservoirs; and the relationship of teacher demand to supply in Pennsylvania. EDRS Price - MF01/PC01 Plus Postage.
Descriptors—*Adult Education, *Futures (of Society), Higher Education, *Leisure Time, *Recreational Activities, Television

Present trends in the use of leisure time for both education and recreation point to interesting developments in the future. In education, more and more adults are going back to college, and this will bring changes in both the curriculum offered at the college level and the mixture of students. In recreation, people are using local recreation areas more and driving less. Much leisure time is now spent in the home, which places the television in a crucial position with regard to both recreation and education. The result may be that the home will become the entertainment, the education, and the recreation center, and our attention will shift from milieu, place, to ambience, the feelings attendant upon being in a given place. Descriptors—Changing Attitudes, Class Management, *Comparative Analysis, *Followup Studies, *Job Satisfaction, Peer Relationship, *Self Concept, Student Teacher Relationship, *Teacher Attitudes, Teaching Experience
Identifiers—*Second Year Teachers

The purpose of this investigation was to follow through the second year of teaching a group of 18 teachers who were intensely studied as part of a first-year teacher study. The group responded to a questionnaire designed to reveal changes in attitude toward the following aspects of their work: (1) discipline; (2) relationship to the school principal; (3) relationship with fellow teachers; (4) their own effectiveness as a teacher; (5) feelings about their teacher education programs; (6) interest in teaching; (7) quality of their classroom instruction; (8) ability to respond to problems; (9) feelings about teaching as a career; and (10) feelings about themselves and satisfaction in their work. The responses to the questionnaire are analyzed for similarities and differences of these attitudes held by the same teachers at the end of their first year of teaching. (JD)

Some Critical Areas of Teacher/Advisory Groups and School Organization Development.
Pub Date—78
Note—10p.; For related document, see SP 014 050
Pub Type— Opinion Papers (120)
EDRS Price - MF01/PC01 Plus Postage.
Descriptors—*Classroom Guidance Programs, Educational Counseling, *Faculty Advisors, *Group Counseling, Group Dynamics, Learning Processes, Organizational Development, *Program Development, *Secondary Education, *Teacher Role
In establishing a secondary school teacher/advisor system and advisory group, the advisor should direct his efforts toward and encourage decisions about three critical areas: the state of the group and possible enabling norm patterns; the conditions of openness, trust, and safety in the group; and the student in relation to the group processes. The teacher/advisor's role is not the same as it is while teaching subject matter, for his/her attention in the advisory group must be directed to the group forces that are essential to the movement of the group and critical to each student's learning experience. The introduction of a teacher/advisor system in a high school can trigger an organized development effort in the high school as well, which can lead to a reappraisal of the total learning situation and the processes of interaction involved. (DS)

Descriptors—Classroom Guidance Programs, Critical Thinking, Discovery Learning, *Educational Counseling, *Faculty Advisors, Human Development, *Learning Processes, Program Planning, Secondary Education, *Student Motivation, *Student Teacher Relationship, *Teacher Role
Responding to today's high school students' human needs as well as educational needs necessitates that the teacher return to serving as an adult friend during their school life. Administrators are helping to set the stage for facilitating learning how to learn, and teacher/advisors are drawing upon many aspects of their personality and human dynamics abilities to be more helpful to the student. Some specific functions of these new roles are: (1) the human development function; (2) the crisis assistance function; (3) the student-parent-teacher conference function; and (4) the program planning function. The role of the teacher/advisor is different from the role in traditional teaching, the focus being on experiential learning, personal expression, and critical thinking, rather than on traditional content learning. The teacher/advisory system relies heavily on the concept of student responsibility for their own learning and is a response to societal pressures on teachers and the roles they play in education. (DS)

Tracing Teacher Effects Through Student Behavior to Learning Outcomes.
Spons Agency—National Inst. of Education (DHEW), Washington, D.C.
Pub Date—Aug 78
Note—9p.; Paper presented at the Annual Meeting of the American Psychological Association, (Toronto, Canada, August 1978)
Pub Type— Reports - Research (143) — Speeches/-Meeting Papers (150)
EDRS Price - MF01/PC01 Plus Postage.
Descriptors—*Academic Achievement, Grade 6, Interaction, *Performance Factors, Student Attitudes, *Student Behavior, *Teacher Behavior, *Teacher Characteristics
The relationship between teacher characteristics and classroom behavior and the academic achievement of students is examined. Observation focused upon the effect of specific teacher behaviors on student time-on-task in the classroom. It was posited that time-on-task produces gains in achievement, coping skill, self-esteem, and general attitude on the part of the student. Teacher characteristics and classroom behaviors were used to predict student time-on-task. An analysis of results of a year's observation of one sixth-grade class indicated that teacher characteristics do affect children's work habits, in expectable ways, and children's work habits, in turn, affect their learning, self-esteem, and broad coping skills. Planning Tomorrow's Curriculum.
Pub Date—Oct 78
Note—13p.
Pub Type— Opinion Papers (120) — Speeches/-Meeting Papers (150)
EDRS Price - MF01/PC01 Plus Postage.
Descriptors—Child Development, Creative Thinking, *Curriculum Development, *Curriculum Planning, Daily Living Skills, *Educational Objectives, *Futures (of Society), Learning Processes, *Relevance (Education), *Social Change
Curriculum planning for the future must recognize and accept certain premises: forces at work in society greatly influence the nature and direction of the curriculum; students in our society possess varied backgrounds, capabilities, interests, and aptitudes that must be met; common curriculum designs have many strengths; a curriculum to foster thinking and effective human relations is needed if education is to bring about change. Reasoning skills and independent learning should play an important part in tomorrow's curriculum, and more emphasis must be given to process than to memorization. Curriculum methodology thus becomes critical, and any method that will enable children to learn how to learn will be of great value. (DS)

Teacher Specialization: Efficiency or Power?
Pub Date—Apr 79
Note—31p.; Paper presented at the Annual Meeting of the American Educational Research Association (San Francisco, California, April 8-12, 1979)
Pub Type— Opinion Papers (120) — Speeches/-Meeting Papers (150)
EDRS Price - MF01/PC02 Plus Postage.
Descriptors—*Career Development, Differentiated Staffs, *Individual Power, Job Market, *Occupational Aspiration, *Specialists, *Status Need, Teacher Education, *Teachers, Teacher Supply and Demand, Trend Analysis
A trend toward more specialization among educators is discussed. It is noted that this is understandable from many viewpoints. Teachers, reacting to a tighter job market in their profession, feel that specializing in certain areas–remedial reading or dealing with the handicapped for example–will get them jobs in governmentally funded programs. Also, specialization enhances professional status and personal sense of power. Many schools currently use differentiated staffs with specialists occupying a dominant role. The drive for mainstreaming has increased this tendency. The dangers implicit in this situation are discussed, not only from the point of view that tension is created between specialists and regular teachers, but that generalist education may be endangered from this trend. Descriptors—Behavioral Sciences, Behavior Change, *Course Evaluation, Diagnostic Teaching, *Inservice Teacher Education, *Retarded Children, Severely Handicapped, Special Education, Teacher Attitudes, Teacher Behavior, *Teaching Methods, *Training Techniques
This paper describes a ten-week, part-time inservice training course for teachers of severely and profoundly retarded children and an evaluation of the course's effects on teachers' classroom behavior. Five weeks focused on teaching methods, primarily behavior modification and social learning approaches; and five weeks focused on the curriculum content, including verbal behavior and problem solving, plus methods to organize the class and train other staff. Training sessions used lectures, videotape models, role playing, and discussions of interventions with individual children by each teacher. Evaluation of this course comes to the conclusion that such a ten-session, practically-oriented workshop course can change the classroom behavior of teachers in a positive way. (Authors/JD)

The Why's, What's, Who's, When's and How's of Measurement and Evaluation in School Health Education.
Pub Date—79
Note—8p.
Pub Type— Reports - Evaluative (142)
EDRS Price - MF01/PC01 Plus Postage.
Descriptors—Achievement Rating, *Health Education, *Measurement Techniques, *Program Effectiveness, *Program Evaluation, Student Evaluation, Teacher Evaluation
Generally accepted methods of evaluation and measurement used by responsible educators are first discussed. These techniques are demonstrated as they apply to evaluating school health education programs. It is pointed out that effective evaluation encompasses everyone upon whom the program has an impact–students, teachers, supervisors, administrators, parents, and the community. The fact is that what to evaluate in health instruction–values, content, objectives, learning opportunities, classroom environment, and the evaluation process itself–is an important factor in obtaining an overall assessment. It is stressed that regardless of the techniques used, evaluation should be based upon specified objectives in order to develop precise evaluative techniques or measurements. (JD)

Descriptors—*Decision Making, Educational Alternatives, Educational Philosophy, *Evaluative Thinking, *Role Models, *Role Perception, *Teacher Attitudes, Teacher Behavior, Teaching Methods
How teachers evaluate the various instructional methods at their disposal is the question addressed in this paper. The issue is examined in an effort to determine which of certain models of teaching some teachers prefer, how teachers categorize models of teaching, and which factors are associated with their preferences. Results suggest that role ideals and philosophical beliefs both are systematically related to preferences, that philosophical beliefs may influence teachers more than teacher educators generally recognize, and that teachers currently focus on basic skills issues in making preference decisions. Descriptors—*Effective Teaching, *Health Education, Student Evaluation of Teacher Performance, *Student Teacher Relationship, Teacher Behavior, *Teacher Characteristics, *Teacher Evaluation, Teaching Skills
The personal attributes and characteristics of an effective health education teacher are described. It is pointed out that in the field of health education not only are cognitive objectives important but also bringing about desired change in behavior. An analysis of students' reactions to health instruction revealed that the teacher's attitude and way of interacting with individuals had the greatest impact upon student achievement. (JD)

Descriptors—*Cooperative Planning, *Information Networks, Organization, *Organizational Communication, *Organizational Effectiveness, Teacher Associations, *Teacher Centers, Teacher Workshops
This paper reports on an effort to assist persons interested in establishing teachers' centers. This endeavor took the form of a three-day experience in

which novices were able to visit several teachers' centers and to interact with experienced teachers' center staff. This workshop was coordinated by the Teachers' Centers Exchange. The relationship between contacts with other teachers' center personnel and the success these beginners have had in establishing their own teachers' center is explored. While follow-up data on this project was limited, some tentative conclusions were drawn. Contacts with persons already involved in successful teacher center practices were seen as useful for persons attempting to establish a teachers' center. Persons having some success in establishing a center appeared more likely to interact with other beginners. It is suggested that innovating teams need support on their home ground–from administrators, from a cohesive group of teachers, or from the community. If this support is forthcoming for beginning teacher centers, interaction with the teacher center network can facilitate implementation. (JD)

Teacher Centers: The New Market Place for Teacher Educators? One Point of View: A Resounding Maybe!

Pub Date—Apr 79

Note—14p.; Paper presented at the Annual Meeting of the American Educational Research Association (San Francisco, California, April 8-12, 1979)

Pub Type— Opinion Papers (120) — Speeches/-Meeting Papers (150)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Educational Researchers, Educational Resources, Information Utilization, *Research Utilization, *School Community Relationship, *Teacher Centers, *Teacher Educators, *Teacher Participation, Teacher Role

The role teacher educators may play as participants in teacher centers is discussed. It is pointed out that teacher center programs and services would be enhanced if they were linked to the educational research community generally and the research on teaching community specifically. The suggestion is made that this linking function can be provided by individual teacher educators who possess and exhibit appropriate attitudes and behaviors prerequisite to effective teacher-research collaboration. The value to teachers of collaboration with education researchers in putting into practice in the classroom newly developed theories is stressed. The qualifications and qualities of an effective linking agent between colleges of education and teacher centers are described. (JD)

Changing curriculum, shifting student populations, and technological and societal demands require that school staff remain actively and continuously involved in staff development programs; because of these issues and the new mandated programs, more stable teaching workforce, and numerous and varied programs in Michigan, the Michigan Department of Education initiated measures to bring about a better coordinated stated effort in staff development projects. Components of the Michigan plan include: (1) a network of 20 to 22 professional development centers; (2) governing boards made up of no less than 50 percent classroom teachers; (3) needs assessment procedures for each center; and (4) center evaluation by the state. Components are illustrated in descriptions of four specific teacher centers. (DS)

Descriptors—*Academic Achievement, *Class Management, *Classroom Environment, Classroom Research, Grading, *Group Dynamics, Organizational Effectiveness, Peer Influence, Performance Factors, *Research Needs, *School Role, Student Attitudes, Student Behavior, Student Teacher Relationship

A critique of research attempting to determine student achievement by identifying the characteristics and resources of schools is offered. It is pointed out that frequently the academic achievement of students is related to the socioeconomic status of the general student population of the school. The suggestion is made that future research should focus largely, though not exclusively, on the social organization of the classroom. Research designed to provide better understanding of the interrelationships in the classroom, grouping practices, reward structures, authority and control structures, the formation and influence of peer groups, and the organization and allocation of time is claimed to be most effective in identifying the relationship between school influence and student achievement. Identifiers—*Australia

Four programs focusing on the school-community relationship and cooperation are described. The first illustrates how a building program was initiated in a Lutheran school in south Australia. The second focuses on the nature of parent involvement in a New South Wales high school and needed changes. The third program sought to guage parent opinion of school policy, curriculum, and environment and to increase involvement. The fourth program describes parent involvement in a small innovative community school and the extensive use of community resources to deal with problems. (DS)

Descriptors—Adult Education, *Case Studies (Education), *Family School Relationship, Guidance Centers, *Minority Groups, Parenthood Education, Public Relations, *School Community Relationship, Welfare Services

Four case studies of community programs in which the school is the central agent are presented. The role of specialist liaison personnel and their activities is highlighted. The first example is that of a cluster of schools that use school-based welfare officers to deal with common social problems in the community. The second case describes the programs offered by a large suburban school for the further education of minority parents. The third example is that of an inner city school, serving a transient migrant population of low-income parents, that has initiated a program to improve child rearing habits among the parents. The final case is that of a school endeavouring to overcome community disapproval by providing facilities for the public and by mounting a comprehensive public relations program. (JD)

Identifiers—*Teacher Corps

This report describes the planning processes used to develop a five-year teacher corps project for inservice teacher improvement. The planning model was designed to provide collaboration with all persons who would be involved in the project. The input from district, university, and community consultants was used as well as from teachers representing all elementary and secondary grade levels. A discussion of the philosophy and rationale of the program is presented, and the goals and objectives are outlined. A planning matrix is outlined that provides for collaborative input on the following areas of the program: (1) teacher corps guidelines; (2) needs assessment; (3) goals and objectives; (4) delivery system; (5) governance (policy); (6) management; (7) evaluation; (8) demonstration; and (9) institutional adoption. A copy of the questionnaire used to determine teachers' concerns and perceived needs is appended. An over-all evaluation of the planning process is included. (JD)

Applications of Adaptive Testing in Measuring Achievement and Performance.
Pub Date—[76]
Note—8p.
Pub Type— Reports - Research (143)
EDRS Price - MF01/PC01 Plus Postage.
Descriptors—*Achievement Tests, Complexity Level, *Confidence Testing, Factor Analysis, Scoring Formulas, Simulation, *Testing, Test Items, Test Reliability
Identifiers—Computer Assisted Testing, *Latent Trait Models, *Tailored Testing
The concept of testing for partial knowledge is considered with the concept of tailored testing. Following the special usage of latent trait theory, the word valdity is used to mean the correlation of a test with the construct the test measures. The concept of a method factor in the test is also considered as a part of the validity. The possible effect of scoring for partial knowledge on such hypothetical tests is considered together with the logic of these hypotheses. The application of latent trait theory to a mathematical model is used to provide estimates of the expected gain in information as a function of the increase in inter-item correlations. Finally, these concepts are combined with the concepts of tailored testing. Two aspects of tailored testing are considered, tailoring test length and tailoring test difficulty. The possibilities of adapting tailored testing to non-dichotomous item scoring are considered in order to adapt tailored testing to the use of partial knowledge in the test score. (CTM)

Descriptors—Complexity Level, Item Banks, Postsecondary Education, Statistical Analysis, Student Testing, *Test Construction, Test Items, *Test Reliability
Identifiers—Item Discrimination (Tests)
Using estimates of item ease and item discrimination, procedures are provided for computing estimates of the reliability and percentage of failing scores for tests assembled from these items. Two assumptions are made: that the average item coefficient will be approximately equal to the average of the estimated coefficients and that the score distribution for the test will be approximately normal. The predicted mean test score is equal to the sum of item ease coefficients, and the predicted variance is equal to the square of the sum of item discrimination indices divided by 4.5. The fail point is always sixty percent of the number of items. Normal curve tables are used to estimate the percent of score below the

fail point. A normal curve probability table is provided, as is a computer program in BASIC for using this method. The results of using this procedure with seventeen tests are presented and compared with the obtained score distribution statistics for samples of either 51 cases or 201 cases. Kuder-Richardson formula 21 reliability coefficients may also be obtained from this procedure. (CTM)

Descriptors—*Affective Objectives, *Change Strategies, Curriculum Development, Elementary Education, Evaluators, Improvement Programs, *Information Utilization, *Motivation, Reading Achievement, *Self Concept, Teacher Administrator Relationship, *Teacher Attitudes

A two-year project involved two elementary school faculties in planning curricular change. Both schools selected two major goals: to improve reading achievement scores and student self-concept. University personnel served in a consultant/trainer role. The school staffs expressed doubt about the feasibility or the necessity of the self-concept goal; the teachers seemed perplexed about what self-concept was and how they would implement approaches that would raise the self-concept scores of the children. Data presentations outlining the self-concept profiles for each building were essentially ignored. Coupled with the questions about self-concept, the seeds of a suspicion were sown; teachers did not accept self-concept as a causal or important variable in the improvement of reading. This hypothesis is discussed in terms of how teachers view evaluation; the administrative structure of the school system; the relatively unsophisticated level of data conception held by teachers, and Herzberg's two-factor theory of motivators and hygienic factors which decrease motivation. It is concluded that teachers view self-concept as a hygienic factor in classroom motivation–self-concept is not the key to achievement gains. (Author/GDC)

Commonality Analysis: A Practical Example.

Pub Date—Apr 76

Note—30p.; Paper presented at the Annual Meeting of the American Educational Research Association (60th, San Francisco, California, April 19-23, 1976)

Pub Type— Speeches/Meeting Papers (150) — Reports - Research (143)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—*Achievement Gains, Background, Institutional Characteristics, Intelligence, Intermediate Grades, *Multiple Regression Analysis, Parent Participation, *Predictor Variables, *Reading Achievement, Reading Comprehension, *Remedial Reading Programs, Schools, Statistical Studies, Vocabulary Development

Identifiers—*Commonality Analysis, Elementary Secondary Education Act Title I, *School Effectiveness

Commonality analysis was used to look for school effects in gains in reading test scores for 877 fourth to sixth grade children in Elementary Secondary Education Act Title I remedial reading programs. The four groups of predictor variables that were investigated were background, mental ability, parental involvement, and school program. Commonality analysis uses multiple regression procedures to partition the variance among the four groups. The criterion scores were vocabulary and comprehension scores from the Gates-MacGinitie Reading Test post-tests. Pre-test scores were included in the mental ability group of predictors. The results indicate the proportion of explained variance unique to each set of predictor variables plus the proportion common to the eleven combinations of sets. The interpretation and the advantages of commonality analysis, as well as the interpretation of negative commonalities were discussed. The technique of commonality analysis was judged to have several advantages over more traditional types of analysis. (Author/CTM)

Report No.—RTI-CP-22-75-07

Pub Date—1 Sep 75

Note—26p.

Pub Type— Reports - Research (143)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—*Achievement, *Aspiration, Data Analysis, Differences, Followup Studies, *Graduate Surveys, High School Graduates, Longitudinal Studies, *National Surveys, *Predictor Variables, *Research Design, Research Needs, Senior High Schools

Identifiers—*National Longitudinal Study High School Class 1972

An overview of the National Longitudinal Study of the High School Class of 1972 (NLS) is provided. Section one describes the research design for the base-year and first through third followup surveys. Section two summarizes findings from data analyses of the first followup and base-year, completed before September 1975. The findings are presented according to six basic classification variables: sex; high school curriculum; race; geographic region; ability; and socioeconomic status. The relationship of these variables to plan fulfillment is examined; that is, spring 1972 educational and employment plans are compared to October 1972 activities, and October 1972 activities are compared to October 1973 activities. Race by sex differences in educational attainment are examined by comparing three predictor variables–socioeconomic status, aptitude, and high school class rank. Changes in self-concept and control of environment, resulting from unfulfilled plans, are also discussed. The final section raises nineteen significant questions for the fall 1976 followup and subsequent studies. (CP)

Descriptors—*Data Collection, *Followup Studies, *Graduate Surveys, High School Graduates, Longitudinal Studies, *National Surveys, Pretesting, Questionnaires, *Research Design, Research Methodology, Senior High Schools

Identifiers—*National Longitudinal Study Followup Questionnaire, *National Longitudinal Study High School Class 1972

This supporting statement accompanied the first followup questionnaire for the National Longitudinal Study of the High School Class of 1972, when it was submitted for government clearance. The first part of the statement gives the background, uses, and justification of the survey; the largest part describes the plans for the first follow-up (survey procedures, reports and tabulations, schedule); the last part discusses consultations and meetings leading to the development of the first followup questionnaire and concerns about respondent burden, sensitivity, and confidentiality. The results of the Census Bureau pretest and copies of the instruments are appended. (Author/CP)

The Standardized Growth Expectation: Implications for Educational Evaluation.

Pub Date—[Mar 78]

Note—26p.; Paper presented at the Annual Meeting of the American Educational Research Association (62nd, Toronto, Ontario, Canada, March 27-31, 1978) ; Best copy available

Pub Type— Speeches/Meeting Papers (150) — Reports - Research (143)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—*Achievement Gains, *Achievement Rating, Achievement Tests, Compensatory Education Programs, Elementary Secondary Education, *Expectation, Grade Equivalent Scores, *Norm Referenced Tests, Research Methodology, Standardized Tests, Student Testing, Test Interpretation, *Time Factors (Learning)

Identifiers—*Standardized Growth Expectation

Three assumptions underlying the use of norm referenced tests are examined: (1) that expressing treatment effects in a standard score metric permits aggregation of effects across grades; (2) commonly used standardized tests are sufficiently comparable to permit aggregation of results across tests; and (3) the summer loss of achievement observed in Title I projects is due to an actual loss in achievement and skills. Hypotheses regarding the standardized growth expectation (SGE) are also presented; SGE refers to the amount of growth (expressed in standard deviation form) that a student must demonstrate over the treatment interval to maintain standing in the norm group. SGE may also be conceptualized as the difference between the pretest percentile and the posttest percentile. Hypotheses are presented regarding the decrease in SGE which accompanies grade increases, and the variation in SGE according to the achievement test used. Further research topics investigating the validity of the SGE phenomenon are suggested. (Author/GDC)

Multiple Choice Converted to True-False: Comparative Reliabilities and Validities.

Pub Date—78

Note—10p.; Paper presented at the Annual Meeting of the Western Psychological Association (San Francisco, California, 1978)

Pub Type— Reports - Research (143) — Speeches/-Meeting Papers (150)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—*Achievement Tests, *Comparative Testing, Higher Education, *Multiple Choice Tests, Reaction Time, Response Style (Tests), *Test Construction, *Test Reliability, *Test Validity

Identifiers—Teacher Developed Tests, *True False Tests

Forty three-option multiple choice (MC) statements on a midterm examination were converted to 120 true-false (TF) statements, identical in content. Test forms (MC and TF) were randomly administered to 50 undergraduates, to investigate the validity and internal consistency reliability of the two forms. A Kuder-Richardson formula 20 reliability was computed for each form. Reliability of the MC form was then adjusted with the Spearman-Brown formula to equate testing time, since the MC form took three-fourths as much time to complete as the TF form. Adjusted reliability coefficients of the TF and MC forms were .80 and .73, respectively. To compare validity, a Pearson product moment correlation was computed between test score and grade point average; validity coefficients were .49 (TF) and .52 (MC). Results support the use of TF teacher made tests as alternatives to MC tests with no loss in reliability or validity. However, as previous studies have shown, these results are not obtained when MC items are revised and the range of the TF form is restricted. (CP)

Describing Conceptions of the World Around Us. No. 66.

Gothenburg Univ. (Sweden). Inst. of Education.

Pub Date—Aug 78

Note—44p.

Pub Type— Reports - Research (143)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—Cognitive Processes, Concept Formation, Educational Research, *Experience, *Individual Differences, Learning Processes, *Perception, *Philosophy, *Research Methodology, Research Needs, *Thought Processes

Two perspectives of descriptive research are discussed: first-order, which describes the world as it is; and second-order, which describes the world as people experience it. The latter perspective is known as experiential description. Research in a variety of disciplines, notably the work of Darwin, Werner, and Piaget, has provided experiential descriptions of the qualitatively different ways in which people perceive and understand reality. According to the experiential perspective, conceptions of understanding are not seen as individual qualities, for there can be no conceptions as such, just as there can be no learning and no structures of thought as such. Conceptions of reality are considered rather as categories of description to be used in facilitating the grasp of concrete cases of human functioning.

Since the same categories of description appear in different situations, the set of categories is thus stable and generalizable between the situations, even if individuals are moving between the different categories on different occasions. The totality of such categories of description denotes a kind of collective intellect, an evolutionary tool in continual development. (Author/CP)

The Georgia Assessment of Teacher Effectiveness (GATE) as a Predictor of Reading Achievement.

Pub Date—1 Dec 78

Note—21p.; Paper presented at the Annual Meeting of the National Reading Conference (28th, St. Petersburg, Florida, December 1, 1978)

Pub Type— Speeches/Meeting Papers (150) — Reports - Research (143) — Tests/Questionnaires 160)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Behavior Rating Scales, *Classroom Observation Techniques, *Effective Teaching, Grade 5, Grade 6, Intermediate Grades, Predictive Validity, *Reading Comprehension, *Student Behavior, Student Teacher Relationship, *Teacher Behavior, Teaching Methods, *Test Validity

Identifiers—*Georgia Assessment of Teacher Effectiveness

In a study of the relationship between teacher behavior and reading achievement, trained observers, using the Georgia Assessment of Teacher Effectiveness (GATE), observed 36 teachers and 820 students in grades five and six. The Iowa Tests of Basic Skills, Reading Comprehension subtest was administered and the socioeconomic status of each student was estimated. The observers visited each classroom six times and obtained a total of 12 GATE records for each classroom. Observable behaviors were recorded, based on 314 GATE items, which were adapted from five existing classroom observation instruments. The GATE has two parts: (1) observable student and teacher behavior, and (2) observable student and/or teaching cognitive and affective behaviors and teaching strategies. Results of the study indicated that: (1) 13 of 15 dimensions found to be indicative of effective teaching in a separate study can be measured by the GATE; (2) six of the dimensions are significant predictors of reading achievement in 36 classrooms; and (3) statements derived from the effective teaching study were supported. Pub Type— Guides - Non-Classroom (055) — Reference Materials - Vocabularies/Classifications (134)

EDRS Price - MF01 Plus Postage. PC Not Available from EDRS.

Descriptors—*Achievement Tests, *Aptitude Tests, *Criterion Referenced Tests, *Intelligence Tests, *Norm Referenced Tests, Parent Role, *Student Testing, Test Interpretation, Test Results

Basic test terminology is explained for parents of school children. Terms which are defined include aptitude, achievement, criterion referenced tests, norm referenced tests, and intelligence quotient. Brief discussions of the advantages and limitations of tests are included. Testing is seen as providing valuable information to the school, students and parents. Three suggestions made to parents to help their children do well on tests include: (1) encouraging the child to take the test seriously; (2) avoiding upsetting the child prior to taking a test; (3) making sure the child has adequate sleep before the test and proper nourishment the day of the test. Identifiers—*Elementary Secondary Education Act Title I, Pennsylvania (Philadelphia), Philadelphia School District PA

Technical reports of projects funded under the Elementary and Secondary Education Act Title I and summer components of the projects in the Philadelphia, Pennsylvania school system are presented. Following a summary statement, each project is described separately and contains information on the project's rationale, expected outcomes, mode of operation, previous evaluative findings, current implementation, and attainment of objectives. Summer program components focused on students in various institutions for neglected and delinquent children. Information for each component includes goals set, activities employed to attain goals, goals attained, goals not attained, and changes suggested by project administrators. Title I programs were divided into six categories: (1) comprehensive reading; (2) comprehensive mathematics; (3) programs for limited English-speaking-ability children; (4) social sciences; (5) supportive services; and (6) nonpublic school projects. Identifiers—Austin Independent School District TX, Texas (Austin)

The effects of the mandated quarter system and the expanded and revised high school curriculum were assessed in Austin, Texas, based upon achievement test scores, attendance records, and objectively collected opinion data in seven areas of concern. The seven decision questions which affected allocation of funds, personnel, time and material concern: (1) making major alterations to the curriculum; (2) changing the number of credits and the minimum reading and mathematics competencies required for graduation; (3) modifying the responsibilities of high school counselors; (4) instituting year-round schooling; (5) altering the academic advising procedures; (6) improving eighth-grade orientation to the high school curriculum; and (7) coordinating the content of the same courses taught at different schools. Evaluation findings consist of answers, with supportive data, to 28 questions, as well as 12 miscellaneous findings. (MH)

Identifiers—Austin Independent School District TX, Elementary Secondary Education Act Title I, Texas (Austin)

The final evaluation of the Elementary and Secondary Education Act Title I Migrant Program in the Austin, Texas Independent School District is reported. The program consisted of instructional, student recruitment, parental involvement, health services, and clothing components. The instructional component included programs for pre-kindergarten children, secondary level (sixth grade and above) reading classes and secondary oral language development classes. The purpose of the recruitment and involvement component was to identify and register migrant children and to establish local Parental Advisory Councils. Health service activities included medical and dental treatment for students referred by a pediatric nurse practitioner. Funds to purchase clothing for needy migrant children comprised the clothing component. Evaluation of the program served three purposes: (1) to define the population served and to identity its needs; (2) to determine how the program was being implemented; and (3) to determine if the program met its objectives. The evaluation centered on needs assessment data, process data, outcome data, and miscellaneous data. This material is presented as answers and supportive data to a series of 44 questions including data obtained from parents, teachers, and administrators. (MH)

Identifiers—Austin Independent School District TX, *Elementary Secondary Education Act Title I, Texas (Austin)

Austin's Title I program provided 6,300 students with supplemental reading instruction, guidance and counseling, and parent involvement services. The evaluation focused upon answering and providing supporting data for two system-level and twelve program-level decision questions; forty-one evaluation findings were reported. Supporting data were collected from classroom observation; questionnaires for teachers, parents, principals, and Title I staff; student records; and standarized tests. The majority of Title I students achieved below the national norms for reading and mathematics at all grade levels except first, and fell progressively behind through the fifth grade. Needs were identified in the areas of reading and mathematics achievement and attendance. Coordination of Title I activities with other compensatory programs was minimal. The program's use of school staff and parents did not produce improved achievement. No answer was available about the best grade level for delivery of Title I services. The methods for identifying Title I schools and students were successful in locating schools with the lowest average achievement, and students within those schools with the lowest achievement levels. Teacher expectation was either unrelated to student achievement or unmeasurable through questionnaires. (Program descriptions and characteristics of the participating schools are provided). (CP)

Attitudes Towards the School, the Teacher and the Classmates at the Class Level and the Individual Level. No. 75.
Gothenburg Univ. (Sweden). Inst. of Education.
Pub Date—Jan 79
Note—21p.
Pub Type— Reports - Research (143)
EDRS Price - MF01/PC01 Plus Postage.
Descriptors—*Classroom Research, Discipline, *Factor Structure, Foreign Countries, Grade 6, Individual Characteristics, Intermediate Grades, Peer Acceptance, *Peer Relationship, Personality Assessment, *School Attitudes, *Student Attitudes, *Student Teacher Relationship
Identifiers—School and We Questionnaire, Sweden
Attitudes toward school and three personality characteristics (introversion, impulsivity, and emotional stability) were measured in Swedish students from 60 sixth grade classes. The School and We Questionnaire (SAW) and a Swedish translation of the High School Personality Questionnaire were completed by 1,319 students. Secondary data analysis was conducted at two levels of aggregation: pupils within classes, and differences between classes. The same factors were found at both levels: (1) attitude toward school and schoolwork; (2) attitude toward teacher; (3) relations with classmates; (4) social relations in the entire class; and (5) class behavior or discipline. At the two levels of data analysis, these factors accounted for different amounts of variance. At the class level, factors reflecting attitudes toward teacher and characteristics of the entire class were strong; while at the individual level, factors reflecting school attitudes and the individual's relations with classmates were strong. Impulsivity accounted for the most variance in SAW scores. Within a class, impulsivity was negatively correlated with attitudes toward school and teacher. Between-class analysis indicated a high negative correlation between impulsivity and class discipline. Introversion was negatively correlated with peer relations, while stability was positively correlated. (Author/GDC)

Descriptors—Academic Aptitude, *Aptitude, *Computer Programs, *Data Analysis, Elementary School Teachers, *Factor Analysis, *Learning, *Mathematical Models, Mathematics Instruction, Multiple Regression Analysis, Predictor Variables
Identifiers—*Aptitude Treatment Interaction, *LISREL Computer Program
The Joreskog and Sorbom LISREL (linear structural relations) method is investigated as an alternative to regression analysis in studies of aptitude-treatment interactions (ATI), to solve problems caused by unreliability of measurements and by large sets of variables. A study reported by M.J. Behr is reanalyzed. This study investigated relations between verbal and figural aptitude variables and outcome variables within one verbal and one figural treatment, teaching modulus seven arithmetic to prospective elementary teachers. The relations between latent aptitude variables and latent outcome variables are studied in four LISREL models with either one or two latent aptitude variables (interpretable as a general factor and verbal and figural ability, respectively), and with two sets of latent outcome variables (interpretable as learning/retention and computation speed/understanding). No significant interaction is found, but tendencies towards interaction are noted. It is concluded that LISREL has several advantages in the analysis of ATI studies, but also that the power of the test of ATI effects is low, particularly when there is a high correlation between the latent aptitude variables. This collection of cognitive and affective objectives, and related measurement instruments, concerns knowledge of and attitudes toward prescription drugs, tobacco, alcohol, and illegal drugs. It describes procedures used in developing, field testing, administering, and scoring the tests. Objectives are listed by grade range: secondary (grades 7-12) and intermediate (grades 4-6). Each of the 12 objectives includes a page reference to the appended test. Measures can be grouped into six categories (1) knowledge; (2) direct report–students react to statements supporting or discouraging drug use, describe local drug availability, and report confidentially their own or their friends' drug use; (3) indirect–situational tests; (4) archival–school staff report drug abuse referrals to public agencies; (5) observation–teachers record suspected drug-related symptoms of students; and (6) planning information–students rate the credibility of various sources of drug information. This collection of fifty objectives, related sample items, and directions for administering and scoring, is divided into three sections. The first, growth and development, deals with basic factual information relating to sex education; both animal and human biology are included. The second section, social and emotional growth, deals with the psychological aspects of sexual development. The third section is concerned with clarifying values on sex-related social issues, such as sex role, abortion, and homosexuality. Each of these sections is subdivided into three levels: elementary, junior high school, and senior high school and above; these levels correspond to maturity and ability level, rather than chronological age. For each objective, sample items are suggested. Many items require interpretation of anatomical illustrations. (Author/CP)

Document Not Available from EDRS.
Descriptors—Criterion Referenced Tests, Educational Objectives, Elementary Education, *Item Banks, Movement Education, *Performance Tests, *Physical Education, Physical Fitness, *Psychomotor Objectives, *Psychomotor Skills, Recreational Activities, Self Concept Tests
This collection contains fifty physical education objectives, related sample items, and directions for administering and scoring, and is divided into four categories. The first measures movement skills: body awareness, perception, locomotion, axial skills, balance, and gross motor coordination in games and sports. The second category measures posture, components of physical fitness, and their development. Understanding one's own physical capabilities and cooperating when participating in group activities is assessed in section three, and the final category measures participation in and knowledge of recreational opportunities. Objectives are arranged in order of increasing complexity. Levels of difficulty are sometimes specified as a guide, but they do not necessarily correspond to grade levels. The collection is designed to incorporate both the traditional and contemporary approach to the teaching of physical education. For example, there is an attempt to combine the teaching of commonly used sports skills with the teaching of the motor coordination skills that sports demonstrate. Nearly all of the items are performance tests–requiring demonstration of motor skill, strength or physical development–rather than paper and pencil tests. (CP)

Descriptors—*Attitude Tests, *Changing Attitudes, *Cultural Awareness, Cultural Images, Elementary Education, *Multicultural Education, Play, *Racial Attitudes, *Test Validity
Identifiers—People Place
Doll play activities were used to measure attitude change in 270 black, Mexican American, and white students who participated in a multicultural awareness project. The children, aged second through sixth grade, visited People Place Multicultural Center, where they experienced six different settings simulating the cultures of Africa, China, Germany, India, Mexico, and the United States. A control group of 90 children participated in neutral activities. Attitude change was measured by pre- and post testing with three six-inch dolls representing a black, a Mexican American, and a white child. The child was directed to choose one doll representing himself or herself, and to place the other two dolls somewhere in the same area. Proximity of the other dolls to the one representing the student was the dependent variable. Positive attitude change was indicated when the proximity of the dolls increased from pretest to post test. Data were analyzed by analysis of variance of three factors: grade level; ethnic or racial group; and exposure to People Place. Results indicated that the People Place experience led to a favorable attitude change toward children of other cultures, at least on a short-term basis. (GDC)

Identifiers—University of Nebraska Omaha
In order to evaluate the format and use of the instructor evaluation instrument at the University of Nebraska, Omaha, an urban commuter campus, 1,238 undergraduates answered a 31-item questionnaire. Results indicated that students' choices of classes were largely dictated by requirements of

their major and by their work schedules. The six most significant sources of information which influenced course decisions were in order of importance; (1) class schedule; (2) previous experience with a professor; (3) friend's recommendation; (4) course description; (5) faculty recommendation; and (6) instructor evaluation. It was concluded that the current instructor evaluation form was not serving the needs of the student body. Samples of the instructor evaluation form and the student survey on instructor evaluation, as well as survey results, are appended. (MH)

Identifiers—*National Council on Educational Research, *National Institute of Education
The National Council on Educational Research (NCER), and its parent organization, the National Institute of Education (NIE), were established by law in 1972. NCER functions as an advisory arm to NIE, by establishing general policies; recommending programs to strengthen educational research and to disseminate and implement research findings; conducting research; and preparing annual reports on the current status of educational research and on the activities of NIE. During 1975, NCER reviewed the 1976 NIE budget proposals, based on the priorities established by NCER for the continued evaluation of NIE programs and products, and appointed consultants to study NIE's funding policies and its role in the development of a national educational research and development system. In this annual report, NCER has reviewed NIE's programs, which include: (1) basic skills; (2) educational equity; (3) education and work; (4) finance and productivity; (5) school capacity for problem solving; and (6) information dissemination and educational resources. A list of organizations performing research and development in education and a review of NIE's 1975 expenditures are appended. (MH)

The Generalizability of District Means Using Multiple Matrix Sampling.
Pub Date—Mar 78
Note—15p.; Paper presented at the Annual Meeting of the American Educational Research Association (62nd, Toronto, Ontario, Canada, March 27-31, 1978)
Pub Type— Speeches/Meeting Papers (150) — Reports - Research (143)
EDRS Price - MF01/PC01 Plus Postage.
Descriptors—*Achievement Tests, *Analysis of Variance, Basic Skills, Elementary Secondary Education, Grade 6, Grade 12, Item Sampling, Mathematical Models, Sampling, *Statistical Analysis, Statistical Studies, *Test Reliability
Identifiers—*Generalizability Theory, *Survey of Basic Skills Grade 6 (California), Survey of Basic Skills Grade 12 (California)
The concept under investigation was the reliability of estimates of mean scores of groups under various assumptions of multiple-matrix sampling when reliabilities are computed according to procedures based on generalizability theory. Four different cases were compared with respect to the generalizability coefficients depending upon whether pupils and/or items were assumed to have been sampled from finite or infinite populations. In the experimental design, schools were nested within districts, students were nested within schools, items were nested within forms, and forms were crossed with schools within districts. Tests of reading, written expression, and mathematics were used in the study for students in grade 6 and in grade 12. Each test consisted of from 128 to 198 items, allocated without duplication into 16 or 18 approximately parallel forms with 8 to 11 items per form. Thirty-one school districts were selected for the sixty grade sample and 33 for the twelfth grade. Tables present the random effects analysis of variance design, the estimated variance components for each grade, and the resulting generalizability coefficients. (Author/CTM)

The Lakota Needs Assessment: Purpose, Process and Outcomes.
Pub Date—28 Mar 78
Note—23p.; Paper presented at the Annual Meeting of the American Educational Research Association (62nd, Toronto, Ontario, Canada, March 27-31, 1978)
Pub Type— Speeches/Meeting Papers (150) — Reports - Research (143)
EDRS Price - MF01/PC01 Plus Postage.
Descriptors—*Community Surveys, Curriculum Evaluation, *Educational Assessment, *Educational Needs, Educational Objectives, Elementary Secondary Education, Policy Formation, *Public Opinion, School Community Relationship, *School Districts, School Policy
Identifiers—*Lakota School District OH, Ohio (West Chester)
This needs assessment attempted to identify the following: (1) strong curriculum programs; (2) critical needs in current programs; (3) areas in which new programs were needed; (4) which recommended new program areas had community financial support; (5) communication problems between the school district and the community; (6) attitudes toward existing school policies; (7) attitudes toward year-round schools; and (8) overall school district rating. Data analysis was based on five forms of a questionnaire developed for and returned by 574 students (grades 6-12), 270 parents, 254 teachers, 22 non-parent community members, 21 alumni, and 16 administrators. The needs assessment emphasized critical need areas in existing programs. Respondents were asked to rate program goals by level of importance and by actual accomplishments. Career education, social studies (citizenship), drug education, and reading were identified as critical need areas–having above average importance and below average achievement. A program was considered successful (low level need) if goal achievement ratings were high, regardless of the importance rating. The needs assessment influenced the development or improvement of curriculum programs, particularly in reading. Public awareness of the schools was found to have increased. It was recommended that future studies focus on more specific program areas. (CP)

Descriptors—*Educational Needs, Educational Objectives, Evaluation Methods, Models, *National Surveys, *Needs Assessment, Rating Scales, *Research Methodology, *Research Problems, Research Utilization, Response Style (Tests), Secondary Education, Urban Education, *Vocational Education
The vocational education program needs of the nation's large cities were assessed by a mail survey of vocational educators in 106 major urban centers. Several procedural problems in generating appropriate instrument content and initial problems in obtaining data from respondents were encountered. Goal and objective statements generated through a review of current literature and the opinions of a sample of experts were not acceptable to local vocational educators. To overcome these problems, an open-ended survey and content analysis procedure was used to generate a set of goals and objectives judged acceptable by local vocational educators. Early exploration of alternative strategies indicated that a discrepancy methodology would reduce the rate of survey returns. Consequently, the study relied on a methodology requesting respondents to rate the importance of educational needs. Because of the large number of goals and objectives identified by the first step of the procedure, multiple forms were developed and utilized in the study. A response rate of over 65 percent was obtained. This experience in conducting a national needs assessment study causes us to question the applicability of the discrepancy approach for large studies. Alternative strategies of direct ratings of needs may be more feasible. (Author)

Descriptors—*Behavior Rating Scales, Factor Structure, Supervisors, *Supervisory Methods, Teacher Attitudes, *Teacher Supervision, Test Reliability, *Test Validity
Identifiers—*Nondirective Supervisory Behavior Scale
Using the constructs of Rogers, Ellis, and Barrett-Lennard, a twenty-five item Likert-type instrument, the Non-Directive Supervisory Behavior Scale, was developed to measure directive vs. non-directive supervisory behavior. One hundred ninety-five in-service teachers, randomly selected from two school districts, completed the twenty-five item questionnaire describing the behavior of their supervisors during supervisory conferences. The data were subjected to factor analysis and subsequent alpha-internal reliability estimates. Results indicated that the instrument is a one-factor or one-scale measure of supervisor non-directive behavior, with eleven of the questionnaire's twenty-five items comprising the scale. Alpha-internal reliability was estimated at .83. An estimate of the construct validity was based on the correlation between this scale and the pre-established Barrett-Lennard Relationships Inventory; both were administered concurrently to twenty-three teachers. Correlation was .67, corrected for attenuation at .80. The scale and supporting data are attached. (Author/CP)

Descriptors—*Educational Legislation, *Educational Research, Federal Government, *Federal Legislation, *Federal Regulation, *Government Role, Policy Formation, *Political Influences, Research and Development Centers, Research Problems
The impact of federal legislation upon educational research and evaluation is explored in detail within a political systems framework. Specific laws have affected the financial support, organization, and function of research and development services. These laws include: the Cooperative Research Act (1954); the Elementary and Secondary Education Act (1965) which authorized the Educational Research and Development Centers and the Regional Educational Laboratories; and the Education Amendment of 1972 which created the National Institute of Education. The influence of federal legislation on individual rights has also been considerable; specifically the Civil Rights Act (1964); the Freedom of Information Act (1966); the National Research Act (1974); and the Family Educational Rights and Privacy Act (1974). The following implications should be recognized before the full notion of impact can be understood. (1) The relationship between federal legislation and educational research is essentially political, application of the political systems theory is appropriate. (2) A public relations campaign is needed to offset misconceptions about educational research. (3) Federal

impact is considerable and partly uncontrollable. (4) The entire field needs a balanced, continuous, and integrated federal legislative approach which recognizes the dangers of polarization between researchers and practitioners, and between researchers and subjects. (CP)

Descriptors—*Community Characteristics, *Housing, Intermediate Grades, Metropolitan Areas, *Neighborhood, *Overpopulation, Performance Factors, Population Distribution, Racial Composition, *Reading Achievement, *Socioeconomic Status, Urban Schools

The relationship between neighborhood characteristics and achievement level was investigated in six metropolitan schools, after accounting for neighborhood type. Neighborhoods were classified into four types: middle socioeconomic status white, low status white, middle status black, and low status black. Additional neighborhood characteristics–density and housing conditions–were also studied to determine their relationship to school achievement, and whether or not such relationships vary in different types of neighborhoods. Reading achievement data were gathered on fifth or sixth graders in six large urban school districts which had been classified according to density of housing; the schools were classified according to neighborhood type. Valid data were not available for middle status black neighborhoods. Four major conclusions were made regarding the correlation between neighborhood and school achievement. (1) High density was related to low achievement in low status neighborhoods. (2) High density was not associated with low achievement in middle status neighborhoods. (3) Housing value of owner-occupied housing was generally related to achievement. (4) Percent of vacant housing units was related to low achievement in four of the six districts. (Author/GDC)

Descriptors—*Attitude Tests, Black Attitudes, Blacks, Caucasians, *Changing Attitudes, Educational Programs, *Military Personnel, *Military Training, Postsecondary Education, Program Evaluation, *Race Relations, *Racial Attitudes, Racial Discrimination, Reverse Discrimination, Test Wiseness

Identifiers—*Racial Attitudes and Perceptions Survey

The Racial Attitudes and Perceptions Survey (RAPS) consists of four scales: perceived discrimination against blacks; attitude toward racial interaction; feelings of reverse racism; and racial climate. This instrument was administered to approximately 10,000 military personnel in a variety of research designs to determine the impact of race relations training programs on attitudes and perceptions. This training included 18-hour unit training programs, 4-hour courses in formal schools, and 2- to 4-week race relations discussion leader courses. Training impact, in general, was found to be very small as measured by change on RAPS scale scores. Where changes occurred, they tended to be in the following directions: higher scores, for perceived discrimination against blacks and attitude toward racial interaction, and lower scores for feelings of reverse racism. No conclusions were made regarding perception of racial climate. Trained subjects scored higher on content-type questions than did untrained subjects, and training was generally considered valuable. Course instructors appeared to have diverse instructional goals. A significant testing effect was noted when untrained control group subjects were administered the test twice; scores declined on the post test. The RAPS was found to be useful in evaluating race relations programs, but should be used along with other evaluation methods. (Author/CP)

Descriptors—*Bayesian Statistics, *Cutting Scores, Hypothesis Testing, *Mastery Tests, Mathematical Models, *Performance Tests, Predictive Ability (Testing), *Probability, Simulation, *Student Ability

Identifiers—Test Length

A multiparameter, programmable model was developed to examine the interactive influence of certain parameters on the probability of deciding that an examinee had attained a specified degree of mastery. It was applied within the simulated context of performance testing of military trainees. These parameters included: (1) the number of assumed mastery states–master, nonmaster, and perhaps intermediate (likely to soon achieve mastery); (2) the prior distribution of scores from similar examinee groups; and (3) the number of test trials or items administered. The results of several simulations showed that the degree of confidence that a decisionmaker can have about the testee's mastery is markedly affected by the values for the three parameters, and the effects of their combination. Using the Bayesian model, test length and costs could be reduced–as long as the prior information was accurate and valid for the particular group of examinees. Results of the simulation also showed that a test may be too short to be of decision-making value. (Author/GDC)

Identifiers—Test Length

Alternative mathematical models for scoring and decision making with criterion referenced tests are described, especially as they concern appropriate test length and methods of establishing statistically valid cutting scores. Several of these approaches are reviewed and compared on formal-analytic and empirical grounds: (1) Block's approach to setting mastery standards, involving student performance and academic requirements; (2) Crehan's classification, comparing scores of students who have and who have not completed training; (3) the probabilistic models of Macready, Dayton, and Emrick, which assume an equal proportion of masters and nonmasters; (4) the binomial distribution model, which allows for partial acquisition of proficiency; (5) the Bayesian model, which considers prior experience; (6) Rasch's one-parameter logistic model, which yields person-free test calibrations and item-free person measurements; and (7) the regression approach of classical test theory, which enables the estimation of true scores to be made from observed scores. Examples of these approaches are given, as well as their advantages, disadvantages, and ambiguities. (GDC)

Descriptors—*Attitude Tests, Black Attitudes, Blacks, Caucasians, *Military Personnel, Postsecondary Education, *Race Relations, *Racial Attitudes, Racial Discrimination, Racial Integration, Reverse Discrimination, Test Construction, *Test Reliability, *Test Validity

Identifiers—*Racial Attitudes and Perceptions Survey

The Racial Attitudes and Perceptions Survey (RAPS) was developed to obtain information from black and white military personnel, including reports of the frequencies of specific discriminatory behaviors and the tension levels associated with each race. The instrument was evaluated in terms of its construct validity and its reliability. Attitudes and perceptions were measured in four areas: (1) perceptions of discrimination against blacks; (2) attitude toward racial interaction; (3) feelings of reverse racism; and (4) racial climate. Evidence indicated the instrument was valid, and reliability estimates were satisfactory. Analysis across demographic variables indicated that several variables were related to RAPS results, with race being the most important. Results indicated that blacks perceived more racial discrimination than whites: both blacks and whites favored racial interactions: and more whites than blacks felt the racial climate in the military was favorable. Several recommendations are made regarding the use of the RAPS at the local and command levels. The test itself is appended. (Author/CP)

Descriptors—Group Norms, Higher Education, Interest Scales, *Interest Tests, Senior High Schools, *Sex Differences, *Sex Discrimination, Sex Fairness, *Test Bias, Testing Problems, *Test Validity, *Vocational Interests

Sex restrictiveness and sex bias in occupational interest scales are reviewed, and some alternative

solutions are briefly discussed. Traditionally, it was thought that sex restrictive interest inventories merely reflected the inherent differences between males and females. The author defines sex restrictiveness according to the degree that the distribution of career options suggested to males and females is disproportionate. Conversely, an inventory is not sex restrictive if each career option is suggested to similar proportions of males and females. The sex restrictive test is not necessarily biased, however, since it may have to be restrictive in order to be valid. Different definitions of validity may affect this judgment. A sex restrictive test may still be defined as sex fair if its publisher has demonstrated that its restrictiveness is necessary for its validity. A brief review of various studies about the interest of college bound and college students indicates that vocational interest inventories do not have to be sex restrictive in order to be valid. Study of the unisex edition of the American College Test interest scale (UNIACT) indicates that sex balanced reporting procedures, suggesting similar interest patterns for males and females, have promising validity. Further research is recommended. (Author/GDC)

Descriptors—Academic Achievement, Algorithms, Calculation, Elementary Education, *Elementary School Mathematics, Elementary School Students, *Formative Evaluation, Mastery Learning, *Mathematical Logic, *Mathematics Instruction, Program Evaluation, Student Evaluation, *Test Interpretation, *Test Results

Clinchy and Rosenthal's error classification scheme was applied to test results to determine its ability to differentiate the effectiveness of instruction in two elementary schools. Mathematics retention tests matching the instructional objectives of both schools were constructed to measure the understanding of arithmetic concepts and the ability to perform computations and algorithmic operations. Inter-school comparisons were made with respect to the types of errors made: computational, algorithmic, and omission. Fifth grade students in one school made significantly fewer computational errors than in the other school. In the remaining grades, there were no significant differences. Additional practice exercises were recommended to correct this error. Other students made significantly more algorithmic errors and a four-step approach to teaching algorithms was outlined to alleviate this weakness. Significant inter-school differences in omissions errors were noted in grades 5 and 6–the students concerned would also benefit by a more systematic approach to algorithm teaching. In sum, the error classification scheme can be used to evaluate instructional programs and to suggest instructional improvements. (CP)

Descriptors—Administrator Attitudes, *Educational Researchers, Evaluation Needs, *Evaluators, Higher Education, *Job Skills, Research Needs, *Research Skills, Secondary Education, Teacher Attitudes, *Vocational Directors, *Vocational Education Teachers

A 56-item rating scale of research and evaluation competencies for vocational educators was developed. Four skill categories were included: (1) reviewing and analyzing completed research; (2) conducting research; (3) conducting evaluation; and (4) managing research and evaluation activities. Respondents were asked to rate each of the items, ranging from very important to not important. The questionnaire was mailed to the groups of vocational classroom teachers, vocational administrators and supervisors, county vocational directors, vocational teacher educators and researchers. The overall rate of questionnaire return was 67%. The mean score for 17 of the competencies was not significantly different; these skills were considered to be common requirements for the various groups. Many of the remaining 39 competencies could also be considered common requirements, since statistical differences between these two groups were slight. Analyses regarding the order of importance of acquiring these skills suggested that those skills named by local school district personnel were of primary importance; skills in research design and statistical analysis could be acquired later. Implications for competency based training programs are briefly discussed. (Author/GDC)

Descriptors—Case Studies, *College Programs, Curriculum Evaluation, *Evaluation Methods, *Evaluators, Group Unity, *Higher Education, Information Utilization, Institutional Characteristics, *Program Evaluation, Surveys, *Systems Approach

Identifiers—*Evaluation Problems

A comparative case study of seven universities initially focused on: (1) whether and how program evaluation systems differ from other systems approaches, such as management information and program budgeting; (2) desirable degree of overlap between evaluative recommendations and administrative action; and (3) limitations of program evaluation. Site visits raised several issue statements. First, what was the effect of staffing–specifically, the use of outside consultants, and the method of selecting evaluators? Second, did institutional tradition, campus governance, and state coordination alter the evaluation? Third, were the effects of formal evaluation structures, (checklists, protocols, schedules, task forces) a healthy boost to either institutions or to subsequent evaluations? Fourth, was there an advantage to linking program evaluation systems to budget systems? An assessment of these issues led to the conclusion that formal systems in higher education were new and significant modifications of more traditional program review activities such as accreditation, national ratings, institutional research, and institutional self-study. Descriptors—Counseling Goals, Counselor Attitudes, *Counselor Qualifications, *Counselor Role, Counselor Training, Graduate Students, Higher Education, Models, Rating Scales, *Role Perception, *Student Attitudes, *Student Needs, *Test Validity

Identifiers—*Counselors Foci Checklist

Counselor Trainees completed the author's Counselor's Foci Checklist. This rating scale explores seven concerns in the counseling profession: (1) clarifying roles; (2) understanding counseling theories; (3) being firm with clients; (4) being liked by clients; (5) being respected by professionals; (6) developing empathic listening skills; and (7) facilitating client growth. A concern is defined as a perceived need for professional growth. To establish validity of the checklist, results were analyzed using a principal components procedure. Results indicated a substantial correspondence between the structure of the counseling students' concerns, and the hypothesized structure of these concerns; furthermore, the checklist can be used to group students by their concerns. Findings have both theoretical and practical implications for counselor education. (Author/CP)

Identifiers—Iowa

Iowa legislators responded to the national accountability trend in 1975 by mandating a statewide needs assessment. This paper examines the activities of fifteen selected districts in terms of: (1) a statistical analysis of community, teacher, and student rankings of eighteen cognitive and affective educational goals; (2) statistical analysis of community, teacher, and student perceptions of how well districts meet the eighteen goals; (3) a discussion of the processes utilized by schools to select needs; (4) a description of the curriculum models designed to meet district needs; and (5) a discussion of the role of the community advisory group in curriculum decision making. The goals were derived from the Phi Delta Kappa Model for needs assessment. (CP)

Identifiers—Cancer, *Patient Education

Procedures for the evaluation of patient education programs have been slow to evolve; the majority of programs, in fact, remain unevaluated. Patient education efforts, particularly with cancer patients, are effective in enhancing recovery, alleviating anxiety, and facilitating compliance. Patient education should minimize patient dependence on others in the recovery process. Its design must insure cost-effectiveness. A conceptual model has been designed for the evaluation of patient education; quasi-experimental design appears to be practical. Educational programs have multiple objectives with immediate and intermediate objectives being most crucial because of time and cost constraints and available techniques. Success is dependent on the criteria employed for evaluation. Patient education best lends itself to these criteria: effort, performance, adequacy, efficiency, and process. A systems design evaluation model helps clarify cause-effect associations and provides accountability with examples of input, intervening, and output variables. (Author/GDC)

Descriptors—*Documentation, Elementary Secondary Education, Evaluation Criteria, *Evaluation Methods, Higher Education, *Pilot Projects, *Program Descriptions, Program Development, *Program Planning
Identifiers—*Meta Evaluation
Meta evaluation, or the evaluation of evaluations, was applied to a technology for program documentation and evaluation used in a mainstreaming project. The technology consisted of four phases: (1) planning for decision-making; (2) documenting actual program outcomes; (3) implementing decisions; and (4) instituting program renewal. This pilot meta evaluation focused only upon the planning board and detail file tasks of phase 1. These tasks formed a plan for day-to-day project management. The eight people involved in the development of the planning board and detail file were questioned regarding implementation, quality, and use. The pilot meta evaluation methods were generally considered to be clear, thorough, and appropriate; however, several modifications for full-scale meta evaluation were suggested. (CP)

Identifiers—Vocational Interest Inventory (Lunneborg)
To determine the most appropriate use of interest scales in predicting college major at graduation, data from the Vocational Interest Inventory were analyzed. Subjects were 2,175 college graduates who had taken the inventory as high school juniors, and had graduated in one of 22 majors. The effects upon accuracy of classification and conceptual clarity of discriminant function results were compared, based on three different approaches to the sex composition of college major or criterion groups. On both grounds, naturally-occurring mixed-sex groups were preferred to either separate analyses by sex or to statistically balancing the sexes within major groups. (Author/CP)

Guidelines are presented to help college students prepare for taking tests, with particular instructions for objective, essay, and quantitative tests. A check list suggests the types of information which should be known before starting to study for a test–such as type of questions and probable content. Techniques for studying include outlining course content and mnemonics. Strategies for taking objective tests (matching, multiple choice, true-false, and direct answer) direct the student to pay attention to specific words and phrases. Directions for taking essay tests stress the organization of ideas and time limits. Quantitative examinations–described as frequently given in business, mathematics, and science classes–must be carefully paced so that the students' time is efficiently spent. Sample test exercises are presented for each of the main types of tests–objective, essay, and quantitative–and for self-pacing. The appended key work list defines and interprets words which are frequently used in examination questions. (GDC)

The Regents Competency Testing Program. Setting Standards in the Basic Skills as a Requirement for High School Graduation. Information Brochure.
New York State Education Dept., Albany.
Pub Date—Sep 78
Note—34p.
Pub Type— Tests/Questionnaires 160)
EDRS Price - MF01/PC02 Plus Postage.
Descriptors—Academic Achievement, Achievement Tests, *Basic Skills, *Graduation Requirements, *Minimum Competency Testing, Program Descriptions, Reading Comprehension, Reading Level, Secondary School Mathematics, Senior High Schools, State Programs, *State Standards, *State Surveys, *Testing Programs, Writing Skills
Identifiers—New York, *New York State Regents Examinations
The New York State Regents Competency Testing Program is described. Competency tests have been developed in the basic skills of reading, writing, and mathematics, for two purposes: (1) to identify those students who need remedial help; and (2) to assure that students receiving high school diplomas have acquired adequate competence in these areas. The major portion of this document consists of sample test items in reading comprehension, writing, and high school mathematics. The correct answers for objective test items and criteria for evaluating the writing exercises are included, as well as suggested standards to be required of New York students. A brief questionnaire, designed to solicit educators' opinions of these standards, is appended. (GDC)

Comparison of Predictive Accuracy on Several Types of Factor Scores.
Pub Date—Aug 78
Note—17p.; Paper presented at the Annual Meeting of the American Psychological Association (86th, Toronto, Ontario, Canada, August, 1978)
Pub Type— Speeches/Meeting Papers (150) — Reports - Research (143)
EDRS Price - MF01/PC01 Plus Postage.
Descriptors—Comparative Statistics, Correlation, *Factor Analysis, *Multiple Regression Analysis, Predictive Measurement, Predictive Validity, *Scores, Simulation, *Weighted Scores
Identifiers—*Factor Scores
Several advantages to the use of factor scores as independent variables in a multiple regression equation were found. To help select the most desirable type of factor score on which to calculate a regression equation, computer-based Monte Carlo methods were used to compare the predictive accuracy upon replication of regression of five "complete" and four "incomplete" factor score estimation methods. For several levels of multiple correlation (R2=.30, .50, and .70), and for several subject-to-variable sampling ratios (3/1, 5/1, and 10/1), prediction on incomplete factor scores showed significantly better double cross-validated prediction accuracy than on complete factor scores. Moreover, the unique unit-weighted factor score was superior among the incomplete methods. (Author/CP)

Item Response Differences and Their Implications.
Pub Date—31 Aug 78
Note—20p.; Paper presented at the Annual Meeting of the American Psychological Association (86th, Toronto, Ontario, Canada, August 31, 1978)
Pub Type— Speeches/Meeting Papers (150) — Reports - Research (143)
EDRS Price - MF01/PC01 Plus Postage.
Descriptors—Adults, *Blacks, Caucasians, *Group Norms, *Individual Characteristics, Item Analysis, Personality Tests, *Racial Differences, *Response Style (Tests)
Identifiers—*Minnesota Multiphasic Personality Inventory
This study examined similarities and differences between blacks' and whites' responses to rarely endorsed Minnesota Multiphasic Personality Inventory (MMPI) items, as well as those items responded to most differently by the ethnic groups. Our subjects, 882 normal black middle-class adults from Alabama, Michigan and North Carolina, were compared to the Minnesota normative sample. White endorsement patterns agreed with items rarely endorsed by blacks, but black endorsement patterns agreed with only one-third of the items rarely endorsed by whites. This new race-sensitive F scale may be a better measure of deviant responding for blacks than the standard scale. Race-discriminating items suggested that blacks (in comparison with whites) emphasized feelings of self-importance, were relatively cynical about motives controlling behavior, and tended to be alienated and unhappy. Whether this characterization is accurate or an artifact of the item content of the MMPI cannot be answered by data currently available. (Author/GDC)

Descriptors—Educational Legislation, Educational Programs, *Evaluation Methods, *Evaluation Needs, *Federal Regulation, Field Studies, Models, Postsecondary Education, *Program Evaluation, Secondary Education, *State Programs, *Vocational Education
This paper describes work in progress on a project designed to provide the framework of an evaluation system which states may use to comply with evaluation requirements in the Education Amendments of 1976 (Public Law 94-482). The specific objectives are to: (1) develop and field test a process model to evaluate planning and operational processes of formally organized vocational education programs and assess the provision of services to special populations; (2) develop a product-impact model to evaluate student achievement resulting from participation in selected occupational programs; (3) develop and field test a product-outcome model to evaluate the career development of vocational students, both those completing and those leaving programs; and (4) prepare a guide describing the models, implementation procedures, and their usefulness on state and local levels. The evaluation system in development draws upon existing theoretical constructs and builds on the state-of-the-art in vocational education evaluation. (Author/GDC)

Descriptors—*Case Studies, Classroom Research, *Effective Teaching, Elementary Education, *Policy Formation, *Research Utilization, *State Licensing Boards, *Teacher Certification, Teacher Education
Identifiers—*Beginning Teacher Evaluation Study, California
The California Commission for Teacher Preparation and Licensing, responsible for teacher certification and approval of programs of teacher education, is conducting a major research effort to identify teaching behaviors that are related to student learning of reading and mathematics in the elementary

grades: The Beginning Teacher Evaluation Study. While the results will not indicate which specific policy alternatives should be adopted, they will have, and already have had, an impact on the thoughts and actions of the members of the policy making body. Policy makers have modified their conceptions of teaching and teacher education; learned about the research process and used research to answer other questions; used results in their individual work; and heard the results quoted by individuals arguing for specific policy decisions. In addition, those subject to the regulations of the Commission have become more aware of and concerned with the results of research on teaching. Specific examples are discussed to elaborate each of these uses of the research results. (Author/GDC)

Issues in the Effective Use of Walker Problem Behavior Identification Checklist.
Pub Date—Mar 78
Note—13p.; Paper presented at the Annual Meeting of the American Educational Research Association (62nd, Toronto, Ontario, Canada, March 27-31, 1978)
Pub Type— Speeches/Meeting Papers (150) — Reports - Research (143)
EDRS Price - MF01/PC01 Plus Postage.
Descriptors—*Behavior Rating Scales, Check Lists, Elementary Education, *Elementary School Teachers, *Emotionally Disturbed Children, *Special Education Teachers, Student Adjustment, *Student Behavior, *Test Reliability
Identifiers—*Walker Problem Identification Checklist
The interrater reliability of the Walker Problem Behavior Identification Checklist subscale scores was examined. An attempt was also made to determine whether the background, experience, or training of the rater-teacher influenced the scores given. Two independent raters, the regular classroom teacher and a teacher of the emotionally disturbed, rated 62 students participating in an itinerant program for the emotionally handicapped. Pearson product moment correlations and t-tests were used in analyzing the data. While mean correlations for subscales showed moderate to high positive correlations between raters, there were significant differences between the scores on three of the five subscales–acting out, distractibility, and disturbed peer relations. This was also true of the total score. It was noted that there was less difference (mathematically) in the mean ratings of the two teachers. The differences in ratings may have been due to the amount of exposure the rater had to the student, or to the different training and background of the teachers. Because special education teachers are familiar with contingency management techniques, they may help to improve the student's behavior. (Author/GDC)

Interaction Between Achievement and Instructional Method.
Pub Date—Mar 78
Note—27p.; Paper presented at the Annual Meeting of the American Educational Research Association (62nd, Toronto, Ontario, Canada, March 27-31, 1978)
Pub Type— Speeches/Meeting Papers (150) — Information Analysis (070) ()
EDRS Price - MF01/PC02 Plus Postage.
Descriptors—*Academic Achievement, *Academic Aptitude, *Cognitive Processes, *Educational Research, Effective Teaching, Elementary Secondary Education, Higher Education, Individual Differences, Intelligence, *Knowledge Level, Learning Processes, Pretesting, *Teaching Methods
Identifiers—*Aptitude Treatment Interaction
Aptitude-treatment interaction research is reviewed, with particular emphasis on the interaction of achievement and instructional method. Previous research has suggested that students with lower prior achievement require maximal instructional support. Recent research on this relationship is reviewed, as well as the relationship between intelligence and prior achievement. The distinction between aptitude-treatment interaction and achievement-treatment interaction is also examined. Five research studies of prior achievement and instructional method are reviewed. Three studies investigating the relationship between intelligence and prior achievement and the implications of pretesting are also discussed; a distinction is made between pre-task data and within-task variables. Researchers have recently been interested in the psychological processes underlying aptitude or intelligence testing and instruction. This concern is highly related to the achievemement-treatment formulation. Directions for further research is suggested. (GDC)

A Social Studies Needs Assessment Instrument: A Factor Analysis.
Pub Date—Mar 78
Note—22p.; Paper presented at the Annual Meeting of the American Educational Research Association (62nd, Toronto, Ontario, Canada, March 27-31, 1978)
Pub Type— Speeches/Meeting Papers (150) — Reports - Research (143)
EDRS Price - MF01/PC01 Plus Postage.
Descriptors—*Curriculum Evaluation, Educational Needs, *Educational Objectives, Elementary Education, *Elementary School Curriculum, Elementary School Teachers, Factor Analysis, Factor Structure, *Needs Assessment, *Social Studies, Surveys, *Teacher Attitudes, Test Construction
A 30-item survey regarding needs in social studies instruction was administered to 151 elementary school teachers. Five statements were developed for each of six factors found in the professional literature: citizenship; issues; social sciences; skills; world; and traditional social studies. The teachers responded to each item twice: once, rating the objective as they perceived its importance in the present social studies program; and once, as they thought it should be. The two sets of data–"as-is" and "should-be"–were separately factor analyzed to determine the principle components and compare them to the original instrument design. Four strong "as-is" factors were selected to account for 42% of the total variance: (1) social studies for thinking, active, democratic world citizens; (2) social studies skills and attitudes; (3) traditional social studies; and (4) social sciences and history. Four strong factors found from the "should be" analysis accounted for 34% of that variance: the world; traditional social studies; social sciences and history; and issues, problems, and critical thinking. Suggestions for further research involve the investigation of greater numbers of factors; cluster analysis; and surveying of college social studies teachers. Descriptions of each survey item are appended. (Author/GDC)

An Instrument to Measure Discovery and Expository Presentations.
Pub Date—[Apr 79]
Note—23p.; Paper presented at the Annual Meeting of the American Educational Research Association (63rd, San Francisco, California, April 8-12, 1979)
Pub Type— Speeches/Meeting Papers (150) — Tests/Questionnaires 160) — Reports - Research (143)
EDRS Price - MF01/PC01 Plus Postage.
Descriptors—Behavior Rating Scales, *Classroom Observation Techniques, *Discovery Learning, Elementary Secondary Education, Higher Education, Lecture, Teacher Behavior, *Teaching Methods, *Teaching Styles, *Test Reliability, *Test Validity
Identifiers—*Discovery Expository Instrument
The Discovery-Expository Instrument is a classroom observation scale which measures the position of a teacher's presentation on a continuum of discovery presentation (in which the student is encouraged to solve problems with minimal help from the teacher), to expository presentation (in which the teacher provides a complete description and discussion of the subject). Teachers are rated on categories of behavior including: (1) definitive; (2) explanative; (3) clarifying; (4) exemplative; (5) summarizing; (6) question-raising; (7) problem-structuring; (8) directive-managing; and (9) neutral. Sixteen signs are also used to rate discovery versus expository teaching behavior. Four studies involving different grade levels were conducted which suggest that the instrument possesses relatively high inter-observer and intra-observer reliabilities and high validity. Using this instrument can help a researcher assess and, consequently, control the independent variable of level of discovery presentation in the classroom and the laboratory. The instrument also can be used to monitor the actual implementation of curriculum materials by the teacher, such as by gauging the nature and consistency of a teacher's use of new materials. An abbreviated version of the instrument; scoring directions; and the 16 signs and nine category descriptions are appended. (Author/GDC)

Identifiers—*Utah
As part of Utah's 1978 statewide assessment, a number of tests were administered to over 4,000 fifth grade students from 64 elementary schools and over 2,000 eleventh graders from thirty high schools. This report presents the results in each of the areas tested: (1) intellectual maturity–measured by reading and mathematics achievement on the nationally-normed Comprehensive Tests of Basic Skills; (2) emotional maturity; (3) social maturity; (4) aesthetic maturity; (5) productive maturity; (6) enjoyment of school; (7) educational process–including individualization of instruction, reinforcement of self concept, classroom participation, career development, and expectations (fifth grade only); and (8) school demographic characteristics–including socioeconomic status, size, location, Title I classification, race, and physical architecture (open versus closed). Key findings are summarized for each of the areas, and recommendations are presented for local, district, and state-level staff. Results in some of the areas tested are briefly compared to the results of the first assessment, which was conducted in 1975. (GDC)

Guidelines for Reviewing the Technical Quality of Examinations for Granting College Credit.
American Council on Education, Washington, D.C. Office on Educational Credit.
Pub Date—1 Oct 78
Note—10p.
Pub Type— Guides - Non-Classroom (055)
EDRS Price - MF01/PC01 Plus Postage.
Descriptors—*College Credits, *Equivalency Tests, *Evaluation Criteria, Higher Education, *Standards, *Test Reviews, *Test Selection
A team of technical experts should review the technical quality of proficiency examinations considered for assessing learning and granting college credit. The team should recommend approval or disapproval of the test; and if it is approved, recommend the level of test performance required in order to award credit. Information supplied by the test publisher may be helpful in making these decisions. The American Psychological Association's Standards for Educational and Psychological Tests represent a primary basis for judging tests. A number of other criteria should be considered. The skill or ability domains measured by the test should be clearly stated, and the rationale for item selection should be indicated. Item analysis data should indicate how well the domain has been sampled. Test items should be well-written and previously tested. Reliability data should pertain to test use in awarding credit by examination; cutting scores and norms should be appropriate for the institution using the test. The test should be free of known bias. The publisher should provide instructions for testing, scoring, time limits, and test security. (Author/GDC)

Descriptors—*Classroom Observation Techniques, Elementary School Teachers, Elementary Secondary Education, Inservice Programs, *Inservice Teacher Education, Observation, *Participant Satisfaction, *Peer Evaluation, Programed Instruction, Programed Materials, Secondary School Teachers, *Teacher Evaluation, *Teaching Methods, Video Cassette Systems

Identifiers—Classroom Procedures Assessment Instrument, Interpersonal Skills Assessment Instrument

Elementary and secondary school teachers were trained in the use of two observation instruments for teacher evaluation–the Classroom Procedures Assessment Instrument and the Interpersonal Skills Assessment Instrument. Training was conducted in workshops which used a series of ten videocassette sequences showing teachers working with students. Accompanying printed materials presented questions and answers which explained the meaning of specific indicators on the two instruments; these questions helped the trainee rate the videocassette teachers' behavior. Groups viewed the videocassette and then participated in either: (1) oral discussion with feedback from an instructor; (2) directed discussion with an instructor; (3) self-tutorial using a manual, without discussion; or (4) no treatment. The raters were also categorized according to the grade level they taught (K-5 or 6-12). Their attitude toward the training they received and their performance in rating teacher behavior in a 30-45 minute videocassette were studied. Analysis of variance indicated that type of training did affect performance in rating; use of written responses with either oral discussion or printed feedback was more successful than oral discussion only. Practice and rating in one's own grade level diminished these effects. No significant attitudinal differences were found. (GDC)

Descriptors—Beliefs, Dogmatism, Educational Attitudes, *Educational Philosophy, *Education Majors, Grade Point Average, Higher Education, *Individual Characteristics, Personal Values, Preservice Education, *Student Attitudes, *Success Factors, *Teacher Qualifications

Identifiers—Dogmatism Scale (Rokeach), National Teacher Examinations, Personal Beliefs Inventory, Sixteen Personality Factor Questionnaire, Teacher Practices Inventory

Relationships were examined between scores on the Sixteen Personality Factor Questionnaire, Personal Beliefs Inventory, Teaching Practices Inventory, Rokeach Dogmatism Scale, National Teacher Examinations (NTE), and grade point average (GPA) for 55 teacher education students. Significant correlations were established between the cognitive outcomes (NTE and GPA) and personality factors C (emotional vs. mature), L (trusting vs. suspicious), O (placid vs. apprehensive), and Q4 (relaxed vs. tense). High negative correlations were found for the cognitive outcomes and the dogmatism scale, and high positive correlations for the Teaching Practices Inventory (agreement with Dewey's educational philosophy) and the cognitive outcomes. Current Research on Individual Differences in Learning and Instruction.

Note—29p.

Pub Type— Information Analysis (070)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—*Academic Aptitude, Cognitive Processes, Cognitive Tests, *Educational Research, *Individual Differences, *Individual Psychology, Intelligence Differences, *Learning, Psychological Studies, *Research Problems, Task Performance

Identifiers—*Aptitude Treatment Interaction

This overview of recent research on individual differences especially concerns that research which relates to human learning and instruction. Several major areas of research are identified, and within each area various issues related to that area and representative studies are discussed. Whenever possible, references to more comprehensive reviews of the literature are provided. Major emphasis is placed on research investigating performance on psychometric tests in terms of cognitive tasks or processes underlying that performance and on research related to aptitude-treatment interactions. Research on intelligence is also discussed, and reference is made to some of the research on cognitive style, adaptive instruction, and the role of individual differences in learning and cognitive processes. Finally, several issues related to future research on individual differences are discussed. Forty-four bibliographic citations are appended. (Author/GDC)

Descriptors—Academic Achievement, Board of Education Policy, Curriculum Evaluation, *Data Bases, Data Collection, *Educational Assessment, Elementary Education, *Evaluation Criteria, *Evaluation Methods, Field Studies, Information Dissemination, Pilot Projects, Reading Programs, Student Characteristics, *Student Evaluation, Test Results

Identifiers—District of Columbia Public Schools

The philosophy of the District of Columbia Public School System is that evaluation should help to determine what was intended, what was done, and what was the result. It should contribute to improvement and should involve students, staff, and parents. Two essential components of the District's evaluation system are the data bank and field studies. The data bank includes files on fall pretest results; the reading curriculum; classroom and student characteristics; and spring post testing. The field studies provide data which can be used to identify programs of interest, compare groups, or locate students for followup study–data about attitudes, teaching methods, parent participation, etc. The development of the evaluation system began in 1969; by 1975, 44 elementary schools were involved in the data collection. The schools were provided with feedback in the following areas: characteristics of students in reading programs, comparison of schools within a region; teacher turnover; student attendance; and characteristics of entire classes. Additional data analyses are planned for the future. (GDC)

The Incremental Validity of Teacher and Student Perceptions of School Environment Characteristics.

Pub Date—Jan 78

Note—22p.; Paper presented at the Annual Meeting of the Georgia Educational Research Association (2nd, Atlanta, Georgia, January, 1978)

Pub Type— Speeches/Meeting Papers (150) — Reports - Research (143)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Academic Achievement, Attitude Tests, Average Daily Attendance, Grade 4, *Institutional Characteristics, Intermediate Grades, *School Attitudes, *School Environment, *Student Attitudes, *Teacher Attitudes, Teacher Morale, *Test Validity

Identifiers—My School Inventory, School Survey (Coughlan and Cooke)

The incremental validity of two high-inference, multiple-dimension measures of student and teacher perceptions of their school environment was investigated. Incremental validity was described as accounting for increasing amounts of criterion variance (average daily attendance and achievement on the Iowa Tests of Basic Skills) with a set of independent variables, using multiple regression analysis. The two instruments–the School Survey and My School Inventory–were administered to 1,018 elementary school teachers and 6,151 fourth grade students, respectively. Teacher perceptions of the school's educational effectiveness were strongly correlated with achievement. Positive teacher perceptions of special services programs, relationship with the principal, and relationships with colleagues were also associated with variance in achievement. Teacher perceptions of school effectiveness were also highly correlated with average daily attendance. Student perceptions of school academic difficulty were strongly and negatively correlated with achievement. Attendance was correlated with students' positive perception of cohesiveness among peers. Although both tests appeared to have incremental validity, for the achievement criterion; validity was higher with the School Survey, which was used to measure teacher attitudes. This finding is of considerable importance because previous studies with similar paradigms have focused on student attitudes. (GDC)

Descriptors—*Achievement Tests, *Complexity Level, Elementary Secondary Education, *Grade Equivalent Scores, Norm Referenced Tests, Scores, *Scoring, Standardized Tests, Student Testing, Testing Problems, *Test Interpretation, Test Reliability, *Test Selection

Identifiers—*Out of Level Testing

For Title I evaluations, it may be appropriate to test out-of-level; that is, to override publisher's recommendations concerning the difficulty, length, and content appropriate for a particular grade. It is seldom necessary, however, to move more than one grade down. If the mean is substantially higher than the median, then some pupils will have encountered the floor of a test and an easier level of tests should have been chosen. The ceiling of most tests becomes a handicap when three-quarters of a group can answer the most difficult items correctly. In this case, the mean is substantially lower than the median and a more difficult test should have been chosen. In general, the level of a test is suitable when the raw score of the group is equal to or above a third of the maximum score, and somewhat less than three-quarters of the maximum. In norm-referenced evaluations out-of-level testing is possible with most standardized achievement tests because they provide tables for relating raw scores on out-of-level tests to in-level percentile norms. Identifiers—Elementary Secondary Education Act Title I

Twelve common errors which can invalidate an

otherwise sound evaluation are identified, and ways to avoid them are presented. The hazards are: (1) grade-equivalent scores; (2) inappropriate statistical adjustments with nonequivalent control groups; (3) administering norm-referenced tests at inappropriate times of the school year; (4) inappropriate grade levels of tests; (5) missing scores; (6) noncomparable treatment and control groups; (7) use of a single set of scores for both selecting and pretesting participants; (8) constructing a matched control group after the treatment group has been selected; (9) careless administration and scoring; (10) changing instruments between pretesting and post testing; (11) inappropriate formulas such as IQ or pretest scores to generate no-treatment expectations; and (12) mistaken attribution of observed gains. A table indicates which hazards present the biggest threat to the validity of three Title I evaluation models: control group, norm group, and special regression. (CP)

Identifiers—Student Evaluation of Teaching

Student Evaluation of Teaching (SET), a six-scale questionnaire, yielded an overall teaching effectiveness score for 53 teachers, rated by 1,128 Anglo, black, and Chicano students in their sixth grade social studies classes in 1974-75; and for 42 teachers (33 of them the same) in 1975-76 reading classes. SET correlated substantially with analogous attitude measures; was free of socio-economic status or ethnic bias; and correlated .38 to .68 with observers' teacher ratings. The SET scores for the first year correlated .68 with the SET scores for the second year. Teacher personality and behavior affected change in SET, as expected, and SET positively affected student outcomes. Almost all findings were replicated in the second year. (Author/MH)

Identifiers—Japan, Texas (Austin), United States, West Germany

Coping skills and work motivation were investigated as predictors of academic achievement in Japan, West Germany, and Austin, Texas. Data were gathered from a sample of 3,600 ten and fourteen-year olds. Aptitude was measured by the Raven Progressive Matrices; achievement was measured by standardized tests in reading and mathematics, and by grade point average (GPA). A number of instruments were developed to assess coping skills and work motivation. Three general conclusions were made. (1) The amount of total variance explained was substantial, except for the case of GPA in the German high schools. (2) The coping/motivation measures accounted for more of the variance in achievement than did aptitude, at age 14, in all cases except math and GPA in Germany. Even at age ten, these measures accounted for the largest portion of the explained variance in reading in all countries. (3) There are major differences in the factors that account for achievement in these three countries; and there are age differences that also vary from one country to another. The coping and motivational factors which had the most power in predicting reading achievement and GPA in 14-year olds in each country are listed. (Author/GDC)

Descriptors—*Academic Aptitude, *Achievement Gains, Aptitude Tests, *College Bound Students, *College Entrance Examinations, *Scores, Senior High Schools, Testing Problems, Test Reliability, *Test Wiseness

Identifiers—*Scholastic Aptitude Test

Intended primarily for secondary school administrators, teachers, and counselors, this booklet summarizes the information available, as of 1965, about the ways special coaching or tutoring may affect students' scores on the College Board's Scholastic Aptitude Test (SAT). Coaching refers to the variety of methods used in attempting to increase, in a relatively short time, students' mastery of the particular skills, concepts, and reasoning abilities tested by the SAT. Seven studies of the effects of coaching on SAT scores are summarized; four of these studies were conducted by Educational Testing Service for the College Board. The subjects varied in ability and academic background; they included public, private, and vocational high school students. The amount of coaching, instructional materials used, and coaching experience of tutors also varied. The net result across all studies was that score gains directly attributable to coaching were, on the average, fewer than ten points–a difference of such small magnitude on the SAT score scale of 200 to 800 that the College Board considered it unreasonable to expect it to affect college admissions decisions. The magnitude of the gains resulting from coaching were always small, regardless of the coaching method used or the differences in the students coached. (Author/GDC)

Prediction of Reading Grade Levels of Service Applicants from Armed Services Vocational Aptitude Battery (ASVAB). Interim Report for Period 1 April 1977 - 1 August 1978.

Air Force Human Resources Lab., Brooks AFB, Texas.

Report No.—AFHRL-TR-78-82

Pub Date—Dec 78

Note—16p.

Pub Type— Reports - Research (143)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Mastery Tests, *Military Personnel, Postsecondary Education, *Predictive Ability (Testing), Reading Ability, *Reading Level, *Reading Tests

Identifiers—*Armed Services Vocational Aptitude Battery, Gates MacGinitie Reading Test, Nelson Denny Reading Test

To assess the reading ability of military service applicants and accessions, and to determine the relationship between Armed Services Vocational Aptitude Battery (ASVAB) measures and reading scores, 2,432 subjects were given the Gates MacGinitie reading test and a subsample of 818 were given the Nelson-Denny reading test. The median reading grade level for service applicants was 9.0 based on Gates-MacGinitie and 9.5 based on Nelson-Denny. The median Gates-MacGinitie reading grade level of applicants who qualified for services was 10.2 compared to 5.7 for non-qualified applicants. The Armed Forces Qualification Test of the ASVAB correlated .76 with the average of reading grade levels for the two reading tests; the ASVAB General Technical (GT) composite (General Aptitude Index used by the Air Force) correlated .79. Finally, multiple correlations between the three ASVAB measures (work, knowledge, general science, and numeric operations); the two reading tests; and average reading grade levels were .80, .77, and .86 respectively. It was recommended that the GT composite be used as an index of reading grade level. (Author/CP)

Identifiers—Texas, *Texas Assessment Project

Results of writing tests given to a large sample of 9, 13, and 17-year olds throughout Texas are reported in detail. Results are reported in terms of the percent of students writing at stated levels of competency or exhibiting particular writing skills. The results are reported for eight categories: (1) statewide; (2) 20 state geographic regions; (3) family income; (4) ethnic background (black, Mexican American, and other); (5) size and type of school district; (6) per pupil expenditure; (7) sex of students; and (8) languages spoken in the home. Major findings are summarized. Appendices include tables which complement the findings. (MH)

Descriptors—Academic Achievement, *Citizenship, *Educational Assessment, Educational Objectives, Elementary Secondary Education, Grade 6, Grade 11, *Mathematics, Performance Factors, *Reading Achievement, State Programs, State Surveys, Student Characteristics, Test Results, *Writing Skills

Identifiers—Texas, *Texas Assessment Project

Findings are summarized from the statewide assessment of Texas students' achievement in mathematics, reading, citizenship awareness, and writing skills. For reading and mathematics achievement, criterion-referenced tests were developed. Test items from exercises developed by the National Assessment of Educational Programs (NAEP) were used to assess achievement in citizenship and writing. Results in all four areas are analyzed according to state geographic regions, family income, ethnic background (black, Mexican American, and other), sex of student, size and type of school district, per pupil expenditure, and languages spoken at home. For reading and mathematics achievement, other home factors, including reading materials at home, television viewing habits, homework, parents' education, and educational aspirations of the students are considered. Descriptors—*Achievement Tests, *College Entrance Examinations, Disclosure, *Educational Assessment, Equivalency Tests, *Evaluation Needs, Higher Education, Objective Tests, Publicize, Secondary Education, *Standardized Tests, Student Evaluation, *Testing Problems

Identifiers—Alternatives to Standardized Testing

The basic rationale for using standardized tests for

college admission, credit, and placement is that they are relevant and reliable. Such tests require the student to demonstrate the kind of competence that schools teach–the kind of competence required to work effectively in the modern world, to develop fully the human potential, and to enjoy life. Opponents of standardized tests often suggest alternatives such as more systematic documentation of the learning process, more extensive displays of student papers and projects, more frequent communication with parents. But these alternatives focus more on the instructional process than on the learning product. They seldom provide means for quantifying the amount that has been learned or for measuring pupil achievement in learning; the essential element is missing. The alternatives proposed are not effective substitutes for tests. Standardized tests are not perfect, but the main reason why they are opposed is not because of their imperfections. It is because they are the tools of accountability that might be applied to many who feel more secure when not being held accountable. But if we seek quality education, we must hold educators accountable; there must be public assessment of student achievement. (Author/GDC)

Descriptors—Achievement Tests, Basic Skills, *Calculation, Compensatory Education Programs, *Criteria, *Functional Illiteracy, *Functional Reading, Intermediate Grades, Junior High Schools, *Literacy, Reading Achievement, *Test Selection, Test Validity

Identifiers—Elementary Secondary Education Act Title I

As part of the development of a functional literacy test for fourth through eigth grade children in Title I compensatory education programs, this report defines functional literacy for children and enumerates criteria for evaluating existing tests. Criteria for selection of a test include: (1) content, empirical, and construct validity; (2) appropriateness of the test for the examinee population, including disadvantaged children; (3) technical quality, including reliability and normative standards; and (4) usability by non-expert personnel, objective machine scoring procedures, and interpretation. The test should be an independent entity rather than components of an achievement test battery. The test will be in English, but a Spanish-language version should also be available. (MH)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—Ability, Achievement Tests, *Complexity Level, *Goodness of Fit, *Item Analysis, *Mathematical Models, Measurement Techniques, *Test Construction, Test Items

Identifiers—Information Analysis Products, *Rasch Model

Issues of concern to test developers interested in applying the Rasch model are discussed. The current state of the art, recommendations for use of the model, further needs, and controversies are described for the three stages of test construction: (1) definition of the content of the test and item writing; (2) item analysis; and (3) test calibration. The Rasch model is defined as specifying that the probability of a person's correctly answering a test item is a function of two parameters: the person's ability and the item's difficulty. Calibration refers to the process of estimating the two sets of parameters, and evaluating the fit of these data to the model. The Rasch model has been found to work for achievement tests, both criterion- and norm-referenced, as well as other types of tests. The model helps to identify poor test items, but does not help to write better items. Mean square fit statistics are recommended for item analysis. Questions are raised regarding unidimensionality, the robustness of the model, sample size issues, and the definitions of sample-free and item-free. The authors conclude that test developers can feel comfortable, albeit cautious, in using the Rasch model. (Author/GDC)

Identifiers—*Family Education Program, *New York (New York)

Summarized in this report is the effect parent participation in the Family Education Program at Intermediate School (I.S.) 55 in New York had on student achievement in the school during 1975-1977. Results of the first year of the program, 1974-75, indicated a relationship between parent participation and improved student achievement in mathematics and reading levels. In the 1975-77 program, however, there was no meaningful difference in the achievement levels of those students whose parents did participate as compared to those whose parents did not. This finding is attributed to the small number of students for whom pre and post test scores were available and the small number of students whose parents participated in the workshops and parent events. Nonetheless, there were benefits, which included a decrease in serious disciplinary problems, the development of a vehicle for the participation of parents, teachers and students in the decision making process, and the establishment of specific instructional goals and objectives. Appendices include tables of data collected, listings of parent attendance at workshops or events for 1975-76 and 1976-77, outlines of events, samples of forms, letters and publicity used in the Family Education Program, a parents' association monthly newsletter, and records of the National Advisory Council on the Education of Disadvantaged Children visit to the Family Education Program. Identifiers—*Family Education Program, *New York (New York)

This is a report on the results of the Family Education Program, which is described as a demonstration and action program which incorporates parent education with an existing teacher training program to raise the achievement levels of intermediate students at Intermediate School (I.S.) 55, Brooklyn, New York. Methods and procedures of the program are outlined. The results presented indicate that the achievement levels of fifth and sixth grade students in mathematics and reading were higher for those whose parents participated in the program than for those whose parents did not. Appendices include attendance records for parents who attended workshops and parent events, outlines of each event, contacts made by parent coordinators and results of the contacts, correlation and comparisons of test scores, samples of forms and letters used in the Family Education program, and an analysis of the repercussions the violent death of a student at I.S. 55 had on the school and on the Oceanhill-Brownsville section of New York. Descriptors—Behavioral Science Research, *Counselor Attitudes, *Cultural Factors, Discriminatory Attitudes (Social), Ethnocentrism, *Minority Groups, *Psychiatrists, Psychotherapy, *Racial Factors, *Social Factors

There are problems in using the traditional approaches of psychotherapy with various ethnic minority and national groups in the United States. Mental health practitioners, besides making errors in diagnosis, may also be handicapped in developing a therapeutic relationship with the patient. Numerous studies indicate that sociocultural factors tend to influence the efficiency of psychotherapy. Social class, racial status, and command of English all affect patient-therapist communication. Those who most frequently seek and persist in therapy are upper-middle to upper class and about half are Jews. Although some techniques have begun to be developed for dealing with lower class minority patients more research is necessary. Poor prognosis for lower class clients has more to do with attitudes of the therapist than attributes of the client (Lerner and Fiske, 1973). Hollingshead and Redlich (1958) found that upper class patients rarely went to state mental institutions, while lower class patients often did. A realization of the importance of environmental and sociocultural factors in psychotherapy will make for a better rapport between therapist and

patient and, thus, more effective treatment. (Author/WI)

Identifiers—*Australia
Two contentions are argued in this paper: (1) that a democratic multicultural society must have an integrative set of values, together with diversity, to hold together ethnic groups of unequal size and different class composition, since inducement and coercion as binding forces are not as effective in the long run as moral commitment; and (2) that members of both dominant and dominated groups would, in a state that lacks such integration, be insecure in personal identity. References are made to the writings of psychologists and anthropologists dealing with the relationship between identification, personality, and community. (Author/EB)

Identifiers—*Parent Child Nutrition Education Project, Wisconsin
Described in this report is a study which was undertaken in Wisconsin to evaluate the effectiveness of the Parent-Child Nutrition Education Project. A review of literature dealing with parent-centered approaches in education is provided. The study's focus, its methodology, its training of parents and data collected from pre and post tests of the children and parents who participated in the project are described and discussed. Findings indicate that the effect of training with a parent-child interaction component was positive. Recommendations for the development of nutrition education programs with a parent-child interaction component are outlined. (EB)

This paper reports the findings of a study determining the feasibility of establishing a research training program for women and minorities. Focused on are the career characteristics of women and minority junior faculty at four year institutions in the mid-Atlantic region, their research training, experience, and need for training as well as critical characteristics of internship programs. A review of literature on internships reveals the underrepresentation of women and minorities in the field of educational research and the competitiveness of the field in which junior faculty hope to advance. It also points out that the scarcity of role models for women in education continues to enforce sex stereotypes. Data from a survey of internship programs provide evidence on the need for training and information about key components to be included in a research training program. A proposed research training model is outlined. (Author/EB)

Identifiers—*Academic Talent Search Program, Educational Opportunities Program, Search for Education Elevation and Knowledge
This report reviews the first two years and describes the second two years of a Brooklyn College experimental project which offered special instructional and support services to a group of economically disadvantaged students with below standard high school achievement, but an academic potential for college work. The student recruitment process for the program is outlined, and special academic features, counseling, and progress assessment methods are detailed. The report describes the program as a success in terms of an unexpectedly low attrition rate, the probable number of graduates, the program's effect on the students and faculty, and its influence on the College's subsequent welcome to disadvantaged students. Some of the problems encountered are discussed, as are the criticisms of the project and the ways in which it might have been improved. Several other subsequent discretionary admissions programs are briefly described. (Author/WI)

Descriptors—Boards of Education, *Capitalism, Elementary Secondary Education, *Equal Opportunities (Jobs), Income, *Labor Market, Self Concept, *Sex Discrimination, Sex Stereotypes, *Teachers, *Working Women
Identifiers—*Canada
By segregating women into the less responsible and lower paid jobs, the Canadian capitalist system has been able to have a source of cheap labor which represented no competition to the existing male labor force. For example, during the Great Depression, as available teaching positions dwindled, women teachers were compelled to accept small town and rural positions at low pay and with exploitative working conditions. Legislation and school board policy also discriminated against women, especially married women, by creating rules designed to prevent them from getting better-paid positions. The overall effect of sex segregation in the labor market has been to confirm women's alien status as workers. Stereotypes resulting from the segregation of labor have prevented women from moving into new fields. The capitalist system's requirement for cheap labor has modified social attitudes affecting women's consciousness, reduced their labor power, and ensured that all women still seeking employment have done so under conditions favorable to capital and in areas which would not threaten the hierarchy of labor. Identifiers—New Jersey (Mercer County), New York (New York), New York (Westchester County)
This book presents the findings of a year-long study of the problem of juvenile violence. The scope of the problem is discussed in terms of arrest data and a review of related surveys, studies, and literature. Factors considered in describing the character-

istics of violent delinquents include patterns of delinquency and violence, sex, age, racial factors, family structure, socioeconomic status and social environment, education and learning, psychiatric characteristics, and physical health. Comparisons are made between juvenile violence and adult violence. Official responses to juvenile violence such as police and court processing and the ways in which courts in certain New York and New Jersey counties have dealt with cases of juvenile violence are reported. Various forms of treatment used in dealing with juvenile delinquents are discussed. In addition, strategies for preventing juvenile violence are explored and recommendations for intervention programs are made. Appendices include a summary of data collection, the study research instrument, a sample of the Sellin-Wolfgang Seriousness Scale, and three program models. (Author/EB)

An Examination of the Relationship Between Racial Preferences in Black Children and Their Self Concept.

Pub Date—[79]

Note—20p.

Pub Type— Reports - Research (143)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—*Black Youth, *Childhood Attitudes, *Elementary School Students, Family Attitudes, Identification (Psychological), *Preschool Children, Racial Discrimination, *Racial Recognition, Racism, *Self Concept

Identifiers—Preschool Racial Attitude Measure

Growing up black in America is a difficult process. Racism and discrimination are as much a part of America's heritage as democracy and equality. For more than three centuries, American society and its institutions have segregated and excluded minority groups, especially blacks, on the basis of racial features. In 1947, Clark and Clark tested the effect of racial identification on self-concept by interviewing 253 black nursery and primary school children in the segregated south and the integrated north. As part of the study, children were asked to choose either a white or a black doll. Most of the children, even as early as 3 years old, preferred the white doll. Numerous subsequent studies conducted with more refinements and greater controls found the same positive attitude toward light skinned dolls. However, these studies tell us very little about how black children feel about themselves in various situations. Only when the research begins to examine the total environment of black children can we begin to understand how they adapt to living in a racist society. (Author/WI)

This paper uses a chronological approach in examining the historic and current roles of public education as they relate to majority group education and the education of blacks. A survey of historical and educational literature points out conflicting conceptions of education and crosscurrents in educational thought with respect both to Federal policy-making and programs, and to public attitudes along these dimensions. Differences and changes in educational policy regarding majority and black education are described and traced through the 18th and 19th centuries. References are made to the prevailing educational policy of exclusion for blacks until the end of the Civil War and to the divisiveness public education created between immigrants and their children. Court decisions which influenced changes in educational policy are cited. It is argued that public schools in general, and programs and other public efforts to assist blacks in particular, are still under attack from significant portions of the American public. EDRS Price - MF01 Plus Postage. PC Not Available from EDRS.

Descriptors—*Community Involvement, *Early Childhood Education, *Educational Accountability, *Educational Finance, Educational Legislation, Political Issues, *Public Policy, *Urban Education

Good early childhood programs serve as a foundation for socialization and the building of skills, while complementing a child's development during the formative years. If the community would mount forceful campaigns to make early childhood education what it should be, millions of dollars might be saved on remedial programs. In an effort to save programs for young children, educators must organize advocacy groups to lobby for financial support. Individuals and community groups must force legislators to consider the rights of children and to act to preserve them. In planning, evaluating, and implementing early childhood programs, it must be remembered that these programs should provide a challenging and flexible curriculum so that young children develop to their fullest potential. A Five Step Model for Teaching and Working with Culturally Different Children.

Pub Date—[79]

Note—19p.

Pub Type— Guides - Classroom - Teacher (052) — Reports - Research (143)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Cultural Background, *Cultural Differences, Curriculum Development, *Educational Improvement, Elementary Secondary Education, Environmental Influences, *Individualized Instruction, *Language Experience Approach, Language Handicaps, *Learning Difficulties, *Minority Group Children, Self Concept, Socioeconomic Influences, Teacher Role

The culturally different child has traditionally been characterized as belonging both to a low socioeconomic status and to a racial minority group. The culturally different child is also characterized by a poor self concept and a slower rate of learning. These characterizations can be traced to the differences in environment that the child experiences at home, and the typical middle class oriented school environment. In order to rectify this situation, an organized, well-defined approach to behavior change must be undertaken. Teachers must be able to understand and work with related traits specific to each child classified as culturally different and must give consideration to the child's relationship to the curriculum. Goals that teachers establish must also be realistic. Strategies which seem most successful with the culturally different include a language experience approach to teaching the total language arts, peer tutoring, real life experiences such as field trips, and films. Descriptors—Civil Rights, *Educational Change, *Educational Policy, Elementary Secondary Education, *Equal Education, *School Integration, *School Segregation, State Legislation

Segregation in the schools contributes to inequality, while desegregation is a legitimate means of achieving equal educational opportunity. Not only is desegregation a constitutional right, but it is sound educational social policy. A commitment to desegregation by State officials is a prerequisite to the reduction of racial isolation and the achievement of equal educational opportunity. Equal educational opportunity is the springboard for equal opportunity in the real world and is the hope of blacks, other minorities and whites for fair participation in the economic marketplace. Identifiers—*Canada, *Italians

Examined in this paper is the relationship between the early reconnaissance and arrival of individual Italians and the great flow of migration into Canada by the Italians at the turn of the century. Taken into consideration are the Italian origins of some early Canadian heroes and the degree of their "Italianita." Differences between these individuals and the less notable Italian settlers and soldiers who set many of the patterns that were important in the later mass migration are pointed out. Lapses in the immigration of Italians to Canada are described

from a historical perspective. Occupations and trades characteristic of the Italian immigrants and their influences on Canadian enterprise and society are discussed. Problems of stereotyping and discriminatory attitudes experienced by the immigrants are also discussed from both sociological and historical viewpoints. In addition, references are made to the on again/off again relationship that existed between the Canadian government and the immigrants at different points in history. Considerable attention is given to the ways the "new immigrants" were at the heart of the organization and full industrialization of Canada. (EB)

Reported on in this document are the proceedings of a conference on minority group problems. The problems of alcohol, drug abuse and mental health, and public policies at the State, local and Federal levels as they impact upon racial minorities are some of the issues discussed. Areas of concern focused on include: (1) treatment; (2) precipitating, predisposing and contributing factors of alcoholism, drug abuse and mental illness among minorities; (3) factors that should be addressed in the area of research; (4) manpower needs and resources; (5) accreditation of minority service providers; (6) prevention; (7) special needs of rural and migrant minorities; (8) socioeconomic influences; and (9) institutionalization and deinstitutionalization. Specific recommendations and implementation strategies for dealing with these issues are suggested. In addition, the participants and recommendations of four specific minority group networks (Asian Americans, blacks, Hispanics and Native Americans) are listed. Appended are listings of conference participants, planning committee members, resource documents and a sample of the conference agenda. (EB)

The conference reported on in this document provided a forum for identification, discussion, and recommendation of alternative policies and approaches to the involvement of blacks in the health decisionmaking process in the United States. Recorded and summarized are discussions which were held regarding the state of health policy in America, formulation of public policy, process of implementation, the black administrator in the health policy arena, and problems and issues in the financing of health care. Also recorded are reports of the workshops which were conducted on national health insurance, cost containment strategies and their effects on current patterns of health care delivery, effecting health planning strategies in the black community, and the improvement of health services for the black community through alternative health financing schemes. Recommendations developed in the four workshops are presented in a closing report. Conference participants and current National Center for Health Services Research publications are listed. Presented in this document are a series of conference reports dealing with the future of education and the role of the child in education. Some of the topics discussed under the heading of "What Future?" include alternative curriculum directions, basic education, modes of education, economics as a primary determiner of educational objectives, open and closed systems in education, the Ontario educational system, the school as a multi-service agency, and teacher security and self-actualization. Topics considered under the heading of "What Child?" include the child as a product of our environment, matching child development with instructional realities, the student and the arts, education for leisure, multilingualism and multiculturalism, students and families, children's rights, teacher education, biology, special education, literacy, the role of religion, young people and idealism, minorities, and the Canadian child. Appended are reports of the Ontario Association for Curriculum Development (OACD) business session, the presentation and acceptance of the Colonel Watson Award, the presentation of honorary life memberships, a synopsis of group topics and listings of organizations sending participants to this conference and previous OACD conference themes. The study reported in this paper was undertaken to determine the number of blacks who graduated from a selected group of nine eastern universities between 1895 and 1945. Conditions and black student experiences during this period are considered and compared with the present. A short review of history prior to 1895 is provided to put into perspective the economic, political, social, and educational factors which prevented many blacks from attending college during this period. The experiences of several blacks who were able to attend colleges, and their accomplishments, are briefly described. Implications of this study for current and future university policy are discussed. Recommendations are made for the removal of legal and economic barriers, increase in financial aid to black student applicants, remedial help for black students who come from high schools that do not adequately prepare them for college level work, and the elimination of token integration. Descriptors—Administrator Role, Affirmative Action, Behavior Change, Black Students, *Change Strategies, *Cross Cultural Training, *Higher Education, Institutional Characteristics, Models, *Race Relations, *Racism, *Social Change, Student Attitudes, Teacher Attitudes

The research described and evaluated in this report tests a model for intervention strategies to reduce the impact of racism on blacks in a university setting. The basic assumptions of the model discussed are that institutional racism is systematic and must be attacked through systems intervention by trained people, and that individual, group and intergroup skills development as well as commitment of top level administration are required. The model is evaluated in terms of its ability to reduce the racist attitudes and behaviors of participants and to allow participants to effectively intervene in the system. Measurement in these areas includes a charting of Action Research Group effectiveness, examination of participant behavior in all stages, and comparison of participants' attitudes (pre and post training) on racism and relevant issues. The evaluation generally indicates that the model is minimally effective in reducing the impact of institutional racism. However, it is pointed out that some efforts in the desired direction were made. These include the Bridge Program, the Affirmative Action Planning Committee, and the recruitment of minority graduate students. Appendices include a compilation of training activities and strategies, data collected during the course of the research, questionnaires dealing with minority concerns, a market availability analysis, a training evaluation instrument, and an interpersonal skills scale. Identifiers—Bakke (Allan), *Jackson (Jesse)

This booklet contains an edited transcript of a visit by the black civil rights leader to the American Enterprise Institute (AEI) in May 1978. Reverend Jackson addresses issues that go beyond the free-

doms won in the civil rights movement toward the goals of educational and economic parity for all Americans. AEI scholars and fellows, representatives of the media, and representatives of the Ford Foundation and Mobil Oil Corporation question Reverend Jackson on the state of black America. Topics covered include: (1) the black vote and politics; (2) the moral authority of the media in the absence of blacks in executive positions with newspapers and television; (3) economic development of urban areas and job creation; (4) the income gap between blacks and whites; (5) foreign policy, particularly in Africa; and (6) affirmative action for minorities and the question of reverse discrimination. Descriptors—*Change Agents, Change Strategies, Discipline Problems, *Educational Alternatives, *Educational Improvement, *Instructional Programs, *Junior High Schools, Outreach Programs, Student Attitudes, Teacher Role, Teaching Styles, *Team Administration, Urban Schools

Identifiers—Pennsylvania (Philadelphia), *Pennsylvania Advancement School

Documented and evaluated in this report is the minischool approach used by the Advancement School to improve the quality of education in two Philadelphia School District junior high schools. Background information and the history of each school is provided to put into perspective the factors dealt with in this extension program. Considerable attention is given to the development of relationships between the administrative teams of the Advancement School and each of the two schools. Specific topics covered are: the instructional programs developed at each school; team functioning; and the effects of the minischools on the students. Problems in the junior high schools of Philadelphia in general, such as discipline and teaching approaches, are analyzed. The role of the Advancement School as an external change agent in dealing with these problems is discussed. In addition, the minischool program as one approach to change in junior high schools is examined. Appendices present data collected and a listing of additional literature on the Advancement School's external program. (EB)

Descriptors—*Employment Opportunities, *Family Income, *Federal Legislation, *Females, Heads of Households, *Low Income Groups, Mothers, One Parent Family, *Welfare, Welfare Recipients, Working Women

Identifiers—*Better Jobs And Income Act

This paper discusses the "Better Jobs and Income Act," President Carter's proposed welfare reform bill. Brief attention is given to speculation on "first order effects" of the bill. Effects considered concern the equity and the adequacy of the bill. Major attention is directed toward "second order effects," particularly in relation to family composition, and potential female labor force participation. With respect to female labor force participation, major factors considered are: (1) the position of the female labor market, which continues to be secondary to that of males; (2) present views of mother labor force participation; and (3) the effects of varying full employment definitions on expectations for women. Additional discussion is directed toward the potential impact of these "second order effects" on the originally prescribed policy goals and objectives. (Author/EB)

Identifiers—Project Follow Through

Twenty children, one boy and one girl in each of ten second grade classrooms from four different experimental programs, were each observed over the course of a single school day. Each 30 second interval of approximately 80 hours of transcribed behavior stream observation was analyzed to determine whether the teacher, the learner, or the teacher and learner jointly controlled selected aspects of the activity, and to determine the learner's main or alternative task orientation. Relatively consistently controlled settings were observed for more time than inconsistently controlled settings in enrichment subject activity, but not in basic subject activity. Successively more inconsistent combinations of controls were associated with successively lower percentages of main task orientation in basic activity, but not in enrichment activity. Analysis of the discrepant cases shows that consistency of control between pacing and feedback from materials and/or peers was associated with relatively high engagement for both basic and enrichment activity. The research is linked to other research which has examined on-task behavior as both an index of the efficiency of an educational setting and a predictor of achievement in the setting. (Author)

Identifiers—Magnet Schools

Anthropologists studying children in their own society may tend to assume that children and adults speak the same language and have shared knowledge; children's values reflect what they learn at home, their school experience is much like the anthropologist's school experience, and school is primarily a place where knowledge is passed from teacher to student; desegregation is working if there is no reported incidents of violence, multicultural training is provided, and desegregation is begun with young children; and schools can solve social problems. A year long study of children's social relations and communication in a desegregated urban "magnet school" challenges these four assumptions. Data indicate that children's play, body language and trust in adults influence schooling; the contingencies of a new era of youth and black assertiveness must be recognized; and successful desegregation requires more than a public record of nonviolence, multicultural education training, and interracial mixing in the early grades. Anthropologists must understand that children's perceptions and experiences of what it is like to be a student may present a reality that mocks adult ideals and the policies meant to realize them. Descriptors—Affirmative Action, Board of Education Role, Elementary Secondary Education, *Equal Education, *Equal Opportunities (Jobs), *Federal State Relationship, Public Education, *School Integration, *State Action, State Legislation, *States Powers, State Standards, Student Rights

The State has primary responsibility for public education. It should be the priority for each State legislature, State Board of Education, and chief State school officer to consider what methods can be employed to meet equal opportunity/ desegregation standards, to devise and implement strategies to overcome deficiencies, and, thereby, to assure the educational rights of all students. The State Education Agency (SEA) is in a position to define desegregation, to include educational outcomes expected, and to adopt programs to effectively implement its goals and objectives. The SEA must also, by policy and example, set standards for affirmative action programs in employment for local school districts. In addition, the historical reasons for the limited role of the States in desegregation have become less and less valid, and a new State/Federal partnership is a pressing need. States must demonstrate the ability to coordinate and implement desegregation and equal opportunity as well as the commitment to doing so. The Federal government should in turn permit States which demonstrate both ability and commitment the opportunity to enforce Federal desegregation programs within those States. (Author/EB)

Four articles on school desegregation are collected in this booklet. "State Leadership In School Desegregation" offers advice on how States can accomplish desegregation and high quality education. "A Policy Statement On Urban School Desegregation" advocates State standards of equality, equity, and excellence in order to shift the emphasis from desegregation to improvement in learning. "State and Local Responsibility for Promoting Learning Environments of Equity and Equality: A Conceptual Analysis" presents a conceptual framework for allocating responsibility for desegregation between State and local government. "The Case for Metropolitan Approaches to Public School Desegregation" stresses the important role of the State government in making possible the transition to metropolitan school desegregation. Regardless of the lack of racial justice in housing and employment, American democracy cannot tolerate discrimination in its public schools if it is to honor its traditions as a country. State bodies must make clear their position on school desegregation and establish that desegregation is wrong legally and educationally. Sanction must be imposed upon those who attempt to avoid desegregation after due process establishes a violation. There must be technical assistance to design and analyze desegregation plans. Financial incentives must be provided in the form of special State aid for desegregation plans. There is a need to promote the educational value of giving urban children and children in suburban school districts mutual opportunities to know and learn with children of another race or background. State assistance with problems of racial or ethnic imbalance in public schools must be provided and quality integrated education must be provided once desegregation is accomplished. The State of Massachusetts has achieved results in spite of some public anti-desegregation protests, because leaders at the State level were willing to stand up to their constitutional obligations. Descriptors—Academic Achievement, Basic Skills, Bus Transportation, *Change Strategies, Educational Finance, Educational Legislation, *Educational Quality, Elementary Secondary Education, Minority Groups, Residential Patterns, *School Integration, *School Segregation, *Socioeconomic Influences
Four separate societal movements in the past twenty-five years have brought about the belief that formal education is a means to an end rather than an end in and of itself: technological, educational, social, and population changes. Given these changes, the issue of urban desegregation must be reexamined from the viewpoint of the following principles: (1) there is a direct relationship between academically low, predominantly black schools, school segregation, and young adult unemployment; (2) there are no incentives for middle-class college oriented whites to voluntarily enroll their children in predominantly black schools; and (3) there is no way to provide heterogeneous schooling, because of white flight, unless the problem of housing patterns is addressed. There are three major explanations for the patterns of residential segregation: socioeconomic factors, racial discrimination, and individual preference. New incentives are needed to make compatible the conflicting goals of improving basic skills for minority children in specialized settings with uniquely prepared staffs and desegregating students into schools where teachers have not been properly trained. Such incentives may be magnet schools; incentives for school districts or individual schools; incentives for schools in conjunction with voucher plans; and financial incentives to children or parents for attending integrated schools. This paper presents a conceptual analysis of the different responsibilities that State and local levels should assume in promoting the purposes of education. It is their responsibility to provide learning environments that promote equity and equality. The problem for State and local authorities with reference to desegregated education is that of both promoting and controlling conflict as a creative process that enhances learning opportunities. Two questions serve as guidelines for the analysis of the purpose of desegregated education: What is the optimum balance between homogeneity and heterogeneity of decision making units? And what is the appropriate distribution of such units at varying levels of governance? It is concluded that decisions about equality–the statements of principle–are best made at the state level, remote from the location of implementation where considerations of self interest tend to create an emotionally charged atmosphere. However, decisions about educational practice should be made at the local level, for such decisions are decisions about equity. When the state and the locality have divided responsibilities pertaining to principle and practice in desegregated education, they serve as a system of checks and balances. (Author/WI)

Three basic reasons commend metropolitan approaches to public school desegregation in urban America. The first of these reasons is widely understood: the racial demography of many of the nation's cities demands a metropolitan perspective on the process. Related to this factor is the second reason: metropolitan approaches deter resegregation. Finally, a range of desirable goals for an effective school desegregation program–such as furthering genuine integration, cost and transportational efficiency, equity, and parental choice–can all be more effectively advanced within a metropolitan context. Yet there are many misconceptions about this view of school desegregation. This paper considers each of the three reasons for metropolitan solutions to public school desegregation and discusses the misconceptions held about these solutions. (Author/WI)

Identifiers—Magnet Schools
Examined in this report are problems connected with school desegregation. Particular attention is given to the fact that, while many rural schools have been successfully desegregated in the past decade, the majority of blacks and Hispanics who live in large cities remain in racially isolated schools. Causes and feasibility of metropolitan school desegregation are discussed. Findings indicate that excessive busing and loss of local control are not necessarily indicated by desegregation plans. Benefits of desegregation are identified as socioeconomic integration, neighborhood stability, increased learning opportunities, and balanced class size. Alternatives to urban school desegregation are listed and Federal Court rulings are discussed. Implementation methods for various metropolitan desegregation plans are examined and the role of the State in implementation is discussed at length. Recommendations include: (1) creation of a metropolitan-wide school district; (2) consolidation and reorganization of school districts; (3) inter-district student transfers; and (4) shared services. Examples of several urban desegregation programs are provided. Special task force recommendations are listed and applicable laws are appended. (WI)

Descriptors—Academic Achievement, *Adult Education, *Change Strategies, *Educationally Disadvantaged, Educational Policy, *Equal Education, *Low Income Groups, Minority Groups, *Nature Nurture Controversy, School Integration
Due mainly to the cultural reverence for the baccalaureate degree, there is a growing pressure from low income and minority groups to expand programs in continuing education. Various approaches to the problem have been tried (talent searches by colleges, open admissions) but have not proved successful. Although success and financing are problems, the major problem seems to be the development of skills and competencies in low income students. Researchers are still divided on the question of whether intellect is genetically or environmentally determined. However, there is abundant data relating to school achievement and school inefficiency and neglect in disadvantaged populations. Studies of desegregated schools indicate that achievement levels tend to rise with desegregation. Equality of education can only be reached if schools and society accept responsibility for developing conceptual, technical, social and political competence in the whole population. Three problems must be faced to equalize continuing education programs: modification of mental postures and learning patterns in inefficient young adult learners; the development of professional competence; and the necessity of involving the student in the developmental task. Descriptors—*Educational Environment, *Educational Research, Elementary Secondary Education, Equal Education, *Intellectual Development, Intelligence Factors, Learning Difficulties, *Minority Groups, Political Influences,

*Research Needs

The most pressing problems of research on minority groups have not received adequate attention. One such problem is that of identification and understanding of the mechanisms of learning facility and learning dysfunction and the implications of both for the optimum development of heterogeneous populations. Secondly, in contrast to the body of research and statistics concerning intellectual status, little has been done to analyze the qualitative aspects of intellectual function in target populations. A third area of research on plasticity of intellectual development has yet to yield definitive results. Zigler's work on the relationship between quality of intellectual function and affective state may provide insight into the development of cognitive achievement, if pursued. A fourth area of possible research is the implications of population diversity and pluralism for behavioral analysis and assessment. Finally the context in which learning takes place and the purposes served by learning must also be further explored. Ogbu and Wallace have argued, in different ways, that the purposes served by education are determined by the society that sponsors it. (Author/WI)

Descriptors—Academic Achievement, *Affective Behavior, *Disadvantaged Youth, Economic Factors, *Equal Education, *Health, *Intellectual Development, *Low Income Groups

Contemporary research provides evidence of a variety of behaviors and conditions encountered in children from economically disadvantaged backgrounds with sufficient frequency to justify the conclusion that they are either induced or nurtured by conditions of poverty. Numerous health-related conditions are felt to have implications for school and general social adjustment. The relationship of income level to intellectual development, academic achievement, and educational opportunity has been studied. Attempts to identify social affective behaviors which are associated with poverty in children have yielded tenuous results. Nonetheless, health status, intellectual function, and personal social adjustment appear to be influenced by conditions of poverty. Programs for the socially disadvantaged must be designed to relieve the impact of poverty on learning and development. (Author/WI)

Two lines of argument have been advanced to support the assertion that schooling makes little difference in the efforts of low status people to achieve equality or a fair chance at survival. One says that the genetic inferiority of certain races makes them incapable of benefitting from schooling. Although there is no hard biological evidence to support this viewpoint, it has been widely publicized and used as an argument against compensatory education. The second argument asserts that schools are not effective forces in changing the life chances of pupils. The view that schooling and the achievement of economic equality have little direct relationship has been used to justify reduced expenditures on schooling and lower demands on education. However, the problems of educating disadvantaged populations who have been systematically deprived of educational opportunity require attention to issues such as differential patterns of intellectual and social function; health-related conditions affecting children and their ability to learn; ethnic and cultural incongruities between school staff and the children and community; and schools' accountability as social institutions. As things now stand, arguments against effective schooling rely on questionable research which serves to relieve schools and the society of the responsibility for providing equal education. Descriptors—Behavior Development, *Developmental Guidance, *Environmental Influences, *Futures (of Society), *Individual Development, Medical Evaluation, Nature Nurture Controversy, *Occupational Guidance, Prenatal Influences, Psychological Characteristics, *Social Change

Guidance for career development must be concerned not so much with helping young people learn how to earn a living as with learning how to live a life. In the early part of this century, certain conditions and attitudes prevailed which influenced the character of the career guidance profession. However, these conditions and attitudes are no longer applicable to the present and emerging periods. The profession is changing in response to the changed social context in which we function. As in the field of medicine, the trend in guidance is toward a greater emphasis on understanding the total developmental process of young people. The study and manipulation of environments are increasingly viewed as crucial vehicles for the achievement of guidance objectives. This concern with environmental encounters in both medicine and guidance, and a reconsideration of the nature-nurture controversy, should lead to greater attention being given to the interaction between intrinsic and extrinsic factors involved in the development of human behavior. The early individual psychological model now being challenged by the developmental-ecological model as a more appropriate frame for the conceptualization and implementation of guidance functions has implications for the present and for the future. Identifiers—*Bakke (Allan)

This paper deals with the application of the dissenting opinions of the Supreme Court justices in the Allan Bakke case to a range of admission and hiring practices in which universities have engaged, or might engage. The issues posed in the Bakke case, the basic positions in each of the justices' opinions, and the interrelationship between the opinions are briefly described. The practical implications of the Bakke decision are then discussed in terms of what sorts of university programs of admissions and hiring appear permissible after Bakke. Taken into consideration are the following: (1) the relevance of State law and the distinction between private and public universities; (2) admission practices as they affect disadvantaged and minority students, particularly with regard to racial criteria; and (3) racial and sexual criteria in university hiring. This report analyzes the enrollment of race and sex groups in institutions of higher education in order to describe the differences in black-white and male-female enrollment. The analyses address the types of higher institutions attended and the types of academic programs experienced within these institutions. Findings indicate: (1) black enrollment throughout higher education in 1976 still remained heavily concentrated in the South; (2) traditionally black Southern institutions continued to enroll a significant proportion of the blacks participating in higher education in the South in 1976; (3) in 1974, black and female undergraduates and graduates, relative to whites and males, were still overrepresented in education and the social sciences and underrepresented in the technical sciences; and (4) the smaller proportion of blacks in professional schools, relative to black undergraduates and graduates, was more evenly distributed in academic programs in comparison to white professional students. Descriptors—*Change Strategies, Communication Skills, Consultants, *Educational Change, *Educational Problems, Elementary Secondary Education, Individual Characteristics, *Problem Solving, Program Evaluation, School Organization, *Urban Schools
Presented in this document, a product of the project on Documentation and Technical Assistance in Urban Schools (DTA), is a series of principles that can be used by members of schools and their consultants to improve the capacity of schools to solve their problems locally. References are made to the complexities of school problems and of human nature that have a bearing on any change strategy. Clusters of variables related to the vicious circle schools are often caught in when trying to reduce multiple or severe problems are discussed in conjunction with variables in human nature that hinder problem solving. Skills and knowledge that are considered essential to a school's capacity for solving problems are outlined and described in detail. Included are communication, diagnostic, and monitoring skills and knowledge of the complexities of humans and their school organizations, knowledge of variables affecting change in schools, and knowledge of the effects of using different sequences of action in change projects. Appended are summaries of research that show the best ways for consultants to assist schools in solving problems. (EB)

Descriptors—Administrator Role, *Educational Coordination, *Educational Improvement, Educational Planning, Elementary Secondary Education, Group Relations, *School Improvement, School Organization, Student Participation, Teacher Role, *Urban Education, *Urban Renewal, *Urban Schools
Identifiers—*Process Consultation
The articles in this report describe efforts at using varieties of process consultation to stimulate renewal in urban schools. Process consultation is a strategy for improving the group and intergroup procedures used by school personnel to reach their educational objectives and to solve their own problems. Emphasis is on the ways teachers, administrators, educational specialists, and/or expert consultants can collaborate in assisting urban school participants to build effective processes of self diagnosis, systematic planning and collaborative problem solving, and deliberate action. It is argued that schools function best when teachers, administrators and students are participating to solve the school's problems. It is also pointed out that planned efforts at facilitating the processes of urban renewal can lead to improvements in the school's instructional programs. (Author/EB)

Described in this paper are the conditions and problems confronting the Jefferson County School District in its desegregation efforts. Taken into consideration is the role Western Kentucky University's Desegregation Training Institute played in helping the Jefferson County System meet and deal with these conditions and problems. The major problem addressed is Jefferson County's merger with another school system at the same time it was undergoing desegregation. Particular conditions discussed include the differences in racial distribution among the two districts' student populations and faculty, a declining financial base, and a shrinking enrollment due to white flight. Plans developed by the County to desegregate the schools of the merged system with little or no busing of pupils are described. Objectives of the Training Institute Project for helping Jefferson County deal with its educational crisis are outlined. Included are strategies for facilitating open communication and for resolving conflicts. (EB)

Inner City Model Adolescent School. A Research Model.
Pub Date—[79]
Note—16p.; Not available in hard copy due to typographical factors
Pub Type— Reports - Research (143)
EDRS Price - MF01 Plus Postage. PC Not Available from EDRS.
Descriptors—*Adolescence, *Adolescents, Educational Improvement, *Educationally Disadvantaged, *Futures (of Society), Psychological Characteristics, Relevance (Education), Secondary Education, Socioeconomic Influences, *Student Needs, *Urban Education, Urban Environment
This paper examines the problems and needs of inner-city youth and suggests a model educational institution for adolescents residing in urban centers during future decades. Specific problems and needs referred to include biological, psychological, environmental, and socioeconomic, particulary those problems faced by the black adolescent. It is proposed that a model school for inner-city youth should take these problems and needs into consideration. In addition, it is argued that the secondary school should be at the apex of the city community and that all of its industrial and commercial means of production should be directly responsible for the viability and economic survival of all secondary institutions. The model presented is based on the contention that there is a need to drastically alter the cultural, social and economic environmental framework in which city secondary schools currently operate. An enumeration and discussion of the model school's underlying philosophy is followed by a description of the proposed curriculum and administrative policy. (Author/EB)

Identifiers—*Elementary Secondary Education Act Title VII
The papers in this monograph reflect different approaches used in the assessment and evaluation of bilingual education programs. Doctors Harry Berendzen and Katherine Bemis provide some practical considerations for implementation of evaluation. They list responsibilities of an evaluator and offer an evaluation management plan which takes into consideration needs assessment, performance objectives, measurement of project impact, material development, staff development, and community involvement. Dr. Michael Massarotti offers a systematic procedure for collecting information based on pre-established objectives and subsequent analysis, reporting, and use of the information for the purpose of making decisions concerning program development. Dr. Charles Leyba provides an overview and design of Title VII program evaluation. He also discusses standardized testing and analysis of scores. Finally, the topics of Dr. Robert Reeback's paper include a critique of Title VII regulations concerning evaluation, some examples of misguided or inadequate evaluation, a review of some persuasive evaluation results, and suggestions for reconstituting evaluation in the context of Title VII and adjusting to it in the meantime. Identifiers—Aptitude Treatment Interaction
The papers in this document illustrate the need for educators to recognize the diverse populations they serve. Edmund W. Gordon and Stephanie Shipman discuss the confusion surrounding Aptitude/Treatment/Interaction (ATI) research and the educational equity controversy. They argue for educational programs which more appropriately address the problems of equity and social justice in education. Patricia Albjerg Graham discusses, from an historical and contemporary perspective, the dilemma faced by schools as they seek to adjust to new societal values about the role of women. She argues that if genuine progress toward adjusting schools and schooling to these new social norms is to be made, the selection and retention of more women in leadership roles in education are called for. Edward DeAvila suggests that a diagnostic/prescriptive procedure called PAPI (Program Assessment/Pupil Instruction) can overcome the problems in standardized testing by remaining sensitive to the needs of ethnically and linguistically different children who might be treated within a mainstream setting. Finally, Edgar Epps discusses some of the problems faced by social scientists, practitioners, and policy makers as they seek to adapt the public schools to the needs and demands of increasingly vocal and politically influential racial and ethnic constituencies. Described in this paper is the educational background and schooling experienced by Haitian immigrant children who are presently enrolled in the New York school system. Different types of schools in Haiti (urban, rural, private, public, elementary and secondary), and the functions of these schools in Haitian society are examined. Other topics discussed include the school community, competition for school admission, the classroom context, the learning process, teacher-student relationships, parent-student relationships, parent-teacher relationships and the Haitian perception of schooling. Factors considered include school structure, teacher qualifications, entrance exams, discipline, home environment, and the use of French at all levels of instruction. (EB)

Descriptors—*Economic Factors, Educational Finance, *Educational Trends, Elementary Secondary Education, Financial Problems, *Futures (of Society), Higher Education, *Private Financial Support, *Public Education, *Social Influences
Focusing on education in the United States, this paper proposes that corporately funded education will eventually replace publically supported systems. It is argued that corporate education will develop as multi-national corporations (MNC) become the dominant economic and social force in the world eventually supplanting the nation/state as we know it today. The potential for MNC displacing the nation/state is described and compared to the displacement of the Church by the nation/state. Economic and social problems facing both higher and elementary/secondary education are discussed. It is hypothesized that these problems will lead to the need for new support structures for education. It is also argued that the costs of shrinking resources and spiraling inflation will lead to an inability to support the nation/state, that this in turn will force the nation/state into supporting only basic services as priorities, and that the corporation will be the only viable institution to provide services such as education. Speculation on the form this education will take is suggested. (Author/EB)

Descriptors—*Bilingual Education, Elementary Secondary Education, English (Second Language), History, *Puerto Rican Culture, *Puerto Ricans, *Volunteers
Identifiers—*Massachusetts (Boston)
In this manual for volunteers working with Puerto Rican children in Boston, background information is provided about Puerto Rican history and culture. In addition, a detailed description of the Puerto Rican community in Boston is included. There is a short description of the bilingual education program in Massachusetts and a longer description of the bilingual program in Boston. The place of the volunteer in the English as a second language (ESL) program in Boston is discussed. (PR)

Police Use of Force: A Community Relations Concern.
Department of Justice, Washington, D.C. Community Relations Service.
Pub Date—Mar 79
Note—14p.; Speech presented to the Annual Conference of the National Association of Blacks in Criminal Justice (6th, Philadelphia, Pennsylvania, March 29, 1979)
Pub Type— Speeches/Meeting Papers (150)
EDRS Price - MF01/PC01 Plus Postage.
Descriptors—*Community Problems, *Law Enforcement, *Minority Groups, Outreach Programs, *Police Action, *Police Community Relationship, *Race Relations, State Legislation
Addressed in this speech are police/minority relations problems, particularly the issue of police use of excessive force. References are made to studies and reports on the subject and the difficulty in getting adequate and substantial information on the patterns of occurrence where community friction arising from the use of excessive force is concerned. Possible circumstances contributing to the use of excessive force on the part of police officers and guidelines governing the officers' use of force are discussed. State laws limiting a police officer's use of deadly force to arrest a felony suspect are described. It is pointed out that these laws are not uniform and that the decision to use force is often left to the officer. It is also pointed out that there is a definite trend emerging that indicates local police departments are voluntarily imposing more stringent limitations on their officers than are required by State laws. Objectives of an agency effort to improve race relations by helping police departments and minority communities to better understand the implications of this issue are outlined. (EB)

These papers make suggestions for further exploration into the problems of sex and gender research. Edmund Gordon presents a historical perspective on the sociopolitical implications of sex and gender and discusses attitudinal variables which affect the classification of women. Ann Lieberman describes the history of women in the work force, their problems and breakthroughs, and their prospects for the future. Robert Brannon compares the stereotyped roles which men have played in the past with their portrayals in the media today. He shows that today's male is facing difficulties as a result of the changing role of women. Maxine Greene discusses the role of women in literature and suggests that literature can provide a resource for women to remake and transcend the traditional conditioning of their roles. Maria New addresses the problem of ambiguous sex in the newborn, presenting biological antecedents, the diagnostic procedures, and the appropriate medical intervention. Elizabeth Hagen points out various reasons for inconsistencies in several areas of sex-difference research. Patrick Lee reviews some of the major theories of sex-role differentiation and mentions factors which should be taken into consideration in the development of a new theory of sex-role socialization. Some Positive and Negative Impacts of the City on Children.
Pub Date—Apr 79
Note—20p.; Paper prepared for the Conference of the Mayors of The World's Major Cities (8th, Milano, Italy, April 16-18, 1979)
Pub Type— Opinion Papers (120) — Speeches/-Meeting Papers (150)
EDRS Price - MF01/PC01 Plus Postage.
Descriptors—Child Development, Compensatory Education, *Disadvantaged Youth, Elementary Secondary Education, Family Environment, *Inner City, Low Rent Housing, *Minority Group Children, Racial Factors, *Socioeconomic Influences, *Urban Environment, Urban Schools
Cities encompass a variety of environments and children interact with these environments in different ways with different impacts resulting. Such factors as socioeconomic class, race, ethnicity, and recency of in-migration all affect the nature and

extent of environmental impact on individuals. Inequalities in housing, economic and educational opportunities, availability of amenities, and access to civic and cultural resources also have their impact. Because of these characteristics, poverty has become a central element of the urban crisis and, because children of the poor are found in increasing numbers in the central city, the impact of the urban environment is most severe on that population. Children from low-income housing tend to have poorer physical and mental health and have lower school achievement than their counterparts from more affluent families and more appropriate housing. The emotional and psychological climate created in slum areas impact quite negatively on children. In addition, children from inner city areas seem severely hampered in their schooling by a complex of conditions at home, in the neighborhood, and in the classroom. Compensatory education has tried to create conditions which help the disadvantaged overcome these conditions but might be more effective if it became developmental as well as remedial. (Author/EB)

EDRS Price - MF01/PC11 Plus Postage.
Descriptors—*Federal Government, *Federal Legislation, *Federal Programs, *Federal Regulation, *Housing Discrimination, *Housing Opportunities, Program Evaluation, Racial Discrimination, Sex Discrimination

The purpose of this report is to determine how well the Federal Government has done its civil rights enforcement job, particularly in eliminating discrimination in housing, during the period from January 1975 through August 1978. Reported on are the Government's activities under the following laws: (1) Title VIII of the Civil Rights Act of 1968; (2) Title VI of the Civil Rights Act of 1964; (3) the Equal Credit Opportunity Act; (4) the Community Reinvestment Act; and (5) the Home Mortgage Disclosure Act. Also covered are the fair housing activities of the Department of Housing and Urban Development, the Federal Reserve Board, the Federal Deposit Insurance Corporation, the Office of the Comptroller of the Currency, the Federal Home Loan Bank Board, the General Services Administration, and the Veterans Administration. In addition, the fair housing enforcement efforts of the Departments of Justice, Defense, and Agriculture, as well as the fair housing roles of more than 50 other Federal agencies which can affect housing opportunities in connection with their program or regulatory operations are reported on. Descriptors—*Educational Assessment, Educational Finance, *Educational Improvement, Elementary Secondary Education, Expenditure Per Student, *Financial Problems, *School District Spending, *School Support, State Aid, Student Improvement, Student Testing, Teacher Morale, Teacher Salaries
Identifiers—*New Jersey (Paterson)

Despite the fact that Paterson has a high level of documented need, the city is below the State and Passaic County averages for professional staff per 1000 weighted pupils and per pupil expenditures for instructional materials. Teacher salaries are among the lowest in the State and teacher morale is reputed to be low. Even after two years of financial reform, Paterson's position in relation to the State and County is actually worse. To the extent that educational quality is related to educational expenditures, fiscal conditions in the city have hurt the district. State aid is not in proportion to the level of educational need in Paterson. There is nothing bright about Paterson's immediate future. The current school finance law will remain in force until overturned or modified and local decisionmakers in the city are expected to continue to keep taxes and educational spending at the bare minimum. It is doubtful that student performance on statewide tests will improve appreciably, if at all, without drastic change in the district. (Author/EB)

EDRS Price - MF01 Plus Postage. PC Not Available from EDRS.
Descriptors—Blacks, *Blue Collar Occupations, Caucasians, *Employment Opportunities, *Equal Opportunities (Jobs), Females, Males, Managerial Occupations, *Racial Segregation, Research, *Sex Differences, Sex Discrimination, *White Collar Occupations

Indices of racial segregation across different places of employment are presented for black and non-Hispanic white workers in the same general occupational category (e.g., managers; operatives). Black and non-Hispanic white laborers and service workers are more segregated from one another than are their racial counterparts in other occupational categories, once the relative supply of black workers in each occupation is accounted for. Black and white women at each occupational level are more segregated from one another than are black and white men, although differential employment in high and low segregation industries accounts for much of the sex differences. The racial composition of an establishment's work force in one occupation is strongly related to its racial composition in other occupations, especially within the blue collar and white collar subgroups. For certain occupational categories–namely professionals, sales workers, and clerical workers–the black proportion of the work force is higher the more the total establishment's employment is concentrated in that occupation. Teaching Children to Care.
Pub Date—[79]
Note—19p.
Pub Type— Guides - Classroom - Teacher (052)
EDRS Price - MF01/PC01 Plus Postage.
Descriptors—Administrator Role, *Class Activities, *Creative Activities, *Discussion (Teaching Technique), *Educational Strategies, Elementary Secondary Education, *Ethical Instruction, Moral Development, Personality Development

There is proof that caring can be taught and, that it can be programmed into the curriculum, with teacher training and administrative support, on a structured daily basis. Teaching children to care and raising the "CQ" or "Caring Quality" belongs in all education. Teaching children to care involves a number of techniques. These can be classified under the heading of "Input Opportunities" and include a daily class dialogue period, the use of creativity tools, and the use of action projects. (Author/EB)

Dimensionality of Hawaii's Ethnic Groups.
Pub Date—[79]
Note—12p.; Not available in hard copy due to the print quality of the original document
Pub Type— Reports - Research (143)
EDRS Price - MF01 Plus Postage. PC Not Available from EDRS.
Descriptors—Blacks, Caucasians, Chinese Americans, *Discriminatory Attitudes (Social), *Ethnic Groups, *Ethnic Relations, *Ethnic Stereotypes, Filipino Americans, Hawaiians, Japanese Americans, Korean Americans, *Racial Attitudes, Research, Samoan Americans
Identifiers—*Hawaii

Hawaii's ethnic groups have certain stereotypes of each other. These promote interethnic conflicts, with certain groups being preferred over others. The relationships between eight major ethnic groups (black, Caucasian, Chinese, Filipino, Hawaiian, Japanese, Korean and Samoan) are explored in this study. The groups were studied and the results were reported in terms of dimensional structures of preference, perceived similarities, and "connotative meaning" as the basis for attitudes. (Author/PR)

Longitudinal Effects of School Racial/Ethnic Composition Upon Student Achievement. First Report.
Pub Date—Apr 79
Note—14p.; Paper presented at the Annual Meeting of the American Educational Research Association (San Francisco, California, April, 1979)
Pub Type— Reports - Research (143) — Speeches/-Meeting Papers (150)
EDRS Price - MF01/PC01 Plus Postage.
Descriptors—*Academic Achievement, Elementary School Students, *Ethnic Distribution, Longitudinal Studies, *Racial Factors

This study examines the effects of school racial-/ethnic composition upon student achievement. The study was carried out in a middle-sized midwestern city. The population for the project was identified in the fifth grade of this public school district. All students were administered the California Achievement Test 1970 edition during both their third and fifth grade year. The reading vocabulary, reading comprehension, math computation, and language mechanics subtest of this instrument make up the dependent variables. The independent variables are student race (black/white) and the school racial impact level. The racial impact level is defined as being the ratio of black to white students within the school. Examination of the data for variability attributable either to independent variables or interaction effects was carried out through the use of a two-way analysis of variance using a least squares method. Varying relationships between the two independent variables and the dependent variables were noted. The effects of each independent variable was inconsistent upon the mean gain scores recorded for the various subtests. It is speculated that varying emphasis upon different categories of the curriculum could partially account for the differences in mean gain scores among the dependent variables. (Author)

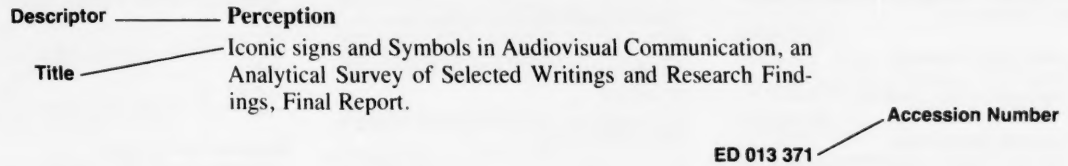
Descriptors—*Caucasian Students, Declining Enrollment, Elementary Secondary Education, *Integration Studies, Parent Attitudes, Parochial Schools, Private Schools, *School Integration, *Urban to Suburban Migration
Identifiers—*White Flight



Much evidence exists to show that white enrollment declines with the advent of desegregation. This study conducted in Jefferson County, Kentucky (Louisville) explains the causes of this decline in terms of birth rate decline, nonpublic school enrollment, and movement out of the county. A determination of the degree that each of these take place and their relationship to desegregation is made. In addition, interviews were conducted with affected parents to ascertain their attitudes toward desegregation related subjects, and to collect information on their demographic characteristics. (Author)

Subject Index

This index lists titles of documents under the major subject terms that have been assigned to characterize their contents. The subjects, which conform to those presented in the *Thesaurus of ERIC Descriptors*, are in alphabetical order.

As shown in the example below, the accession number is displayed below and to the right of the document title. Additional information about the document can be found under that number in the resume section.

The symbol // appearing after an accession number identifies a document that is not available from the ERIC Document Reproduction Service and that is not in the ERIC Microfiche Collection.

Author Index

This index lists documents under the name(s) of their author(s). The index is arranged in alphabetical order by the person's last name.

As shown in the example below, the accession number is displayed below and to the right of the title. Additional information about the document can be found under that number in the resume section.

The symbol // appearing after an accession number identifies a document that is not available from the ERIC Document Reproduction Service and that is not in the ERIC Microfiche Collection.

Institution Index

This index lists the titles of documents under the institution responsible for them and/or the agency sponsoring them. The index is arranged in alphabetical sequence by the name of the university, agency, association, etc. Names beginning with the word "University" have generally been inverted in order to provide a more distinctive entry, e.g. Wisconsin University (for the University of Wisconsin). As shown in the example below, the accession number is displayed below and to the right of the title. Additional information about the document can be found under that number in the resume section.

The symbol // appearing after an accession number identifies a document that is not available from the ERIC Document Reproduction Service and that is not in the ERIC Microfiche Collection.

PUBLICATION TYPE INDEX

This index lists documents under the Publication Type that has been assigned to them to characterize their form or organization, as contrasted to their subject matter.

As shown in the example below, the accession number is displayed below and to the right of the document title. Additional information about the document can be found under that number in the resume section. The symbol // appearing after an accession number identifies a document that is not available from the ERIC Document Reproduction Service and that is not in the ERIC Microfiche Collection.

The Publication Types are displayed in a classified index arrangement, according to the outline below.

PUBLICATION TYPE CATEGORIES

CODE	CATEGORY
010	BOOKS
	COLLECTED WORKS
020	— General
021	— Proceedings
022	— Serials
030	CREATIVE WORKS (LITERARY AND DRAMATIC)
040	DISSERTATIONS/THESES
	GUIDES/METHODS/TECHNIQUES (FOR PRACTITIONERS)
050	— General (Mixed Type)
	— Classroom Use
051	— Instructional Materials (For Learner)
052	— Teaching Guides (For Teacher)
055	— Non-Classroom Use (For Administrative and Support Staff, and Teachers in Non-Classroom Situations)
060	HISTORICAL MATERIALS
070	INFORMATION ANALYSES/STATE-OF-THE-ART MATERIALS
080	JOURNAL ARTICLES
090	LEGAL/LEGISLATIVE/REGULATORY MATERIALS
100	NON-PRINT MEDIA
110	NUMERICAL/QUANTITATIVE DATA
120	OPINIONS/PERSONAL VIEWPOINTS/POSITION PAPERS/ESSAYS
	REFERENCE MATERIALS
130	— General (Mixed Type)
131	— Bibliographies
132	— Directories/Catalogs
133	— Geographic Materials
134	— Vocabularies/Classifications
	REPORTS
140	— General (Mixed Type)
141	— Descriptive (Program/Project Descriptions)
142	— Evaluative/Feasibility
143	— Research/Technical
150	SPEECHES, CONFERENCE PAPERS, "PAPERS PRESENTED AT . . ."
160	TESTS, QUESTIONNAIRES, EVALUATION INSTRUMENTS
170	TRANSLATIONS
999	OTHER/MISCELLANEOUS (NOT CLASSIFIABLE ELSEWHERE)

(010) Books

Clearinghouse Number/ED Number Cross-Reference Index

This index cross-references the temporary ERIC Clearinghouse accession number to the permanent ERIC Document (ED) accession numbers by which resumes are arranged in *Resources in Education* (RIE). Readers who have only Clearinghouse numbers for a given document may use this index to trace the item to its ED number and hence to its location in RIE.

The symbol // appearing after an accession number identifies a document that is not available from the ERIC Document Reproduction Service and that is not in the ERIC Microfiche Collection.

The following Clearinghouse prefixes are used in this index:

AA —ERIC Processing and Reference Facility
CE —Adult, Career, and Vocational Education
CG —Counseling and Personnel Services
CS —Reading and Communication Skills
EA —Educational Management
EC —Handicapped and Gifted Children
FL —Languages and Linguistics
HE —Higher Education
IR —Information Resources
JC —Junior Colleges
PS —Elementary and Early Childhood Education
RC —Rural Education and Small Schools
SE —Science, Mathematics, and Environmental Education
SO —Social Studies/Social Science Education
SP —Teacher Education
TM —Tests, Measurement, and Evaluation
UD —Urban Education

NEW THESAURUS TERMS

The following terms have been added to the ERIC System's Controlled Vocabulary since July 1977 and are not included in the seventh edition of the *Thesaurus of ERIC Descriptors.* The eighth edition is scheduled for publication in 1980.

Able Students (Del Jan78)
USE ACADEMICALLY GIFTED

Academic Advisement
USE EDUCATIONAL COUNSELING

ACADEMICALLY GIFTED Jan. 1978
SN Persons with superior ability or aptitude for academic learning.

ACADEMIC LIBRARIES Jan. 1979
SN Libraries forming part of, or associated with, institutions of higher education.

ACCESS TO EDUCATION Sep. 1977
SN Accessibility of an education to a student (including access to appropriate educational facilities, institutions, materials, and personnel).
UF Educational Access

Activity Learning (Del Jun78)
USE EXPERIENTIAL LEARNING

Adaptability (Personality)
USE ADJUSTMENT (TO ENVIRONMENT) (AND) PERSONALITY

ADULT DAY CARE Mar. 1978
SN Care of disabled adults (handicapped, elderly, and those who are ill) during the day, in which health and social services are offered by professional and paraprofessional staff.

AFTER SCHOOL DAY CARE Mar. 1978
SN Care of school-age children after the end of the school day.

ALARM SYSTEMS Mar. 1978
SN Methods and materials employed to sound or signal emergencies or impending dangers.
UF Burglar Alarms
Intrusion Detectors
Smoke Alarms

ANTHROPOLOGICAL LINGUISTICS Oct. 1977
SN Application of anthropological and linguistic techniques to the study of speech communities, particularly those with no writing system; attention is given to specific interrelationships in the concurrent and systematic development of culture and language.
UF Linguistic Anthropology

APATHY Aug. 1978
SN Lack of feeling about, or interest in, things generally found stimulating or interesting.
UF Indifference

AUDIOTAPE RECORDINGS Jan. 1979
SN Magnetic tapes on which electric signals are recorded and can be reproduced mechanically or electronically as sound—stored on open re··s, cassettes, or cartridges.
UF Sound Tape Recordings

BASIC SKILLS Jul. 1966
SN (Scope Note Added) Fundamental skills that are the basis of later learning and achievement.

BASKETBALL Feb. 1978

BICYCLING Feb. 1978

BIOMECHANICS Mar. 1978
SN Science of the action of forces, internal and external, on living things.

BIRTH Oct. 1977
UF Childbirth
Labor (Childbirth)
Parturition

Brochures
USE PAMPHLETS

CANADA NATIVES Aug. 1977
SN Peoples indigenous to Canada (Canada's American Indians, Eskimos, or peoples whose ancestry is mixed with these groups).

CAREER DEVELOPMENT Jan. 1979
SN The continuous process of making career decisions based on the individual's experiences and interactions (e.g., the child's first impression of the working world, the adolescent's consideration of vocational alternatives, or the adult's decision to change careers).

CARTOGRAPHY Aug. 1977
SN Science or art of making maps.
UF Mapping

Choreography
USE DANCE

CLINICAL PSYCHOLOGY Oct. 1977
SN Branch of psychology devoted to psychological methods of diagnosing and treating mental and emotional disorders, as well as research into the causes of these disorders and the effects of therapy.

CODES OF ETHICS Jan. 1978
SN Standards of ethical conduct, violation of which may subject individuals to disciplinary action.
UF Honor Codes

CODE SWITCHING (LANGUAGE) Aug. 1978
SN The alternating use of languages, dialects, or language styles in the speech of an individual (e.g., the bilingual's use of two languages in speech)—may occur at the word, phrase, clause, or sentence level.
UF Switching (Language)

College Enrollment
USE ENROLLMENT

College Registration
USE SCHOOL REGISTRATION

Community Recreation Legislation (Del Jan79)
USE LOCAL LEGISLATION (AND) RECREATION LEGISLATION

COMMUNITY SATISFACTION Jun. 1978
SN The extent to which individuals or groups are content with the quality of life in their immediate locale.

COMPETITION Mar. 1978
SN Rivalry between individuals or groups seeking the same object or goal.

Computation
USE CALCULATION

COMPUTER ASSISTED INSTRUCTION Jul. 1966
SN (Scope Note Added) Interactive instructional technique in which a computer is used to present instructional material, monitor learning, and select additional instructional material in accordance with individual learner needs.

COMPUTER MANAGED INSTRUCTION Jan. 1979
SN Use of a computer to maintain and analyze data on learner performance and instructional progress as an aid to teachers in selecting learning activities.
UF CMI
Computer Aided Instructional Management
Computer Based Instructional Management

CONFIDENTIALITY Feb. 1971
SN (Scope Note Changed) Protection of privileged information.

Consumerism
USE CONSUMER PROTECTION

Continuing Education (Adults)
USE ADULT EDUCATION

Continuing Education (Professional)
USE PROFESSIONAL CONTINUING EDUCATION

COOPERATION Mar. 1978
SN Action on the part of individuals or groups integrated toward the achievement of a common purpose.

COPING Jan. 1979
SN Contending with difficulties without altering purposes or goals.

CROSS CULTURAL TRAINING Jul. 1966
SN (Scope Note Added) Training in the particular skills—communicative, behavioral, and attitudinal—required for successful interaction with individuals native to other cultures—e.g., for personnel about to undertake overseas assignments (Note: Do not confuse with "Multicultural Education"; prior to Jan79, "Cross Cultural Training" was frequently used for "Multicultural Education").

Cultural Characteristics
USE CULTURAL TRAITS

DANCE THERAPY Feb. 1978
SN The therapeutic use of rhythmic motor activity (folk dancing, ballroom dancing, exercising to music, etc.) as a bridge to mental or physical well-being.

DEPRESSION (PSYCHOLOGY) Aug. 1978
SN Emotional state of dejection and sadness, ranging from mild discouragement to utter despair.
UF Despair
Despondency
Dysthymia
Melancholia

Diagnosis
USE IDENTIFICATION

Diagnosis (Clinical)
USE CLINICAL DIAGNOSIS

Diagnosis (Educational)
USE EDUCATIONAL DIAGNOSIS

DIFFERENCES Jan. 1978
SN Distinguishing elements or factors which differentiate one entity from another.

DISCLOSURE Mar. 1978
SN Communication of personal, organizational, or institutional information and records.
UF Public Disclosure

DISCOVERY PROCESSES Jul. 1966
SN (Scope Note Added) Ascertaining something existing but not yet known (Note: Do not confuse with "Inventions").

DOWNS SYNDROME Jan. 1978

EDUCATIONAL TECHNOLOGY Jul. 1969
SN (Scope Note Added) Application of a systematic approach to the identification, development, organization, or utilization of educational resources and/or the management of these processes—used occasionally in a more limited sense to describe the use of equipment-oriented techniques or audiovisual aids in educational settings.

ELIGIBILITY Aug. 1978
SN Qualifying for certain benefits or services (e.g., student eligibility for financial aid, institutional eligibility for accreditation, family eligibility for welfare assistance, employee eligibility for retirement).
UF Institutional Eligibility
Student Eligibility

Emotional Insecurity
USE INSECURITY

Employment Discrimination
USE EQUAL OPPORTUNITIES (JOBS)

ENDOWMENT FUNDS Sep. 1977
SN Capital sums set aside as sources of income—the principal of each sum is usually left intact and invested, while the income may be expended.
UF Educational Endowments

EQUIVALENCY TESTS Aug. 1968
SN (Scope Note Changed) Tests to measure the extent to which previous schooling, knowledge, or experience satisfies course or job requirements (Note: See also the Identifier "General Educational Development Tests"; prior to Sep77, the instruction "GED Tests, use Equivalency Tests" was carried in the Thesaurus).

ETHNICITY Oct. 1977
SN Identification with a specific kind of ethnic character, quality, or peculiarity; awareness of the ethnic character of oneself or others.
UF Ethnic Consciousness
Ethnic Identification

ETHNOGRAPHY Jan. 1979
SN Descriptive study (i.e., observation and reporting) of human culture and societies.

ETHNOLOGY Aug. 1968
SN (Scope Note Added) Historical, analytic, or comparative study of human culture and societies.

EVALUATORS Sep. 1977
SN Individuals who collect information according to a design and use such information as a basis for judging either the absolute or relative value of programs, products, or personnel.
UF Evaluation Specialists

Exceptional (Atypical) (Del Jan78)
USE EXCEPTIONAL PERSONS

Exceptional Children (Del Jan78)
USE EXCEPTIONAL PERSONS

EXCEPTIONAL PERSONS Jan. 1978
SN Persons atypical due to handicaps or giftedness.

Exceptional Students (Del Jan78)
USE EXCEPTIONAL PERSONS

EXPERIENTIAL LEARNING Jun. 1978
SN Learning by doing; includes knowledge and skills acquired outside of book/lecture learning situations through work, play, and other life experiences.
UF Action Learning
Community Experience
Experience Based Education
Home Experience
Prior Learning (Experiential)

Exploratory Learning
USE DISCOVERY LEARNING

FACULTY DEVELOPMENT Oct. 1977
SN Activities to encourage and enhance faculty professional growth.
UF Faculty Growth
Faculty Improvement

FACULTY HANDBOOKS Aug. 1978
SN Guidelines developed and published by a school, college, or university that outline the duties of faculty members, their roles within the institution, procedures, and/or organizational information.

FEAR OF SUCCESS Aug. 1978
SN Need to refrain from maximally utilizing one's abilities in achievement situations because of expected negative consequences.
UF Success Avoidance

Federal Recreation Legislation (Del Jan79)
USE FEDERAL LEGISLATION (AND) RECREATION LEGISLATION

FEDERAL REGULATION Sep. 1977
SN Federal government control or influence based on legislation.
UF Federal Control

FIELD EXPERIENCE PROGRAMS Jul. 1966
SN (Scope Note Added) Practical experiential learning activities under institutional or organizational sponsorship, usually away from the classroom or campus—associated most often with Grades 10-16, and characterized as less formal and concentrated than professional internship programs (Note: Before Jun78, the use of this term was not restricted by a Scope Note).

Field Laboratory Experience
USE FIELD EXPERIENCE PROGRAMS

FUND RAISING Feb. 1978
SN Identifying, soliciting, acquiring, and cultivating financial resources (Note: Prior to Feb78, the instruction "Fund Raising, use Financial Support" was carried in the Thesaurus).

GENETICS Jul. 1966
SN (Scope Note Added) Biological science which deals with the phenomena of heredity and the variation between parents and offspring.

Gifted Students
USE ACADEMICALLY GIFTED

GOVERNMENT SCHOOL RELATIONSHIP Sep. 1977
SN Any interaction of an educational institution or school district with a local, provincial, or central government.
UF School Government Relationship

GRIEF Sep. 1977
SN Emotional state of intense sadness associated with external loss or deprivation.
UF Mourning

Guards (Border)
USE IMMIGRATION INSPECTORS

GYMNASTICS Feb. 1978

GYNECOLOGY Oct. 1977
SN Branch of medicine dealing with the diseases, hygiene, and reproduction function of females.

HEARINGS Sep. 1977
SN Sessions in which witnesses are heard and testimony is recorded (Note: For U.S. Congressional hearings, coordinate "Hearings" with such identifiers as "Congress," "Congress 95th," etc.).
UF Public Hearings

HEREDITY Jul. 1966
SN (Scope Note Added) The transmission of developmental potentialities from one generation of living things to the next and following generations through the natural process of reproduction.

HORSEBACK RIDING Feb. 1978

Human Sexuality
USE SEXUALITY

ICE SKATING Feb. 1978

IMMERSION PROGRAMS Aug. 1977
SN Educational programs in which all curriculum materials are taught in a second language, generally at the elementary level and almost always within the context of a first language school.

INSTITUTIONAL AUTONOMY Sep. 1977
SN Freedom of an institution to act without external control.

INSTITUTIONAL CHARACTERISTICS Jun. 1978
SN Descriptive features of an institution, such as funding, size, demographics, and governance.
UF College Characteristics
School Characteristics
University Characteristics

Institutional Differences
USE DIFFERENCES (AND) INSTITUTIONAL CHARACTERISTICS

Instructional Technology (Del Jan79)
USE EDUCATIONAL TECHNOLOGY

INTELLECTUAL HISTORY Aug. 1977
SN Branch of history that deals with the evolution of ideas, how these ideas were influenced by various factors, and what happens to these ideas or thoughts among people in a given society.

Interest Centers
USE CENTERS OF INTEREST

INTERPERSONAL ATTRACTION Aug. 1978
SN Perceived personal qualities (physical, mental, emotional, and social) drawing persons to one another.
UF Attractiveness (between Persons)

INVENTIONS Mar. 1978
SN Original products or processes (things not previously existing) developed by creative thought or experimentation—(Note: For "Discoveries," see the Descriptor "Discovery Processes").

Job Discrimination
USE EQUAL OPPORTUNITIES (JOBS)

Job Tenure (Del Jun78)
USE TENURE

JOGGING Feb. 1978
SN The exercise of running at a slow, regular pace, often alternately with walking.

Juvenile Delinquents
USE DELINQUENTS

Kinesics
USE BODY LANGUAGE

LACROSSE Feb. 1978

LANGUAGE DOMINANCE Aug. 1978
SN The bilingual or multilingual individual's greater command of one of the languages in his/her repertoire.

LANGUAGE MAINTENANCE Oct. 1977
SN The maintenance of a given language rather than its displacement by another language (includes maintaining the languages of cultural minority groups through family practices, rituals, concerted educational endeavors with society at large, etc.).

LANGUAGE PROCESSING Aug. 1978
SN The cognitive processing of spoken or written language, ranging from the construction of spoken or written messages to the abstraction of meaning from language—includes the computerized simulation of these processes.

Liability (Responsibility)
USE LEGAL RESPONSIBILITY

LOAN REPAYMENT Feb. 1978
SN Repayment of financial debts or credits.
UF Defaulting on Loans

LOCAL LEGISLATION Jan. 1979
SN Ordinances and regulations relating to a particular locality within a state or province.
UF Community Legislation

Local Recreation Legislation (Del Jan79)
USE LOCAL LEGISLATION (AND) RECREATION LEGISLATION

MAINSTREAMING Jun. 1978
SN Progressively including and maintaining exceptional students (handicapped and gifted) in classes and schools with regular or normal students, with steps taken to see that special needs are satisfied within this arrangement.
UF Least Restrictive Environment (Handicapped)

Malnutrition
USE NUTRITION

MATHEMATICAL FORMULAS Aug. 1978
SN Equations or rules relating mathematical objects or quantities.
UF Mathematical Expressions

Metrication
USE METRIC SYSTEM

MIDDLE MANAGEMENT Jun. 1978
SN The intermediate level of management, excluding top-level management on the one hand and first-level supervision on the other.
UF Middle Level Management
Midmanagement

MINIMUM COMPETENCY TESTING Jan. 1979
SN Measurement of the attainment of basic skills judged appropriate for a particular level of education.

Mongolism (Del Jan78)
USE DOWNS SYNDROME

MOVEMENT EDUCATION Feb. 1978
SN Developing and applying coordinated and rhythmical body movements in learning situations.

MULTICAMPUS COLLEGES Feb. 1978
SN Higher education institutions, including universities, which have multiple (two or more) locations.

MULTICULTURAL EDUCATION Jan. 1979
SN Education involving two or more ethnic groups and designed to help participants clarify their own ethnic identity and appreciate that of others, reduce prejudice and stereotyping, and promote cultural pluralism and equal participation (Note: Do not confuse with "Cross Cultural Training," which, prior to Jan79, was frequently used for "Multicultural Education").

UF Bicultural Education
Intercultural Education
Multiethnic Education

Multiculturalism
USE CULTURAL PLURALISM

Navaho (Del Jun78)
USE NAVAJO

NAVAJO Jun. 1978

NONCAMPUS COLLEGES Oct. 1977
SN Postsecondary institutions which dispense with the fixed campus in favor of rented, borrowed, or mobile facilities in many locations.

NONPROFIT ORGANIZATIONS Jan. 1978
SN Organizations not designed primarily to pay dividends on invested capital (Note: Prior to Dec77, the instruction "Nonprofit Organizations, use Voluntary Agencies" was carried in the Thesaurus).

NOVELTY (STIMULUS DIMENSION) Mar. 1978
SN A stimulus dimension which reflects the quality or state of being new or unfamiliar to an individual.

Nuclear Medicine
USE RADIOLOGY

ORIENTEERING Feb. 1978
SN The art or sport of cross-country navigation using a map and compass as guides—emphasis is on determining, then taking, the shortest and quickest way to a specified destination.

Paralanguage
USE PARALINGUISTICS

PARENTAL FINANCIAL CONTRIBUTION Aug. 1978
SN Partial or complete financial support of a student's educational expenses by a parent.

PARKING FACILITIES Oct. 1968
SN (Scope Note Changed) Structures for storage of vehicles.

PEER INFLUENCE Feb. 1978
SN Pressure, either planned or unplanned, exerted by peers to influence personal behavior.
UF Peer Pressure

PERSPECTIVE TAKING Oct. 1977
SN The ability to perceive, or to react to, given situations (whether physical, social, or emotional) from other than one's own egocentric point of view.
UF Role Taking

PHARMACEUTICAL EDUCATION Aug. 1977
SN Formal study of the art and science of preparing and dispensing drugs and medicine.

Phonotape Recordings (Del Jan79)
USE AUDIOTAPE RECORDINGS

PHYSICAL ACTIVITY LEVEL Mar. 1978
SN Extent of motor behavior manifested by an individual or group.
UF Activity Level (Motor Behavior)

PLACE OF RESIDENCE Jan. 1978
SN Locality of habitation including both site (geographic region) and type (housing).
UF Residential Location

POPULAR CULTURE Sep. 1977
SN Artistic and commercial expressions which reach a majority of the people through mass media, mass production, or transportation.
UF Mass Culture
Pop Culture

PORTFOLIOS (BACKGROUND MATERIALS) Jun. 1978
SN Collections of records, letters of reference, work samples, etc., documenting skills, capabilities, and past experiences.

POSTSECONDARY EDUCATION Jan. 1979
("Postsecondary" was formerly two words.)

POSTSECONDARY EDUCATION AS A FIELD OF STUDY Jan. 1979
("Postsecondary" was formerly two words.)

PRAGMATICS Aug. 1977
SN The study of the aspects of meaning in language that are related to the use of language in a natural context.

Priority Determination
USE NEEDS ASSESSMENT

PRIVACY Oct. 1977
SN Condition whereby individuals or their properties are free from unwarranted scrutiny.

PROGRAM VALIDATION Mar. 1977
SN (Scope Note Changed) The process of demonstrating the worth of a program in attaining its objectives, including the verification of claims made for it by its sponsors—unlike "evaluation," the concept of "validation" includes confirmation by an impartial expert or authentication through the use of a recognized, proper standard (Note: For the results of validation, see "Validated Programs").

PROXIMITY Aug. 1977
SN Relative nearness in time, place, relationship, etc. (Note: Prior to Aug77, the instruction "Proximity, use Distance" was carried in the Thesaurus).

QUALIFICATIONS Jul. 1966
SN (Scope Note Added) Abilities, aptitudes, or achievements that suit individuals to particular positions or tasks.

QUALITY OF LIFE Sep. 1977
SN Any combination of objective standards and subjective attitudes, both other- and self-imposed, by which individuals and groups assess their life situations.
UF Life Quality

QUOTAS Jan. 1978
SN Numbers or percentages to be met for a specific objective.

REGIONAL CHARACTERISTICS Jan. 1978
SN Those identifying qualities or traits which constitute the essential nature of a geographic area's people and resources.

Regional Differences
USE DIFFERENCES (AND) REGIONAL CHARACTERISTICS

Registration in School
USE SCHOOL REGISTRATION

Regular Class Placement (Del Jun78)
USE MAINSTREAMING

RESOURCE ROOM PROGRAMS Oct. 1977
SN Special classroom programs in which a specially trained teacher provides instructional support for students referred by regular classroom teachers.

RETRENCHMENT Aug. 1977
SN Reduction of costs or efforts, usually as an economic necessity.

ROLLER SKATING Feb. 1978

RUNAWAYS Aug. 1978
SN Persons who leave home without notice, and stay away for indefinite periods of time.
UF Adult Runaways
Juvenile Runaways

RURAL NONFARM RESIDENTS Aug. 1977

SCHOOL SECURITY Mar. 1978
SN Physical protection of school property, school personnel, and students from hostile acts or influences.
UF Campus Security

Security (Del Mar78)
USE SECURITY (PSYCHOLOGY)

SECURITY (PSYCHOLOGY) Mar. 1978
SN Being or feeling free from risk or uncertainty (Note: The descriptor "Security," without parenthetical qualifier, was used from 1967 to Mar78).
UF Emotional Security

SECURITY PERSONNEL Mar. 1978
SN Persons employed by an institution or organization to provide physical protection from hostile acts or influences.
UF Guards (Security)

SELF DETERMINATION Mar. 1978
SN The right, power, opportunity, etc., of both individuals and peoples to determine their own destinies (Note: Prior to Mar78, the instruction "Self Determination, use Individual Power" was carried in the Thesaurus).
UF Destiny Control
Self Government

Self Image
USE SELF CONCEPT

Senior Executives
USE CHIEF ADMINISTRATORS

SENIORITY Jan. 1978
SN Priority in status or rank derived from age or length of service.

SEX FAIRNESS Aug. 1978
SN Not discriminating on the basis of sex (Note: Use for descriptions of materials, procedures, activities, or programs which treat the sexes equitably).

SKIING Feb. 1978
UF Snowskiing

SMALL COLLEGES Jan. 1978
SN Colleges with less than 2500 students.

SOCIAL EXCHANGE THEORY Jul. 1966
SN (Scope Note Added) Social interactions conceptualized as economic transactions, with those involved in such transactions viewed as seeking to maximize profit (material or psychic) and therefore engaging most often in behavior which experience indicates brings the greatest return.

SORORITIES Jan. 1978
SN Groups of women associated through social, scholastic, or professional interests.

SQUASH (GAME) Feb. 1978
SN Includes squash rackets and squash tennis.

STATE HISTORY Aug. 1977
SN History associated with individual states within the United States.

State Recreation Legislation (Del Jan79)
USE RECREATION LEGISLATION (AND) STATE LEGISLATION

Student Housing (College)
USE COLLEGE HOUSING

Superior Students (Del Jan78)
USE ACADEMICALLY GIFTED

SURGERY Oct. 1977
SN Branch of medicine which treats trauma and diseases wholly or in part by manual and operative procedures.
UF Operations (Surgery)

SWEDISH Mar. 1978

Teacher Education Centers
USE TEACHER CENTERS

TECHNOLOGY TRANSFER Mar. 1978
SN Transfer of research results, technological developments, or knowledge from an original application to other settings.

TENURE Jul. 1966
SN (Scope Note Changed) Status of a person in a position or occupation (i.e., length of service, terms of employment, or permanence of position).

Top Level Managers
USE CHIEF ADMINISTRATORS

TORTS Jan. 1978
SN Private or civil wrongs, not including breach of contract, for which perpetrators may be legally prosecuted and injured parties may be compensated.

Transcripts (Academic)
USE ACADEMIC RECORDS

UNDERGROUND FACILITIES Jan. 1979
SN Buildings, rooms, passageways, etc. that are below the surface of the ground.

USER SATISFACTION (INFORMATION) Jan. 1979
SN Users' assessment of the degree to which information or library services meet their needs (Note: Prior to Jan79, "Participant Satisfaction" was sometimes used to index this concept).
UF Information User Satisfaction
Library User Satisfaction

VALIDATED PROGRAMS Jan. 1979
SN Authenticated, officially approved, programs that are suitable for replication (Note: For the process of validation, see "Program Validation").

VIDEODISC RECORDINGS Jan. 1979
SN Magnetic discs on which are recorded video signals (with or without accompanying sound) for television use.

Videotape Libraries
("Videotape" was formerly two words.)
USE FILM LIBRARIES

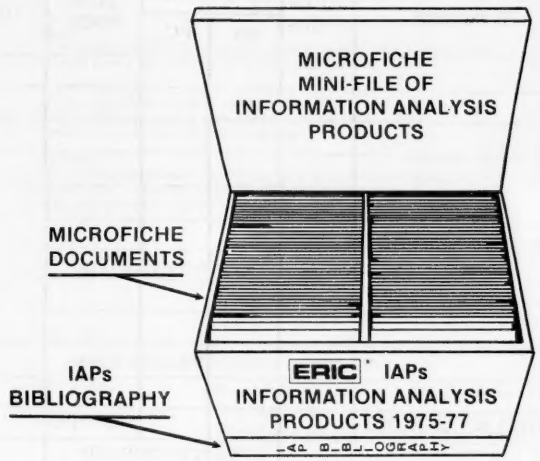
VIDEOTAPE RECORDINGS Jan. 1979
("Videotape" was formerly two words.)
SN (Scope Note Added) Magnetic tapes on which video signals (with or without accompanying sound) are recorded for television use—stored on open reels, cassettes, or cartridges.

Vocational Development (Del Jan79)
USE CAREER DEVELOPMENT

WATERSKIING Feb. 1978

WEIGHTLIFTING Feb. 1978
SN The lifting of standard weights in a prescribed manner, as a competitive event or conditioning exercise.
UF Weight Training

WRESTLING Feb. 1978



ERIC

ANNOUNCES . . .

A MINI-FILE COLLECTION of the most recent INFORMATION ANALYSIS PRODUCTS 1975-1977 on MICROFICHE . . .

The MINI-FILE contains all of the DOCUMENTS available from EDRS in MICROFICHE FORMAT . . . together with a paper copy of the BIBLIOGRAPHY that lists DOCUMENTS in accession number order, with ED accessions (from RIE). Three indexes are provided: SUBJECT, PERSONAL AUTHOR, and INSTITUTION.

The MINI-FILE covers 574 INFORMATION ANALYSIS PRODUCTS (IAPs) developed by the sixteen (16) ERIC CLEARINGHOUSES. The information is synthesized into research reviews, bibliographies, state of the art studies, interpretive studies on topics of high current interest, and similar documents designed to meet the information needs of users.

INCLUDED ARE TYPICAL TITLES OF CURRENT INTEREST:

- **Recent Trends in Bilingual Education**
- **Cheating: An Annotated Bibliography**
- **Women's Athletics**
- **Teaching Local History**
- **Assertiveness Training**
- **Children and Television**
- **Translation as a Career Option for Foreign Language Majors**
- **Intercultural Communication**
- **Energy Investigation for the Classroom**
- **Alternative Tuition Systems**
- **Strengthening the Small Rural School**
- **Adult Learning: Issues and Innovation**
- **Alternatives to Suspension**

Revised June 1979

GENERAL INFORMATION

1. PRICE LIST
The prices set forth herein may be changed without notice; however, any price change will be subject to the approval of the National Institute of Education Contracting Officer.

2. PAYMENT
The prices set forth herein do not include any sales, use, excise, or similar taxes which may apply to the sale of microfiche or hard copy to the Customer. The cost of such taxes, if any, shall be borne by the Customer.

Payment shall be made net thirty (30) days from date of invoice. Payment shall be without expense to CMIC.

3. REPRODUCTION
Express permission to reproduce a copyrighted document provided hereunder must be obtained in writing from the copyright holder noted on the title page of such copyrighted document.

4. CONTINGENCIES
CMIC shall not be liable to Customer or any other person for any failure or delay in the performance of any obligation if such failure of delay (a) is due to events beyond the control of CMIC incuding, but not limited to, fire, storm, flood, earthquake, explosion, accident, acts of the public enemy, strikes, lockouts, labor disputes, labor shortage, work stoppages, transportation embargoes or delays, failure or shortage of materials, supplies or machinery, acts of God, or acts or regulations or priorities of the federal, state, or local governments; (b) is due to failures of performance of subcontractors beyond CMIC's control and without negligence on the part of CMIC; or (c) is due to erroneous or incomplete information furnished by Customer.

5. LIABILITY
CMIC's liability, if any, arising hereunder shall not exceed restitution of charges.

In no event shall CMIC be liable for special, consequential, or liquidated damages arising from the provision of services hereunder.

6. WARRANTY
CMIC MAKES NO WARRANTY, EXPRESS OR IMPLIED, AS TO ANY MATTER WHATSOVER, INCLUDING ANY WARRANTY OF MERCHANTABILITY OR FITNESS FOR ANY PARTICULAR PURPOSE.

7. QUALITY
CMIC will replace products returned because of reproduction defects or incompleteness. The quality of the input document is not the responsibility of CMIC. Best available copy will be supplied.

8. CHANGES
No waiver, alteration, or modification of any of the provisions hereof shall be binding unless in writing and signed by an officer of CMIC.

9. DEFAULT AND WAIVER
a. If Customer fails with respect to this or any other agreement with CMIC to pay any invoice when due or to accept any shipment as ordered, CMIC may without prejudice to other remedies defer any further shipments until the default is corrected, or cancel this Purchase Order.
b. No course of conduct nor any delay ofCMIC in exercising any right hereunder shall waive any rights of CMIC or modify this Agreement.

10. GOVERNING LAW
This Agreement shall be construed to be between merchants. Any question concerning its validity, construction, or performance shall be governed by the laws of the State of New York.

11. DEPOSIT ACCOUNTS
Customers who have a continuing need for ERIC documents may open a Deposit account by depositing a minimum of $200.00. Once a deposit account is opened, ERIC documents will be sent upon request, and the account charged for the actual cost and postage. A monthly statement of the account will be furnished.

12. STANDING ORDER ACCOUNTS
Customers who desire to receive microfiche copies of all ERIC reports announced in each issue of Resources in Education may do so by depositing $2000.00 or submitting an executed purchase order. The cost of each issue and postage will be charged against the account. A monthly statement of the account will be furnished.

13. PAPER COPY (PC)
A paper copy (PC) is xerographic reproduction, on paper, of the original document. Each paper copy has a Vellum Bristol cover to identify and protect the document.

14. FOREIGN POSTAGE
Postage for all countries other than the United States is based on the international Postal Rates in effect at the time the order is shipped. To determine postage allow 75 microfiche or 75 (PC) pages per pound. Customers must specify the exact classification of mail desired, and include the postage for that classification with their order. Payment must be in United States funds.

OTHER ERIC COLLECTIONS AVAILABLE FROM EDRS

STANDING ORDERS

Subscription orders of microfiche copies of all ERIC reports announced in each issue of **Resources in Education** average $150.00 per month.

"ORDER ERIC"

NOW AVAILABLE ON THE ORBIT SYSTEM ..... "ORDER ERIC"

Order your needed ERIC documents "at the terminal" (ORBIT users only). They will be stored during the work day and electronically transmitted to and received by EDRS at the end of the day. Each order is computer processed and quickly filled to meet your timely requirements.

Expedite your demand orders for microfiche or papercopy! This service permits ORBIT users to order "at the terminal" documents from the *Resources in Education* (RIE) portion of the ERIC Data Base that are available* from the ERIC Document Reproduction Service.

*Note: EDRS prices for microfiche and hardcopy must be quoted, otherwise the document is not available through this service. Documents that are available can be identified by their ED (not EJ) accession number, and from the PR field.

RUSH SERVICE

An order placed through the ORBIT system today will be rushed on its way to you within 48 hours.

LOW COST

A service charge of only 50¢ per document ordered will be added to the current list price, plus applicable shipping charges.

TIMELY INFORMATION

Demand order requests from EDRS often times are valuable only if the information is received quickly. Now you can count on fast electronic input of your order. Save on lengthy mailing time—your order is speedily transmitted to EDRS, and your requested information is sent rapidly to you.

HERE ARE SOME IMPORTANT DETAILS CONCERNING "ORDER ERIC". . . .

Supplier: ERIC Document Reproduction Service (EDRS)
P.O. Box 190
Arlington, VA 22210

Document Forms: Microfiche (MF) Papercopy (PC)

Deposit Accounts: Deposit accounts are not required, but preferred—you should establish one with a minimum of $200. Contact EDRS directly to set up your account.

Rates: A service charge of 50¢ per document ordered will be added to the current price of the document plus expedited shipping charges.

EDRS requires that users carefully follow the instructions given below to ensure correct interpretation and processing of terminal orders:

- Be sure a microfiche (MF) or papercopy (PC) price is quoted in the document resume. Resumes without a quoted EDRS price means that the document is not available from EDRS and cannot be ordered through "ORDER ERIC".
- EDRS does not supply documents with EJ numbers. These are citations from Current Index to Journals in Education (CIJE).
- Enter your name or company name on one line after BILL TO. Enter your address on separate lines just as it should appear on the shipping label. You may enter up to 5 lines. Make sure you enter your city, state, and zip code on the last line.
- If you want your order shipped to a different address than given in the BILL TO section, enter that address in SHIP TO. Be sure to include the city, state, and zip code.
- Documents ordered in microfiche (MF) will automatically be shipped via airmail, unless otherwise specified. Documents ordered in papercopy (PC) will be shipped via United Parcel Service, unless otherwise specified. If you have special shipping instructions, enter SHIP VIA: and the information on one line. For example, SHIP VIA: UPS BLUE LABEL. All documents included on one invoice will be shipped the same way.
- If you have a deposit account, enter CHARGE DEPOSIT ACCOUNT: and the number.
- If you want a purchase order number to appear on the invoice and shipping label, enter MY P.O. NUMBER IS: and the number(s) for each purchase order you wish to include.
- For each item you wish to order, enter on one line: the ED number, the document form (MF or PC), number of copies you are ordering (a number and the word COPY or COPIES). Each line must begin with the letters ED and there must not be any blanks or commas in the ED number.

Current Index to Journals in Education

CIJE

THE ORYX PRESS is now publishing the official ERIC publication CURRENT INDEX TO JOURNALS IN EDUCATION (CIJE) under a contract with the National Institute of Education, U.S. Department of Health, Education and Welfare.

Your CIJE Service brings extracts of all the current literature in education to your fingertips. An average of 1800 articles from 775 journals are indexed in every monthly issue—each listed under from three to seven subject headings.

Extensive CIJE subject coverage compiled by ERIC clearinghouses includes virtually all significant facets of education and information resources for education.

The CIJE Service includes:

CIJE Monthly Issues, March 1979-Decembr 1979	$ 66.70 U.S. $ 70.90 Foreign
CIJE Monthly Issues with 1979 Semiannual Cumulations	$136.70 U.S. $145.90 Foreign
CIJE Semiannual Cumulations (two volumes per year)	$ 80.00 U.S. $ 85.00 Foreign
Thesaurus of ERIC Descriptors, 8th Edition (Scheduled for publication April 1980)	$ 13.20 U.S. $ 14.40 Foreign
ERIC RIE Educational Documents Abstracts (two volumes)	$ 80.00 U.S $ 85.00 Foreign
Index (one volume)	$ 47.50 U.S. $ 50.00 Foreign
All Prices above include postage and handling.	

To order or transfer your CIJE Service, write to The Oryx Press.

ERICTAPES ERICTOOLS

HAVE A COMPUTER?

LOOK AT ERICTAPES!

The Educational Resources Information Center (ERIC) data base is available on magnetic tape in a variety of options from ORI, Inc. Under special authorization from the National Institute of Education (DHEW), these tapes are offered at unusually low cost to encourage the widest possible dissemination.

The ERIC data base provides coverage of the significant literature in the field of educational resources. Report literature (announced in *Resources in Education*) is covered from 1966 to date, and journal article literature (announced in *Current Index to Journals in Education*) is covered from 1969. Monthly, quarterly, and annual updates are available for both *RIE* and *CIJE*, so that the files may be kept current.

The basic files are available in the ERIC (IBM 360 OS) Format. These files include the complete resume, (document description, indexing, and abstract or annotation) of each document announced in the respective journal, in accession number order. A variety of peripheral files, including Postings Files (inverted subject and source indexes) and the Thesaurus (controlled indexing vocabulary) are also available on magnetic tape, and almost any segment of the master files is obtainable on Special Order.

The files may be purchased individually or as a collection, and substantial discounts are available on annual subscriptions for updates. The files are written on new, high-quality, 9-track tapes (600-1200, or 2400-ft., as appropriate) at either 1600 or 800 BPI and are guaranteed. Prices per tape reel start as low as $50.

NO COMPUTER?

LOOK AT ERICTOOLS!

For organizations without access to a computer.* ERICTOOLS provide manual multi-viewpoint access to the ERIC document collection. ERICTOOLS are a series of printed indexes, directories, and cross-reference lists, distributed internally to components of the ERIC network. The *Title Index* provides access by document title. The *Source Directory* provides access to all organizational names used in the system, i.e., corporate authors and sponsoring agencies. Cross-reference lists lead the inquirer to the accession number (ED number) from: Report Number; Contract Number; and Clearinghouse Accession Number.

The documents are available individually and on annual subscription at a discounted price. Prices start from as low as $10 for some individual documents.

*Many of these documents are also valuable tools for computer searchers.

For additional information, complete and mail the reply form or call: **ERICTAPES/ERICTOOLS (301) 656-9723**

ERIC Network Components

There are currently sixteen (16) ERIC Clearinghouses, each responsible for a major area of the field of education. Clearinghouses acquire, select, catalog, abstract, and index the documents announced in *Resources in Education (RIE)*. They also prepare interpretive summaries and annotated bibliographies dealing with high interest topics and based on the documents analyzed for *RIE*; these information analysis products are also announced in *Resources in Education*.
